

THE RESULT AS INFLUENCED BY THE TIME OF INJECTION.

In table I. are given the results obtained in these three different groups of cases, classified according to the day on which they received the first injection of serum antitoxin.

TABLE I.—DAY OF INJECTION AND RESULT.

	INJECTED ON 1ST DAY, ON 2ND DAY, ON 3RD DAY, ON 4TH DAY, ON 5TH DAY.				DAY OF INJECTION UNKNOWN.				TOTALS.												
	Cases.	Deaths.	Mortality per cent.		Cases.	Deaths.	Mortality per cent.		Cases.	Deaths.	Mortality per cent.										
The Committee's Report.	764	38	4.9	1055	80	8.3	620	79	12.7	336	77	22.9	390	152	38.9	215	15	7.0	3384	450	13.0
New York Health Board.	126	11	8.7	215	26	12.0	228	37	16.6	153	32	20.9	203	50	29.0	17	4	23.5	942	169	17.8
Chicago Health Board.	106	0	0	336	5	1.5	630	18	2.7	269	38	14.1	97	33	34.0	0	0	0	1408	94	6.4
Totals.	996	49	4.9	1616	120	7.4	1508	134	8.8	758	147	20.7	690	244	35.3	232	10	8.2	5794	713	12.3

The grand total gives 5,794 cases with 713 deaths, or a mortality of 12.3 per cent., including every case returned ; but the reports show that 218 cases were moribund at the time of injection or died within
