STEAM USERS

Attending the Exhibitions at Montreal and Toronto desirous  
of investigating how to

SAVE MONEY BY SAVING FUEL,

and at the same time secure

INCREASED CAPACITY OF STEAM POWER.

Are invited to call and see boilers in operation set with the  
JARVIS system of furnace. Among others in Montreal are  
those at Rogers & King's Iron Works, 65 Craig St., (near  
Child's Lane) and by Works, 115 Queen St., and Miller  
& Mitchell, Engineers and Machinists, 110 King St.  
and in Toronto at the extensive establishment of the Metal  
Printing Co. There are now over 1,000 boilers set this way  
in the United States and Canada. It is the same principle as  
the SIEMENS STEEL PROCESS—the waste gases utilized  
with hot air on top of the fire, which is the only way to obtain  
perfect combustion. Waste fuel used without blast also  
overheats, wet peat, wet hops, spent tan and dyewoods, &c.

BURNELL'S

FOUR-POINTED GALVANIZED  
STEEL BARB WIRE FENCING.

There are now before the public a number of Four-  
Pointed Barbs, which to the casual observer, are similar in  
appearance to the Burnell Barb which we are making, but a  
close examination of them will show the difference and their  
inferiority.

The Grand Trunk Railway Company of Canada give it a  
preference over all others, and have contracted with us for  
over one hundred tons of fencing for immediate delivery.

This barb was patented in the United States in 1877, and  
's no infringement on any other patent, and we will defend  
ourselves and consumers against the threats of pretended  
monopolists. We claim superiority for our Barb Wire over  
all others for the following reasons:—

1st.—We use only the best quality of Galvanized, Annealed  
Steel Wire.

2nd.—The two strands of No. 12 Wire are twisted  
together just enough to allow for the contraction and expan-  
sion of the metal, caused by heat and cold, and not so much  
as to injure the structure of the steel.

3rd.—The Barbs on our Wire are four-pointed, thus  
always presenting a barb laterally or at a right angle, which  
is a great advantage over the Two-Barb Wire, as cattle are  
unable to get against the fence to break it or push it down.

4th.—The Barbs are fastened to the Wire at intervals of  
7 inches, in a manner entirely different from any other, being  
securely locked around and between both wires, so that they  
cannot slip or move toward each other, and they also prevent  
the untwisting of the cable should either wire get broke.

5th.—The machinery by which the Barbs are put on is so  
perfect that the Cable Wires are not injured or weakened by  
the process, as is the case with other Four-Pointed Barb  
Wires.

Manufactured by the CANADA WIRE COMPANY,  
Montreal.

THE TORONTO

Medical and Electro-Therapeutic Institution,

Cor. Jarvis & Gerrard  
STREETS.

Opposite Jarvis Street  
BAPTIST CHURCH.

Physicians: JAMES ALLEN, M.D., M.C.P.S.; Mrs. JENNY K. TRONT, M.D., M.C.P.S.; E. AMELIA TERRY, M.D.,  
assisted by educated electricians and nurses. This Institution has been several times enlarged since its opening, 5 years  
ago, and now offers unequalled advantages to the invalid of either sex. The Physicians confine themselves to no  
system of treatment, but use whatever remedy promises the best result. Electricity, their great specialty, has on  
Auricular points, Baths of all kinds, especially known are employed, and medicines given as occasion may require.  
20 The diseases of women are treated by intelligent and experienced physicians. Terms for Board and Treatment, or for Tre-  
atment only, are exceedingly moderate, and the patient will find the Institute pleasant and homelike. Visitors to the  
are cordially invited to call. Those desiring fuller information or references, will please address E. AMELIA TERRY, or  
D. KING, Business Manager, corner Jarvis and Gerrard Streets, Toronto. Carefully observe the address. Other  
irresponsible persons have closely copied our style and title.

TOBACCOS!

New Brands for Smokers

I am now introducing the following NEW BRANDS of Tobacco throughout the whole Dominion. They are man-  
ufactured by an entirely new process, put up in neat packages, and are altogether unlike any brand in the market. I venture  
to say that each of them will be found a "Smoker's Paradise," and win golden opinions from everyone capable of judg-  
ing their undoubted merits over any other Tobacco.

THE "GLADSTONE" Cut Plug, made from the finest called North Carolina Leaf, of medium strength, nice, natural  
flavor, bright color, just the thing for the possibly smokable smoke. Put up in the neatest 1-pound packages in Canada.

THE "BRISTOL" made from finest matured Virginia plug, of a medium strength, naturally fragrant, burns sweet  
and a most pleasant companion.

THE "UNITED" Brand, made from No. 1 Solace, the merit of which is of world-wide reputation. Veteran smokers  
will have an eye to this brand.

THE "ROYAL MIXTURE" a combination of Cut Plug and Honey Dew, making an aromatic perfume particularly  
refreshing. Smokers with a taste for mixtures will like this and use no other. It does not burn the tongue like some mixtures.

THE "SPECIAL" No. 1, Bright Navy Plug, 3 to a pound, put up in tin canisters—every plug bearing a shield with  
initials, A. D. P., to ensure its genuineness. It is a magnificent article, of rather full strength, beautiful natural aroma,  
smokes easy, without heating the mouth, burns to white ash, and is in every sense suited to those who can appreciate an  
extra good tobacco.

THESE BRANDS A TRIAL—YOU WILL SURELY LIKE THEM AND USE THEM

A. D. Porcheron,  
Manufacturer, Canada Tobacco Works, Montreal.

McCOLL BROS. & Co.

TORONTO,

Were awarded the FIRST PRIZE for their LARDINE and other

MACHINE OILS

At the great Industrial Fair, Toronto, 1890, and

Four First Prizes and Gold Medal

At the Provincial Exhibition, Hamilton, 1880.

Their Lardine Machine Oil was used, by authority of the Association, on all the machinery at both Fairs during  
the four weeks, and proved a very superior oil.

Encourage Home Industries!

Look out for Electrottype Cut, to appear  
in this space, of

NORTHEY'S STEAM PUMP.

FIRST PRIZE at Toronto Industrial Exhibition and Provincial Fair,  
Hamilton, 1880.
