

Malaya and accepted. With the enthusiastic cooperation of the Deans of medical schools across Canada, a team of well-qualified Canadian doctors was recruited.

The main function of the Canadian team will be to help train Malayan doctors in modern medical skills and techniques. The Canadian doctors will conduct in-service training and seminars at the State Hospital in Penang and also at outlying hospitals where suitable arrangements can be made. While Canada has undertaken to maintain the team as a whole for a period of five years, it is expected that individual members will be replaced from time to time by other Canadian doctors.
