The celebrated author, in this admirable Essay clearly demonstrates, from thirty years' successful practice, that alarming consequences may be radically cured with, out the dangerous use of internal medicine or the use of the knife; pointing out a mode of cure at once simple, certain and effectual, by means of which every sufferer, no matter what-his condition may be, may cure himself cheaply, privately and raducally. This Lecture should be in the hands of every youth and every man in the land.
