NEW-YORK TRIBUNE.

1873.

Now, as heretofore The Thinder strives to be first of all and preeminently a news paper.

France a Republic-England and Germany gradually pe meets with Republican ideas—Spain swaying in the nereliest with Republican ideas—Spain swaying in the nereliest great of a rule; too good for a King and too weak for a kepublican, who is unable to govern the great sistend that blocks the entrance to our Gulf of Mexico, and equally unable to give it in —the German-speaking peoples agliated by a new Protestantism, separating from the See of Roine on the digma of Papai Infallisability and assuming to recognize the "Old Catholies"—he whole Continent pervaded by the intellectual ferment that cones of the onflict between old ideas, philosophical, theological, material, and the advance of physical Science—Russia and Great Britain running a race for the anal gains that shall determine Asiatic co-premacy—China scenning ready to abandon her advances and reclose her half opened gates—Japan abolishing foundaism end inviting Western crivilization to irradiate Western comiserce to enrich her long-hidden empire—such are phases of the news from abroad which the mails over all Continents and the wires under all Seas are daily bearing to us. With able and trusted correspondents in the leading capitals, and wherever great changes are in progress, This Transuss aims, at whatever cost, to lay before its readers the mest prompt, complete, and popular presentment of these diverse and conflicting masses are everywhere struggling up toward larger recognition and a brighter future

At home the struggle for freedom seems over. The last slave has long been a citize, the last opposition to emancipation, enfranchisement, equal civil rights, his formally been abandoned. No navry, North or South of South and the prolonged civil contests that followed, have led us, the Republic closes the records of the bitter, hateful Past, and turny peacefully, hopefully, to the less alarming because less vital problems of the Finure. To whatever mit the propers of the

an honest statement of the facts; and this they always get.

THE WERKLY TRIBUNE, now more than thirty years old, has endeavored to keep up with the progress of the 2ge in improvement and enterprise. It devoices along share of its columns to Agriculture as the most essential and general of unan pursuits. It employs the ablect and most successful cultivators to set forth in brief, clean essays their practical views of the Farmer's work it reports public discussions which elucidate that work, rathers from every source agricultural news, the reports of the latest experiments, the stollers of the latest successes and failures, and whatever may fend at once to better Agri ulture, and to commend it as the first and most important of progressive Art, based on matura selecter.

cesses and latters, and to commend it as the first and most important of progressive Art, based on natura selence.

The Wypker Tribork appeals also to Teachers Students, and persons of inquiring minds, by the character of its literary contents, which include reviews of all the works proceeding from the master minds of the eld of other New World, with liberal extracts from those of cycleial interest. Imagnetive Literature also claim attention, but in a subordinate degree. "Home Interests" and discreed weekly by a lady specially quellified to instruct and interect for own sex, and the younger portion of the older. No column is more eagerly sought or persued with greater average profit than hers. The News of the Day, cluridated by brief comments, is so condensed that no reader can deem it dilitate, while given sufficiently in de all to satisfy the wants of the average reader. Selections are regularly made from the extensive convespondence of The Dally Tutnose from every country, and its elliotists of more permanent value are here repurduced. In short, The Werkly Tribone commends itself to Millions, by ministering to the rest in tellectual wants more fully than they are met by any other for mill, while its regular reports of the Catille, Country Produce, and other M kets, will, of themselves, save the farmer who in gularly notes them far more than his journal's price.

For the family circle of the chicated farmer or artisting. The Werkly Thionex has no superior, as is proved by the hundred of thousands who having and it from childhood, still cheirsh and enjoy if in the prime and on the down hill of life. We resee an it urge those who hardy juy it is commend Tar. Werkly Thionex who had price which barely juy it cost of paper and press-work.
