Table listing names and amounts for Northampton and Canterbury Circuits, including Jos. Hemphill, William Monteith, Samuel Cluff, etc.

CASH RECEIPTS.

Table listing names and amounts for cash receipts, including Salisbury, Hopewell, St. James, Rev. Thomas Hicks, etc.

THE HOUSE GARDEN AND FARM.

The wild berry crop of New Hampshire is estimated to be worth, in an average season, about \$100,000, which is pretty much clear gain, as it is mainly gathered by fingers that would otherwise be idle.

James R. Dodge, in his investigation of sheep husbandry in the South, reports more than 600,000 killed by dogs last year, or more than five per cent. of the entire number in that section.

Salt is recommended for hens who pull out and eat their own feathers. Give twice a week, a little salt pork chopped fine and mixed with the food, or put a table-spoonful of salt in two quarts of water, and feed once or twice a week.

A compost heap is the proper place for all decomposable waste material. It should be situated in an 'out-of-the-way' place, but near at hand, so that all weeds, waste and decomposable litter of all sorts may be carted upon it quickly and easily.

Much of the success of many in butter-making depends upon the thoroughness with which they clean their milk cans, pails, pans, etc., in fact, all the utensils that are in any way connected with the milk and cream. Some persons cannot make good butter, because they are careless in all the operations.

Rosewood is now preferred to the ebonyized wood for parlor furniture, but for the reason of its expensiveness is rather sparingly used. The amaranth, which equals the rosewood in price and beauty, appears to be growing in favor. Mahogany is in the ascendancy for dining-room and bedroom furniture.

A recent outbreak of typhoid fever in Bristol, Eng., was traced to the milk supply. The medical officer found that one farmer washed his cans in a stream which two miles above, was unknown to him, polluted by sewage and the putrid carcases of animals recently dead of contagious diseases.

The 'British Medical Journal' says that garlic has always had a great reputation among anti-hydrophobia remedies, and is found as a principal ingredient in a large number of formulae long kept secret. A young man bitten by a mad dog was seized upon some bundles of dried garlic, ate greedily of it, fell into a deep sleep, and awoke calm and cured.

During dry weather drains can be dug at much less expense than when the soil is full of water. In making a drain it must be remembered that its value largely depends upon the thoroughness with which the work is done. A drain to be a paying investment must be a permanent improvement. It is better to make a single drain that will last than a larger number, with the same money, that are imperfect, and will be constant sources of trouble.

Ivy may be grown in any part of the room. The pot may be placed on the floor, and the plants so trained as to festoon a window or an arch doorway or to wreath a picture-frame or mirror. They require to be watered often, yet the water must not be allowed to stand about the roots. There are varieties with golden and silver variegated leaves; others, with lobed, or palmate, or heart-shaped leaves. All are pretty, grow rapidly, and endure the heat of our sitting-rooms, with their dust and extremes of temperature and want of light, in a most astonishing manner.

SUMMER TREATMENT OF CALLAS.—Our readers, in the care of their callas, may wish with confidence to adopt the practice so well described below by 'Ficus Elastica,' and they will be rewarded with as fine plants as they can wish:

"Almost the first question one asks a florist is: How do you care for your callas in summer? The answer is: Plant them out in the garden and cultivate the same as potatoes, being sure to put them in a sunny situation and keep free from weeds. In the fall, about Sept. 15th, take up and pot them in a good rich soil, containing one-fifth sand. Care should be taken not to have too large a pot. One you can conveniently put the roots in, and no larger. Many persons will place their callas in a common wooden pail, and then wonder it don't bloom. It must get pot-bound and remain so, if you wish it to bloom. Plenty of sand in the earth is for drainage, as the plant needs a great deal of water, and it must pass through the earth. If it should remain in the pot, the soil would sour and the plant stop growing, and perhaps die. After taking out of the ground and potting, place in some shady position for eight or ten days and water sparingly. About the 10th or 15th of November begin watering with warm water. Commence with water milk-warm and increase the heat gradually each day until the water is hot, but not scalding. Pour the hot water upon the earth, and not on the stalk of the plant. Don't be sparing of water at any time, except for a few days after potting. This will make it bloom about the holidays. A south exposure is best, as it delights in the warm sunshine, it being a native of Africa, along the River Nile. Toward spring it, as soon as it begins to turn yellow. Then, as leaves will be warm enough, plant out in the garden. In potting, do not let the earth come to the top of the pot by an inch. As often as convenient during the winter, sprinkle the leaves with warm water to prevent red spiders, and wash off the dust. We saw a calla, treated as above, last winter, that had seven blossoms on at one time, and twenty during the winter."

