

# Enterprise Gold Mining Company.

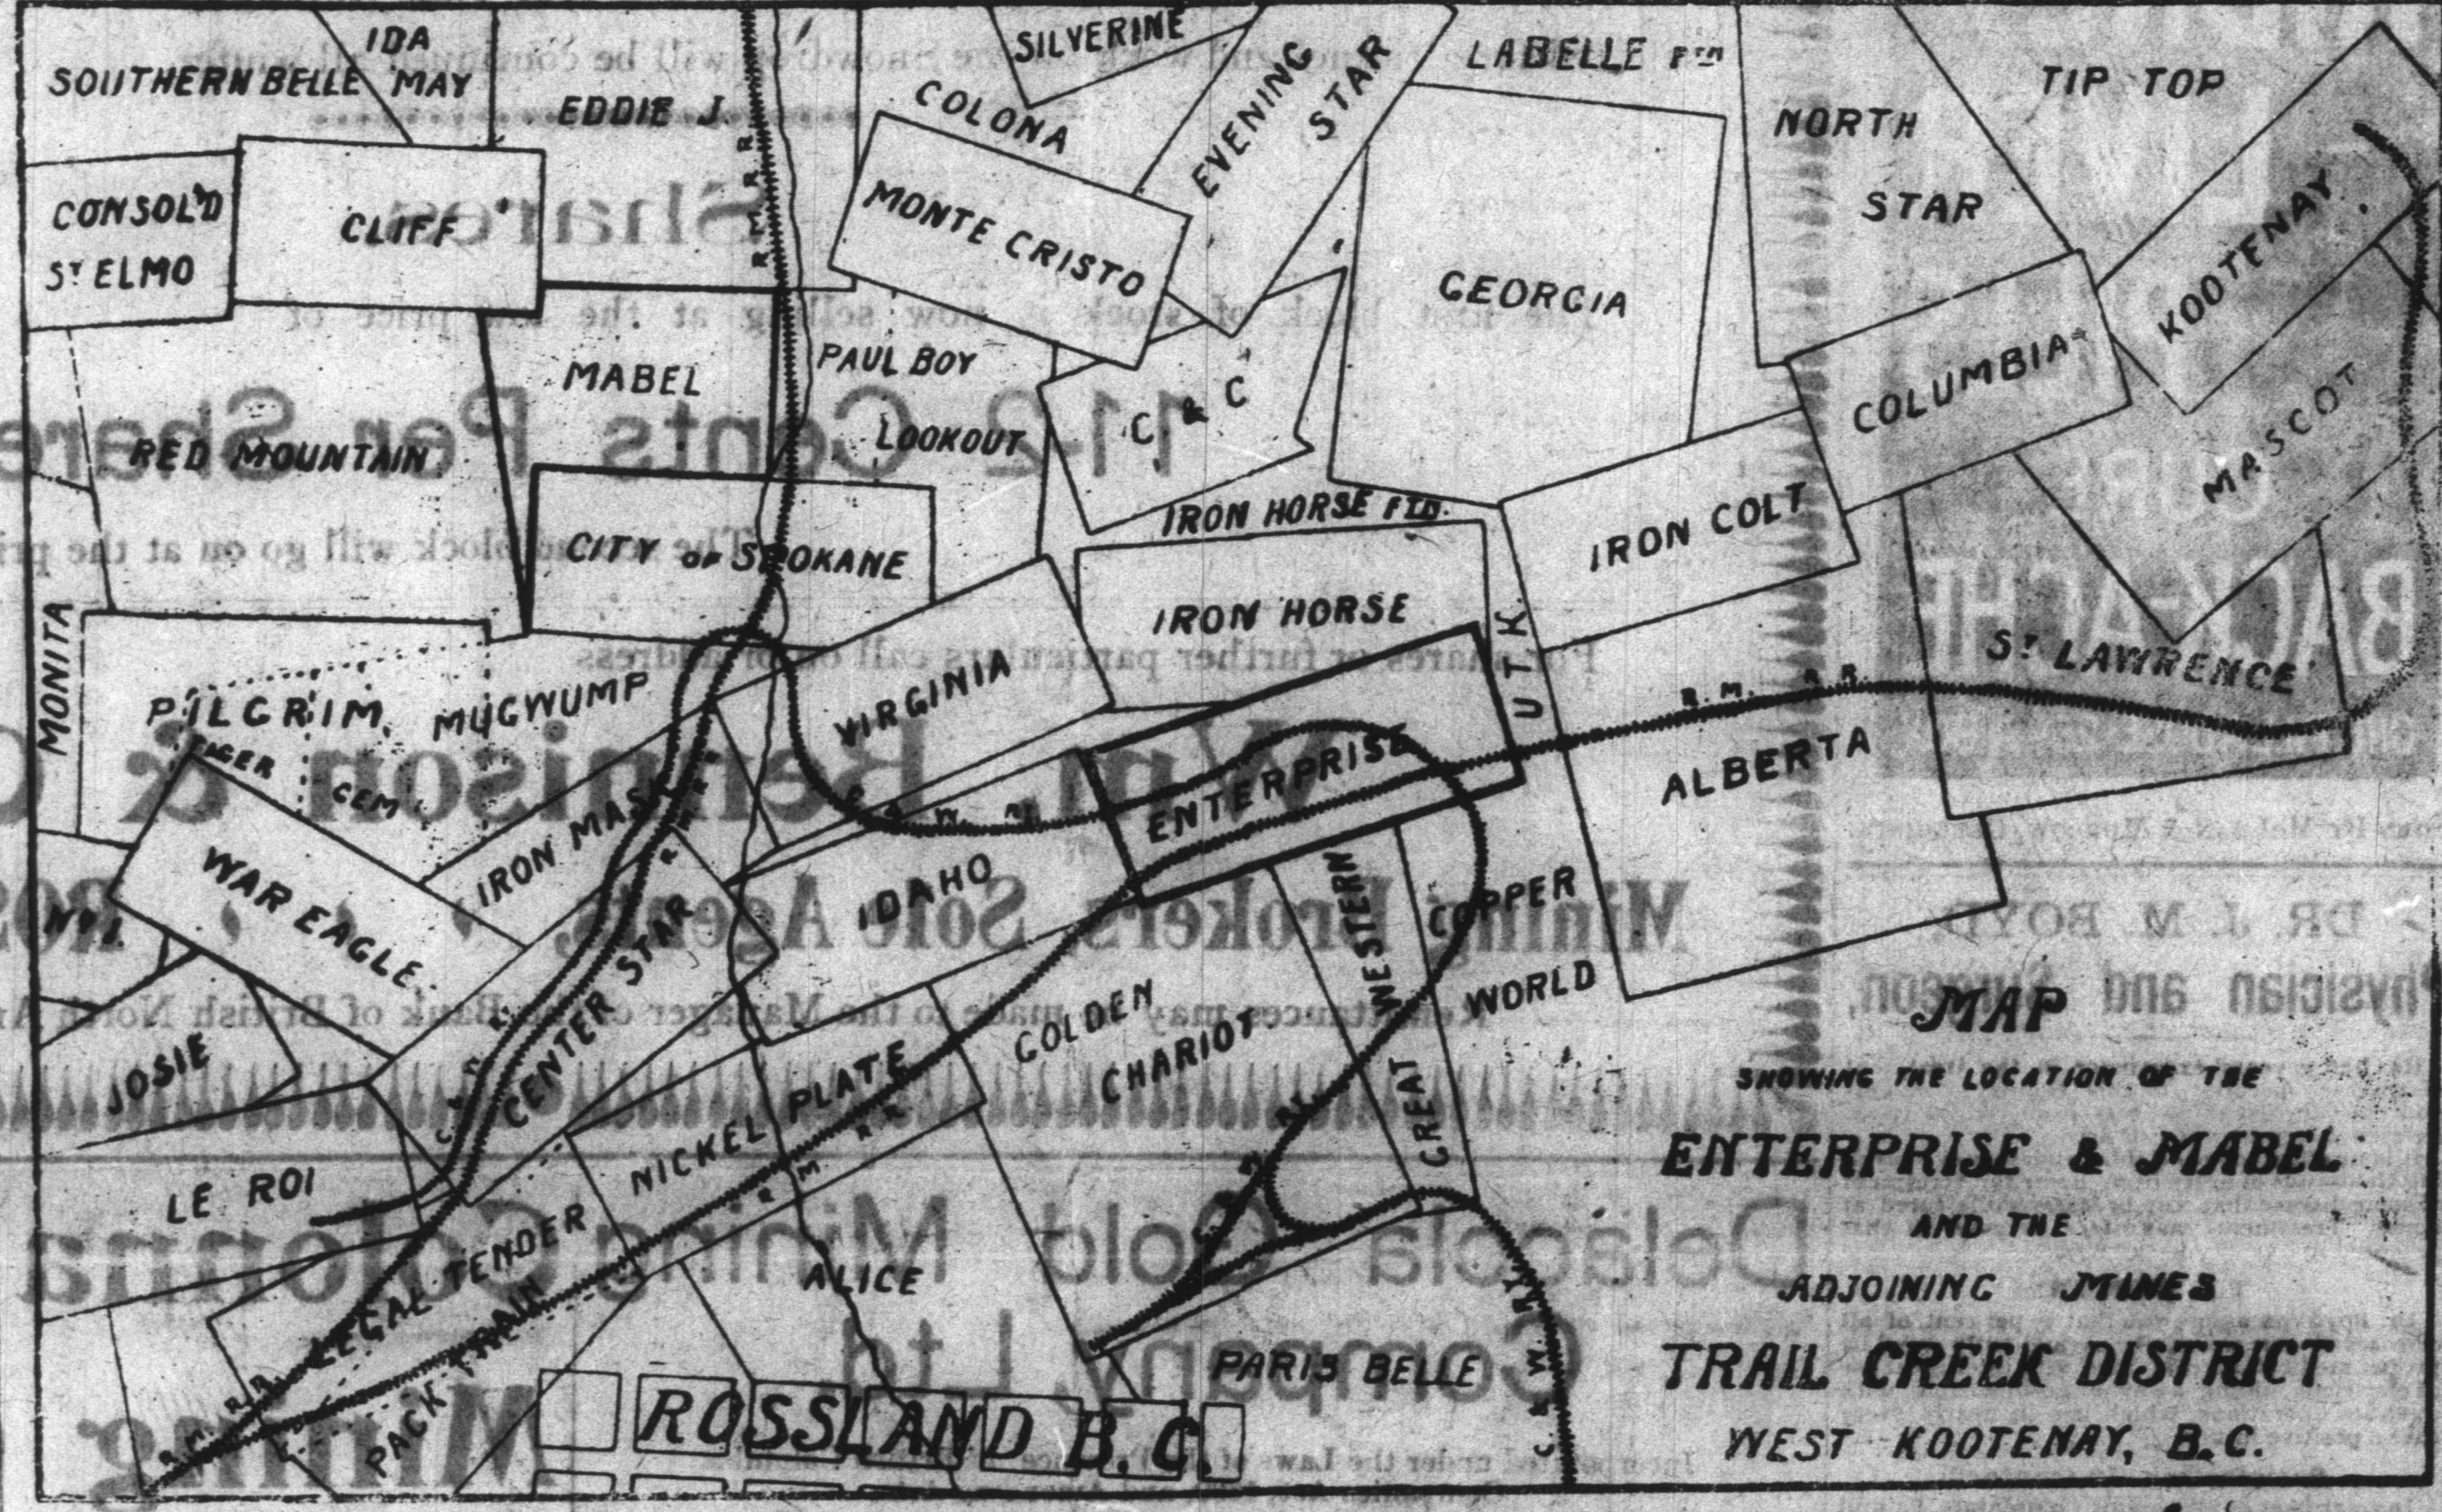

Incorporated Under the Laws of the State of Washington.  
 Capital Stock, 1,000,000 Shares. Par Value \$1.00 Each.  
 Fully Paid and Non-Assessable.  
**TREASURY STOCK, 200,000 SHARES**  
 To be sold only for the Development of the Company's Property.

