WEEKLY REVIEW OF TOBONTO

WHOLESALE MARKETS.

PRODUCE.

THURSDAY, July 17. There has been very little of any sort of our and grain offered during the week, but little has been sufficient for the demand ich has continued to be very slack, alough some few signs of an improvement ave been visible. Holders, however, ave been steady and have manifested an innation to push sales of anything. It is true hat they cannot hold very much to push on he market ; but local stocks have shown no of diminution and stood on Monday as ows :-- Flour 2,200 bris ; fall wheat 63,-717 bushels ; spring wheat 79,176 ; oats 7,451; ley 2,250 ; peas 1,213 and rye 547 bushels gainst the corresponding date last year, lour 2.615; fall wheat 85,541; spring wheat, thour 2,615; fall wheat 85,541; spring wheat, 55,054; oats 1,000; barley, 29,916; peas 2,419 and rye 341 bushels. Orop reports con-tinue generally favorable; a sample of fall wheat of very fine quality and weighing from 52 to 63 lbs., resped in Thoroid last week, was shown on 'Change on Monday. Harvest is generally expected to be in full operation next week. Outside markets generally firm. Eng-lish quotations show a rise of 1 % on all sorts of wheat but a fall of a half-penny on corn tast week, when markets were dull; but for the last three days seem to have been improving. English supplies for last week were very large indeed. Home deliveries seem to have eed. Home deliveries seem to have 17 quarters; and 335,000 to 340,000 of wheat, and 225,000 to 230,000 creeks of flour, being equal to a total supply of 8,000 to 539,000 quarters of wheat, against 0,000 consumption. The quantity of wheat d flour in transit on the 10th inst. was 1.850,000 quarters, against 2,117,000 quarters on the 3rd inst., and 1,835,000 quarters last the 3rd inst., and 1,835,000 quarters last ar. Mail reports of stocks on the 1st inst. low, as had been expected, a large decrease the quantities of wheat and flour in store, consequence of the short supplies for some onthe past. Stocks of wheat and flour at in leading ports were, on that data, equal to 97,000 quarters of wheat against 3,465,000 a January 1, and 2,856,000 on July 1, 1883. We have here a decrease of 43 per cent, nince the beginning of the year, and of about 31 per cent, since this time last year. It thus seems possible that the drag on trade inflicted of late by heavy stocks may The must seems possible that the drag srade inflicted of late by heavy stocks may ue to be full between now and harvest. onlinental solvices to the end of June state there had been no decided change in crop satisfactory, but owing to the antoward that in the early part of June there was lonbt that the result would be less bril-t than had at one time been expected.