WOODSTOCK, N. B., Dec 14, 1864. Although prejudiced against Patent Medicines, I have been induced from observing the beneficial effects of Graham's Pain Eradicator, to adopt it in my practice. I have examined its chemical properties and find it to be the safest and most reliable Liniment in use, a superior remedy for various complaints when used as directed, and well calculated to relieve a great amount of human suffering. S. G. WOODWARD, Practising Physician and Surgeon.

PURE SPICES BROWN & WEBB (LATE AVERY, BROWN & Co.) WHOLESALE

DRUGGISTS, AND SPICE MERCHANTS HALIFAX. Invite the attention of readers of the WESLEYAN to the UNRIVALLED EXCELLENCE of the Spices ground and sold by them. For more than Twenty-Five years our House has made Pure Spices A Specialty. Having been Pioneers in introducing and advocating their use in place of the MISERABLE TRASH very commonly sold in these Provinces as Ground Spices. We were the FIRST, and for many years the ONLY packers of really Genuine Ground Spices in Halifax, and with little or no advertising Avery, Brown & Co's Unadulterated Ground Spices have come to be recognized in most parts of Nova Scotia as THE BEST.

The result has been the gradual creation of a demand for better Spices, and other packers and dealers have been forced to meet this growing improvement in popular taste by furnishing better goods than formerly. Still, while most grinders profess to supply Pure Spice, they also offer several inferior grades, thus admitting that they practice adulteration. The recent reports of the analysis of Spices and Foods, by the Inspectors appointed by the Dominion Government, have thrown fresh light upon the enormous extent of the adulteration practiced upon spices. Reference to these reports will show that

BROWN & WEBB'S SPICES have invariably stood the test, and been reported Absolutely Pure Spice. The only excuse for the adulteration of Spices is that the price is thus reduced; but this really only benefits the dealer at the expense of the consumer. In reality as the value of Spice depends only on its Strength and Flavor

The Best is always the Cheapest. Our sale of Pure Spices has increased to a very gratifying extent, and as we purchase the whole Spices in large quantities in the best markets of the world, we are enabled to offer our Genuine Spices at little, if anything, higher prices than are demanded for inferior goods of other brands. Be it understood, however, that we will never sacrifice the QUALITY of our goods to the rage for CHEAPNESS, but will always maintain the standard of purity which has given our brand of Ground Spice the preference wherever it is known.

BROWN & WEBB'S SPICES

Our Spices are ground by Steam Power, on our own premises, packed in tinfoil packets of 2 ounce and quarter pound, FULL WEIGHT, and labeled with OUR NAME. They may be had of all the leading retail grocers throughout the Maritime Provinces. We request the favor of a TRIAL of them by any who have not already used them, convinced that their own merits will secure their continuous use.

- Ground Allspice, Ground Cinnamon, Ground Cloves, Ground Ginger, Ground Pepper, Mixed Spices.

CONSUMPTION CAN BE CURED IS A FACT ATTESTED BY THE HIGHEST MEDICAL AUTHORITIES IN THE WORLD.