**OFFICERS:** O. D. Crites, Lima, O., President; D. F. Wetzel, Spokane, Wash., Vice-President; John Finley, Lima, O., Treasurer; O. B. Selfridge, Jr., Lima, O., Secretary; W. A. Ritchie, Spokane, Wash., Manager. No salaried officers.  
**Head Office at Spokane, Wash. Mine at Rossland, B. C.**

**STOCK POOLED.**  
 All stock in the Enterprise company is pooled, (except treasury shares) and is to be held by a trustee, until the mine shall be on a dividend paying basis. This is a strong guarantee on the part of its stockholders that the Enterprise will soon develop into a producing and paying mine.

**LOCATION.**  
 The Enterprise is one of the most favorably located mineral claims in the Trail Creek district. It lies only one-quarter of a mile north from the business centre of the town of Rossland, B. C., on a town granted property and is fully paid for. It contains over 20 acres of ground and is directly in the great mineral zone of the Le Roi, War Eagle, Centre Star, Iron Colt, Columbia and Kootenay mines.

**TRANSPORTATION FACILITIES.**  
 Transportation facilities for the Enterprise are most convenient. Two railways cross the property, thereby giving this company the benefit of competing lines which insure cheap rates for transporting its ores.

**DEVELOPMENT.**  
 The company has placed an order for a compressor plant and intends to push development work to its fullest capacity. It has during the past summer done sufficient surface work to be able to determine the most favorable point for opening up the property.  
 Reference to the accompanying map will give a clear idea of the location of this property and the surrounding and adjacent mines.

**TREASURY SHARES.**  
 Treasury shares are now for the first time placed on sale to secure the funds necessary for equipping the mine with machinery. 25,000 shares are to be sold at 20 cents per share. The next block offered will be at an advanced price. Those who buy these shares will get all the advantage of the raise and can rest assured that no better investment could be made than to hold a block of the stock in the Enterprise Company.

Two Dollars a Year.

### VIEW PLAYS IN LUCK

Another Large and Strong Vein Discovered by the Superintendent.  
**BEEN TRACED 600 FEET**

Series of Open Cuts Show That Solid Copper Pyrites Comes to the Surface—Tunnel Started to Tap the Vein at Good Depth.

One of the strongest and best looking ledges in the camp has been found on the View. Superintendent Haskins, several days since began to carefully prospect the ground of the View as he believed other ledges existed upon it. He reported last Thursday that he had traced the new ledge for a distance of between 600 and 700 feet up the side of the mountain. The course of the ledge is almost from west to east. It runs from the View into the Peak, the claim covering the very summit of Red Mountain.

Several crosscuts have been made in the ledge and it is found to be from 10 to 18 feet wide with seams of solid copper pyrites from six to 18 inches in width. The ore has the appearance of being first class. Mr. Haskins has already started a tunnel to develop the new vein. This tunnel begins near the east line of the claim. A good depth will be secured as the mountain side is rather steep at this place.  
 The ore so far obtained in the View carries a high copper percentage and is very attractive for smelting purposes. A considerable amount of ore has already been taken out and is ready for shipment.

### LEE AND MAID.

Reorganization of the Company Completed—A Compressor Ordered.  
 The reorganization of the R. E. Lee and Maid of Erin. This mine has already had an account of the purchase of these properties by a syndicate headed by D. N. Linnard. The company Mr. Linnard has organized to take over the Lee and Maid is known as the R. E. Lee and Maid Mining Company, limited, and the officers and directors are as follows: The Hon. James Ward Spinks, of Yarrow, B.C., president; S. T. McKinnon, of Toronto, vice-president; D. M. Linnard, secretary-treasurer; W. A. Johnson, London, Eng., W. T. Stuart, M.D., Toronto, G. H. Hamilton, Rossland, and W. H. Wallbridge, Toronto, and the officers named are the directors.  
 A seven drill compressor has already been ordered and will be ready for service by December 1. Both the Lee and Maid are to be worked with drills supplied with air from this plant. W. S. Haskins is to be superintendent and has already been over the ground carefully and has put a force of men to work cleaning up and making preparations for the compressor.  
 It is understood the Toronto members of the company took 300,000 shares of the capital stock. They are therefore substantially interested.  
 The Lee and Maid are among the best and most favorably known mining properties in the camp. There is not only a large showing on each, but the ore has always given good assays, even from the surface. Superintendent Haskins told a representative of THE MINER he was greatly pleased with his examination of the Lee and Maid. The showing was far beyond his expectations. No other of these properties have fallen into strong hands we may expect to hear good reports from them.

