Insurance Agent.

One Way to Make a Boy Tidy

BY RUTH CAMERON.

Two mothers were comparing notes in the habits of their respective sons. Said one mother with a sigh: "Oh, I do wish Phillip were as tidy as your boy. I never saw anything neater than your boy's room. And those dainty curtains and that nice rug. I shouldn't any more dare have things like that in Phillip's room. They'd be ruined in no time. Why Phillip—"

For several minutes the other mother listened to a category of Phillip's sins of untidiness—how he tracked mud into his room, put his feet upon the chairs, kept his bureau perpetually littered, his shoes scattered about the room and his clothes draped over the furniture. Finally, at a slight pause, she managed to put in, "Mark used to be just like that."

"Why I thought he was naturally orderly."

"He certainly was not. His room used to be such a sight that I dreaded to go into it. I'd lecture him almost every day, but it didn't do the slightest good."

Well, what on earth did you do then?"

Mark's mother smiled. "You know you just spoke of the dainty curtains and nice rugs in Mark's room," she said. "Well, they are a part of the secret. You thought I put them there because Mark was neat and careful. As a matter of fact, it's more the other way round. He is neat and careful because they are there."

"You see, I went up into my boy's room one morning to clean up after

he had gone to school, and it was in such a state of disorder that I was really discouraged. He ought to live in the barn instead of the house. I said to myself. And then, as I cleaned it, somehow I got to thinking, and I looked around the room and realized it wasn't so unlike a barn either. I had had the girls' room papered twice since his was done because I thought a boy didn't care. And yet, that paper was dirty and faded and altogether hideous. Instead of the pretty hangings like the rest of the house, I had put cheap sash curtains in his room. The carpet was threadbare, the furniture was cheap and old. In fact, I realized that there was really nothing to inspire the boy with a desire to keep the place neat and tidy.

"My husband and I had a conference that night, and the next day I started to make Mark's room as pretty as the girls'. And positively it hurt me to see how pleased he was. You see, I had always been foolish enough to think that boys didn't care. Well, to make a long story short, Mark lives up to his room now just as he lived down to it before. Of course the change didn't come all at once—that was four years ago—but you can see it's pretty complete now."

"Yes, I've certainly learned that the best way to develop responsibility and pride in children is to give them something to be responsible and proud about. It is no more work than fretting and scolding all the time, and is certainly a more pleasant method and one that brings more results."

"I wonder," said Phillip's mother dubiously, "if that would ever work with Phillip?"

"With Phillip's very good way to find out," said the wiser lady briskly.

Ruth Cameron

Why Have "Nerves"?

This is the reason why women have "nerves." When thoughts begin to grow cloudy and uncertain, impulses lag and the warnings of pain and distress are sent like flying messages throughout limbs and frame, straightway, nine times in ten, a woman will lay the cause of the trouble to some defect at the point where she first felt it. Is it a headache, a backache, a sensation of irritability or twitching and uncontrollable nervousness, something must be wrong with the head or back, a woman naturally says, but all the time the real trouble very often centers in the womanly organs. In nine cases out of ten the seat of the difficulty is here, and a woman should take rational treatment for its cure. The local disorder and inflammation of the delicate special organs of the sex should be treated steadily and systematically.

Dr. Pierce, during a long period of practice, found that a prescription made from medicinal extracts of native roots, without the use of alcohol, relieved over 90 per cent. of such cases. After using this remedy for many years in his private practice he put it up in form of Dr. Pierce's Favorite Prescription, that would make it easily procurable, and it can be had at any store where medicines are handled.

Mrs. LILA B. HAWKINS, of Zeus, Va., writes: "I had been failing in health for two years—most of the time was not able to attend to my household duties. Female weakness was my trouble and I was getting very bad but, thanks to Doctor Pierce's medicines, I am well and strong again. I took only three bottles of 'Favorite Prescription,' and used the 'Lotion Tablets.' I have nothing but praise for Doctor Pierce's wonderful medicines."

TAKE DR. PIERCE'S PLEASANT PELLETS FOR LIVER ILLS.

Household Notes.

Potato balls which are sauted in butter after being boiled are delicious. They should be served with a generous sprinkling of minced parsley.

To make Dutch toast take slices of very stale or hard bread and toast the same in the oven until brown. Dip the slices in boiling water and set in the oven again until as crisp as desired. This is excellent, and a good way to utilize hard bread.

When washing new gingham dresses wash also some spare pieces of the material used, and make a practice of giving these pieces a frequent washing. Then, when mending time comes, any patching that has to be done will hardly be noticed.

If you have an old rubber raincoat that is no longer in use, cut the bottom off and make a plain large bag with a draw-string to hold clothes-line and pins. If it should, by mistake, be left out all night, they will not be exposed to the weather.

To save trouble after opening a bottle of glue or cement, rub nutton tal-

low upon a sound cork before inserting it in the bottle. This prevents the cork from sticking fast, only to be broken in small bits when an attempt is made to remove it.

I find it a great help in making thickening for gravies and sauces to mix the flour with water or milk in a deep bowl to the required consistency and then make smooth by beating with a Dover egg-beater. This takes all lumps out quickly and easily. When washing quilts and comforters do not wring them, as is ordinarily done. After washing them rinse in clear water, then hang on the line, allowing the water to drip. When nearly dry beat with a carpet-beater and they will be as light as when new.

Linon closet shelves may be kept clean if a piece of percale or white muslin, as long as the shelf and twice as wide, is laid on the shelf first; then pile up the sheets, pillow slips or towels, and turn back the cover over them. They will thus be kept free from dust.

