A TRIP TO THE WEST INDIES

The "P. & B." steamers sailing from Halifax every twelfth day for Bermuda, the British West Indies and Demerara, are all very superior ones. The trip occupies about thirty-eight days, and is a delightful cruise from the start to the finish.

Through tickets from Toronto and all points on the railways are sold by

R. M. MELVILLE,
Corner Adelaide and Toronto Streets.

WHEN TRUSTED MEN GO WRONG

Every once in a while the daily papers report the shortcomings of an apparently trustworthy and responsible clerk or official. There is no accounting for these unfortunate affairs. They are accidents, and to be provided against as such. Our Guarantee and Fidelity Bonds insure an employer against the loss entailed by such accidents. We bond clerks and officials, cashiers and collectors and trusted employees handling money in every department of business. Our bonds are an asset to the employer, and a reliable credential for the employee.

Road Rollers

OUR NEW CATALOGUE

Our new twenty page catalogue of the Waterous Steam Road Roller has just been received from the printer.

This booklet is handsomely illustrated from actual photographs and shows the Roller as it really is, how it is built, and the work it will do.

It contains a detailed description of the special features of this machine—the features that have made the "Waterous" the standard of Roller construction in Canada.

If you are interested send for it.

THE CHIEF DIFFICULTY

that confronts the new man entering the Life Insurance Field is the securing of GOOD PROSPECTS. This difficulty is eliminated when you write for an INDUSTRIAL COMPANY, the debits of which are an inexhaustible mine for both ordinary and industrial business.

The Union Life Assurance Company

Head Office: TORONTO, CANADA

More Policyholders in Canada than any other Canadian Company.

OTTAWA GOVERNMENT BUILDINGS' FIRE PROTECTION.

Fire Chief Graham, of Ottawa, has prepared a lengthy report on the fire protection appliances in the Government Buildings. His chief recommendations are as follows:— "That all rooms and corridors throughout the different buildings should be kept free from all rubbish, and regularly inspected; the placing of more chemical extinguishers in the different buildings and the regular inspection of the same as to their working order; that all employees be instructed as to their use and how to use them; that all hose be connected to the various hydrants and the valves regularly inspected to see that they are in proper working order; that all loose reels that are kept outside of the buildings be discarded as the hose has become of no use on account of being exposed to the weather; that all the twin connections that are placed around the outside of the main building be changed at once

from 2 1/4 inch outlet to 2 3/8 inch to suit the city fire department hose; that the fire pails be regularly inspected and kept filled with water; that there should be more hydrants placed throughout the grounds surrounding the parliament buildings, and they should be regularly inspected both winter and summer so as to be ready for immediate use.

"All corridors over 100 feet in length should be protected by self-closing fire shutters. This precaution will minimize the rapid spread of fire horizontally. The pumps throughout the different buildings are not manned constantly. These pumps should have competent men in charge day and night throughout the year. All buildings owned or rented by the Government should be connected to the city fire alarm system and the alarm boxes placed inside the building close to the watchman, and orders should be given that on the first sign of fire the alarm be given at once. A standing order should be given to the different officers of the city fire department for admittance to the various buildings at all times in case of fire."
