MARCH 15, 1905

The effect of Electricity upon the weak, debilitated man is the same as rain upon the parched field in summer. He may be debilitated from varicocele, losses, impotency; may have confusion of ideas; fear to act and decide; gloomy forebodings, timid and fretful; avoid friends and company; without confidence in himself to face the slightest responsibility, and let him properly apply Electricity for but a few hours and all these symptoms vanish. A few weeks to a couple of months' use of this treatment banish them forever, and make strong, confident, manly men out of the puniest weaklings. For nearly forty years I have treated and restored weak men through my world-famed invention, and am still doing so with greater success than ever. In fact, I do not expect to fail in any case of this kind, and therefore, as most men are more or less sceptical, I will continue to give my Herculex

Dr. Sanden Electric **Belt Free Until** Cured.

Not one cent is to be paid me in advance or on deposit. Call or write and get the belt, and use, say, for sixty days, and if cured pay me price of belt only-most

DR. C. F. SANDEN. 140 Office Hours: 9 to 6. Saturdays until 9 p.m.

THE FARMER'S ADVOCATE. FREE TO M U

cases low as \$4; if not cured return the belt and the deal is ended. But I know what the belt will do, and will take the risk of my pay when you are cured. I also give my belts on same terms in Rheumatism, Lame Back, Stomach, Kidney and Liver Complaints, etc.

As the originator and founder of the electric belt system of treatment, my forty years' success is the envy of many, and my belts of course are imitated. (What good thing is not?) But my great knowledge to advise and direct my patients is mine alone, and free to all who use my belt until cure is complete.

What would you not give to have your old vim back again? What would you not sacrifice

to feel as you did a few years ago; to have the same snap and energy; the same gladsome, joyous, light-hearted spirit and the physical strength you used to have? You know you are not the same man, and you know you would like to be. You might as well be. It's easy. I am making men out of wrecks every day, and the above offer must convince you what I feel I can do for you.

Call or send to-day for my belt; or, if you want to look further into the matter, I have the best two little books ever written upon Electricity and its medical uses, and send them free, sealed, upon request.

Yonge Street, Toronto, Ont.

Largest and Oldest Electric Belt Establishment in the World.

WORMS.

Six-months-old colt is not doing well. He eats well and feels well, but will not gain in flesh. G. W. S.

Ans.-It is probable he has worms. Take four drams each sulphate of iron, sulphate of copper, tartar emetic and calomel; mix, and make into twelve powders. Give him a powder every night and morning. After the last has been taken, give him a purgative of half a pint raw linseed oil. Feed bran only for twenty-four hours after giving purgative.

AGALACTIA.

Mare that has bred several times, and always was a good milker, produced a foal on February 14th, but she had no milk. She was well fed and in good condition. I gave her bran and chopped oats, warm, with a tablespoonful of saltpetre, and warm water to drink. Would you advise me to breed her again? Would you advise me to breed her threeyear-old daughter, weighing 1,200 lbs. to a Clydesdale stallion weighing 1,800? W. C.

Ans.-Agalactia, or absence of milk occasionally occurs in mares without appreciable cause, and nothing can be done for the condition, other than feeding on milk-producing food. You fed her all right, but should not have given the saltpetre. This drug had a tendency to prevent milk secretion, but I do not think it made much difference in this case. I would breed her again so that she would foal while on grass. The sire mentioned should mate well with the filly, but I would prefer one not quite so large.

LOCKJAW.

Calf was castrated January 14th. On the 25th, its appetite failed; in a few days it bloated, became stiff in every joint and muscle. Its neck became very stiff, and if the animal was turned on its back, the head and neck would support the shoulders clear of the ground. In four or five days we killed it. An examination of the scrotum revealed some puss

1. Was it lockjaw?

2. Would cold cause it after castration ?

3. Would indigestion cause it?

4. Is there any cure? W. E. S.

1. It was lockjaw.

2. No. The disease is caused by a germ that exists in the earth or stables and gains entrance through a wound or Any operation may be followed sore. by the disease, and it often follows pricks in the foot, sore shoulders scratches, or any sore. No blame can be attached to the operator when tetanus (lockjaw) follows an operation. The only blame in this case is your own for allowing the wounds to close too quickly how should have been kent

low the puss to escape, but this neglect is not responsible for the disease.

3. No.

4. In rare cases recovery takes place

ENLARGED KNEE.

1. Heavy mare started off slightly lame, but went all right in a few minutes. She was given a long drive in deep snow with crust. Next day her knee was badly swollen. I applied liniment, and reduced the swelling, with the exception of a bunch on front knee. I drove her again in about three weeks, and now her knee is badly swollen, and she is very lame.

2. How can a team be prevented from crowding in deep snow? F. B. G.

Ans.-I am of the opinion she bruised her knee in some way, and a serous abscess has formed. If fluid is present, it must be removed, either by lancing or using an instrument called as aspirator. As the knee is a critical part to operate on, you had better employ a veterinarian. If you decide to treat yourself, give rest, bathe long and often with hot water, and apply camphorated liniment (which you can get at any drug store) after bathing. When the inflammation is allayed, rub well once daily, to reduce the bunch, with the following liniment : four drams each of resublimed iodine crystals and iodide of potassium, and four ounces each of glycerine and alcohol. It will require patience and attention.

2. There is no known menns of curing a team of crowding in deep snow, when once the habit has been acquired. V.