A cupful of coconut beaten into a pint of cream that has been whipped light and dry and flavored with a little extract of bitter almond makes a delicious filling for layer cakes, or may be served in a cake that has had the inside part taken out and the outside left for a shell.

Pneumonia from a Cold

PNEUMONIA is second only to consumption in the number of deaths which it causes, and like consumption always has its beginning with a cold.

Cold in the head, fever and chills, a cough which gradually becomes dry and more painful in the chest, rapid difficult breathing, feelings of exhaustion and depression—these are symptoms of pneumonia.

You can prevent and cure pneumonia by the use of Dr. Chase's Syrup of Linseed and Turpentine, the greatest of all treatments for the throat and lungs.

The only safe way is to regard every cold as serious. By frequent doses of Dr. Chase's Syrup of Linseed and Turpentine you can quickly break up the cold and guard against dangerous developments. 25 cents a bottle, at all dealers, or Edmondson Bates & Co., Limited, Toronto.

A SPECIAL SALE

DAMAGED Goods,

For Ladies' and Children's Wear, commencing
Friday Afternoon, May 10th,

Consisting of:
Camesoles, Overalls, Aprons, Blouses, Skirts, etc.

Landed in a damaged condition, and sold at Public Auction, and now must be realized regardless of cost.

REMEMBER! FRIDAY AFTERNOON.

"Where Manhood Perished Not."

Where cross the lines of forty north and fifty-four west
There rolls a wild and greedy sea
With death upon its crest.
No stone or wreath from human hands
Will ever mark the spot
Where fifteen hundred men went down,
But Manhood perished not.

Old Ocean takes but little heed
Of human tears or woe.
No shafts adorn the ocean graves.
Nor weeping willows grow.
Nor is there need of marble slab
To keep in mind the spot
Where noble men went down to death
But Manhood perished not!

Those men who looked on death and smiled,
And trod the crumbling deck,
Have saved much more than precious lives.
From out that awful wreck,
Though countless joys and hopes and fears,
Were scattered at a breath.

'Tis something that the name of Man
Did not go down to death.

'Tis not an easy thing to die,
E'en in the open air,
Twelve hundred miles from home and friends,

In a shroud of black despair
A wreath to crown the brow of man,
And hide a former blot
Will ever blossom o'er the waves
When Manhood perished not.
HARVEY F. THEW.

No Indigestion or Sick Stomach

Gas, Heartburn, Dyspepsia and all misery in Stomach vanishes.

Take your sour, out-of-order stomach—maybe you call it indigestion, Dyspepsia, Gastritis or Catarrh of Stomach; it doesn't matter—take your stomach trouble right with you to your Pharmacist and ask him to open a 50-cent case of Pape's Diapepsin and let you eat one 22-grain Triangle and see if within five minutes there is left any trace of your former misery.

The correct name for your trouble is Food Fermentation—food souring; the Digestive organs become weak, there is lack of gastric juice; your food is only half digested, and you become affected with loss of appetite, pressure and fullness after eating, vomiting, nausea, heartburn, griping in bowels, tenderness in the pit of stomach, bad taste in mouth, constipation, pain in limbs, sleeplessness, belching of gas, biliousness, sick headache, nervousness, dizziness or many other similar symptoms.

If your appetite is fickle and nothing tempts you, or you belch gas, or if you feel bloated after eating, or your food lies like a lump of lead on your stomach, you can make up your mind that at the bottom of all this there is but one cause—fermentation of undigested food.

Prove to yourself in five minutes that your stomach is as good as any; that there is nothing really wrong. Stop this fermentation and begin eating what you want without fear of discomfort or misery.

Almost instant relief is waiting for you. It is merely a matter of how soon you take a little Diapepsin.

as much as is shabby and turn a narrow hem. Then get lace as wide as the piece which you have removed and sew it to the hem just made. The lifetime of the petticoat will be doubled and its appearance improved.

When the embroidery ruffle of a petticoat is worn on the edge, cut off

Marconi Manager on Cape Race Station.

Mr. A. E. Roach, manager of the Montreal Marconi Wireless Station, when seen regarding the action that the Newfoundland Government is said to propose taking in regard to the Titanic disaster, stated that, in his opinion, the Newfoundland authorities have forgotten that although the wireless station situated on Cape Race on Newfoundland land, it is the property of the Canadian Government and that they communicated only with the Canadian authorities.

Of course, said Mr. Roach, all the Marconi operators are under oath not to divulge any information from messages received, and that while there were no doubt a number of private messages received by the operator at Cape Race, most of the time was taken up in receiving the names of the survivors. The officials at Cape Race were instructed to give information to the Associated Press of New York and also to communicate with the Newfoundland, as well as the Canadian Government.

The Titanic, said Mr. Roach, was in communication with the Cape Race station, as was the Carpathia and other smaller ships. "However, as far as I can make out, the steamer Virginian, when she was in communication with Cape Race was very probably somewhere between the station and the sinking ship, and as her apparatus is only of medium strength the farther she steamed towards the scene of the disaster, the farther she got out of communication with our station at Cape Race, he added.

SECCOTINE!

FOR STICKING EVERYTHING.

In patent pin-stopper tubes,
Vest Pocket Size, 10 cents.

Large Size Tubes, 20 cents

SECCOTINE is an intensely strong adhesive for joining new or factory surfaces in wood, leather, iron, delf, paper, pasteboard, cloth, glass, ivory, bone, etc., etc.

It is unequalled for office use. Being immensely stronger than gums or pastes, a much smaller quantity is required. It replaces glues and cements in the manufacture of small fancy articles.

The general uses of SECCOTINE are too numerous to mention.

A tube goes a very long way. It requires no heating or other preparation; keeps for years, and is always liquid and ready. It sticks, binds and cements all articles of all materials.