A careful observance of the laws of health, and the systematic and persistent use of SCOTT'S EMULSION OF COD LIVER OIL with HYPOPHOSPHITES OF LIME AND SODA will accomplish this result. This preparation has all the virtues of these two most valuable specifics, in a form perfectly palatable, and acceptable to the most delicate stomach, and we make the unqualified statement that SCOTT'S EMULSION is being used with better results, and endorsed and prescribed by more physicians for Consumption—and the diseases leading to it, Chronic Coughs, Bronchitis, Scrophula, Anemia, General Debility and the Wasting Disorders of children, than any other remedy known to medical science. The rapidity with which patients improve on this food medicine diet, is truly marvellous.

SEE WHAT PHYSICIANS AND THE PEOPLE SAY ABOUT IT. Messrs. Scott & Downe: 66 West Thirty-sixth street, New York, Sept. 2, 1876.

GENTS—I have frequently prescribed SCOTT'S EMULSION OF COD LIVER OIL with HYPOPHOSPHITES during the past year, and regard it as a valuable preparation in scrofulous and consumptive cases, palatable and efficacious. C. C. LOCKWOOD, M.D.

MESSES. SCOTT & BOWNE—Gentlemen—Within the last year I have used in my own family, and in my private practice prescribed very extensively SCOTT'S EMULSION OF COD LIVER OIL with HYPOPHOSPHITES and found it a most valuable preparation, especially in diseases of children. It is agreeable to the most delicate stomach; which renders it a very reliable agent as a nutritive remedy in consumptive and scrofulous cases. Yours respectfully, A. H. SEXTON, M.D. Baltimore, October 12, 1879.

MESSES. SCOTT & BOWNE—Gentlemen—Within the last two months I have fairly tried SCOTT'S EMULSION OF COD LIVER OIL with HYPOPHOSPHITES, and I candidly declare that it is the finest preparation of the kind that has ever been brought to my notice; in affections of the lungs and other wasting diseases, we consider it our most reliable agent, in a perfectly elegant and agreeable form. December 10th, 1878. Very truly Yrs. SIMONAUD, M.D. New Orleans, La.

MESSES. SCOTT & BOWNE—Gentlemen—In September 1877, my health began to fail and my physician pronounced spinal trouble; under his care I got some relief from pain, but my general health did not improve, and early in the winter, I began to raise blood and rapidly grow worse. In May last I was taken with a violent bleeding which brought me to my bed and my life was despaired of for many weeks; violent symptoms appeared, night and morning coughs, night sweats, short breath, and a return of the spinal trouble. My physician stopped the bleeding and then ordered Cod Liver Oil and Lime; and I used various preparations, but they did me no good. I lost all hope of life, and was an object of pity to all my friends. Last September I purchased a bottle of your Emulsion, before it was all taken I was better. I then bought a dozen bottles and have taken all with the following results: Cough subsiding, night sweats stopped, appetite returned, pains in spine disappeared, strength returning, and my weight increased from 118 to 140 pounds in sixteen weeks. I have taken no other medicine since commencing with your EMULSION and shall continue its use until I am perfectly well. I frequently meet some friend on the street who asks, what cured you and I answer SCOTT'S EMULSION OF COD LIVER OIL, &c. I have a friend who has not spoken aloud for 15 months and he is getting better. I gave him a bottle, and he bought two more, then got a dozen and says that it is food and medicine for him. He was given up to die a year ago; but he is improving wonderfully. My recovery is exciting the surprise of many people, and I shall do all I can to make known your valuable medicine. Very truly yours, H. F. LOCUM, Lowell, Mass.

About the 25th of last April I got a bottle of your EMULSION, and at that time I was so prostrated that no one who saw me thought I could live but a few days at most. I could retain nothing on my stomach and was literary starving. I commenced the use of the EMULSION in small doses; it was the first thing that would stay on my stomach; I continued its use, gradually increasing the dose; and from that hour I commenced mending, and now am able to ride and walk and am gaining flesh and strength rapidly. I have advised other parties to try it, and some two or three have already tried it. I am sure I shall entirely recover. I am yours R. W. HAMILTON, M.D. For Sale by all Druggists at \$1 per bottle.