Specimens of ore, prospectus and shares of stock can be obtained at our offices at Spokane, Wash., Rossland, B. C., or 36 King St. E., Toronto, Ont.  
**C. F. CLOUGH & CO., Incorporated, Selling Agents.**

# The Mabel Gold Mining Company.

Capital 1,000,000 Fully Paid and Non-Assessable Shares. Par Value \$1.00 Each.

**OFFICERS.**  
**N. E. MATHEWS, President.**  
**W. A. RITCHIE, Vice-President and Manager.**  
**AMOS YOUNG, Treasurer.**  
**C. D. CRITES, Secretary.**

**TREASURY STOCK.**  
 The Mabel company has 250,000 shares of its capital stock in its treasury for development purposes. All other shares are pooled by an iron clad contract until the mine shall become a dividend payer, which by the way may occur at an early date. The rich strike made in this property early in the present month of \$40 ore is a good indication that in two or three months at the farthest the Mabel company will be shipping ore. This mine being a tunnel proposition, will not have to wait for an equipment of expensive machinery.

**MANAGEMENT.**  
 The company has no salaried officers. Its management is in very strong people, and like that of the Enterprise company is controlled by bankers, manufacturers and merchants, several of whom reside in Ohio and are commonly termed the Ohio Syndicate.

**TRANSPORTATION FACILITIES.**  
 The Mabel company has done a large amount of development work. Its mine is favorably located for handling its product, the Red Mountain railway line running within a few feet of the east line of the property, while the Columbia & Western passes only 500 feet to the south, making the transportation problem easy of solution.

**LOCATION.**  
 Reference to the above map will convince you that the Mabel is desirably located and has good properties all around it.

**SHARES!**  
 25,000 shares only of Treasury Stock are now on sale at 15 cents per share. When they are disposed of you cannot buy any more at a similar price.

**Head Office.**  
**Spokane, Wash.**  
**Mine.**  
**Rossland, B. C.**

Ask to see samples of ore from the Mabel, and for prospectus or shares of stock apply to  
**C. F. CLOUGH & CO., Incorp., Mining Brokers,**  
 Offices in Spokane, Wash., Rossland, B. C., and 36 King St. E., Toronto, Ontario.

### JOSIE'S BIG ORE CHUTE.

The Main Tunnel Will Soon Cut It at a Depth of 130 Feet.  
 The main tunnel of the Josie is now within 30 feet of the big ore chute opened in the east tunnel and 130 feet lower. It is being rapidly driven and will no doubt cut the big ore chutes soon. When this is done the Josie will have a large deal of valuable ore in sight.  
 The ore continues in the drift being run on the vein from the shaft at the west end of the main tunnel. The width of the ore body varies from two and a half to five feet. The grade is high. The Josie is in a position to take out a great deal of ore, but George Crane, the manager of the company, who is now in camp, says no ore will be taken out except what is necessarily removed in development work, until the completion of the Columbia & Red Mountain railroad.

### SALMON RIVER.

Camp is Settling Down For the Winter—Good Hope Hard at Work.  
 Wilson McKinnon and James A. Jones have returned to Rossland from a prospecting trip through the Salmon River country. Jones had been in the district since June and knew the lay of the land so well that despite the fact that snow had begun to fall, they located two claims within a couple of miles of the Spokane Belle, Mr. Corbin's property. There has been a great deal of prospecting done from the base to the summit of the mountains, considering that it is only within the past few months that attention has been directed to the Salmon river.  
 Mr. McKinnon, who brought down some beautiful samples of croppings, reports work progressing favorably on the Good Hope, Mr. Cumming's property.
