

We take pleasure in recording our opinion in favor of its general introduction into both public and private schools. We congratulate Mr. Lovell on the success which has attended his school books, and trust that he will go on as he has begun, so that in a short time Canada may have a series of school books equal to any country in the world,—books edited and printed in Canada, which, without seeking to push our country into undue prominence, will accord to it what few text-books do, its due and proper position.—*Essex Record, Windsor.*

This work has evidently been prepared with very great care to adapt it to the capacities of the junior classes in schools, and to awaken in the minds of small children a desire to become acquainted with the subject.—*Clinton Courier.*

We cannot too strongly recommend it to general notice as an excellent school book.—*Merrickville Chronicle.*

We have examined the work thoroughly, and are of opinion that, within the same space, a larger amount of information on all questions appertaining to a study of the earth's surface, and its physical and political divisions, could not be embodied.—*British Standard, Perth.*

One of the simplest and best arranged little works of the kind we have ever met with. The youthful student of geography is led on by such easy and interesting stages, that it cannot fail to become a necessary book, with the younger classes more especially. We trust all our friends will provide their little ones with a copy of this work.—*Waterloo Advertiser.*

We have no hesitation in recommending it to our readers. The work is got out in a very attractive form, and the engravings have evidently been prepared with much care.—*Huron Signal, Goderich.*

The contents of this book are simple and comprehensive, which are indispensable in a work of this kind, intended as it is for beginners in the study of Geography. The sketches in the little work before us are admirable, combining much ingenuity and taste with the use of easy and familiar language in the treatment of such subjects as the Earth and its appearance, Time, the Mariner's Compass, &c. The trips are designed to connect in the mind of the pupil the objects and associations of travel with a geographical knowledge of the more important physical features of the principal countries in the world. Mr. Lovell is a publisher of note in Montreal, and his energy and perseverance is worthy of the warmest commendation, and his efforts to place good and reliable school books before the public are deserving of encouragement by the people of all the Provinces. These "Easy Lessons," are well adapted to accomplish the object aimed at, namely, to present in a pleasing and simple form the general outlines of the study of geography, so as to instruct and interest without confusing the youthful mind. Simplicity and comprehensiveness are the distinguishing characteristics of the book, and we have no doubt that it will prove highly useful in our common schools throughout the city and country. This work was evidently prepared with much care to adapt it to the capacities of the junior classes in schools, and to awaken in the minds of small children a desire to become acquainted with the subject. For this purpose the subject is divided off into conversations or reading lessons, each of which is followed by an explanation, testing the scholar upon the matter he has just read, a method of proceeding which certainly seems calculated to forward the pupil very materially with his studies, and to inculcate the good habit of attentiveness to the reading lesson. In it religion is discreetly respected, and loyalty taught as one of its lessons. There is one excellent feature about this little geography, it is emphatically a British American book, and commences at home as it should do, and not on the old principle of learning the youth everything about foreign nations, while they are kept in ignorance of the country in which they live. It is a work of 80 pages, and is got up in a neat and compact style.—*Morning Chronicle, Halifax, N. S.*

It seems to us admirably suited to the capacity of young children. We prefer Lovell's Geography to any American publications of the same kind that have come under our notice.—*Presbyterian Witness, Halifax, N. S.*

We are happy to introduce to the notice of our readers "Easy Lessons in General Geography." We should be happy to see Lovell's series of school books introduced into general use in the schools of our Province.—*Provincial Wesleyan, Halifax, N. S.*

LOVELL'S SERIES OF SCHOOL BOOKS.—The spirit of enlightened enterprise deserves public patronage, and we are happy to embrace an opportunity of noticing the above series of publications. Upwards of twenty books have already been brought out, several of which deserve special notice. We must, however, content ourselves by a word or two concerning the "Easy Lessons in General Geography," by Mr. Hodgins, the Deputy Superintendent of Education for Upper Canada. It is most attractive book of eighty pages, exactly suited for young beginners, and conveys just the information required, and in a style which must render the study a pleasant recreation. The conversational trip through the several countries brought before the pupil, must fasten his attention upon them, and induce in him a wish to know more about them. The maps are clear, and distinctly marked and colored. The wood-cuts of cities and animals are very neatly executed. We doubt not that teachers will adopt the book as soon as they have learned its excellencies.—*Christian Messenger, Halifax, N. S.*

We, on a former occasion, expressed our high opinion of "Lovell's General Geography." We may now say that the later publication,—"Easy Lessons in General Geography"—is equally commendable.

We can also recommend, with every confidence, the several class books on Arithmetic, Natural Philosophy, Chemistry, English and Latin Grammar, Elocution, and Chronology. We really hope that these books will soon be introduced into every school in Nova Scotia, as well as throughout the remainder of British North America.—*British Colonist, Halifax, N. S.*

Of the various elementary books on geographical science this appears to him every way by far the most admirable. In addition to the style of the text being more adapted for children, the maps are plain and intelligible to the most youthful mind. We have little doubt that this admirable work will become just as popular as the larger one in these Provinces.—*Reporter, Halifax, N. S.*

The plan is excellent, the text is admirably adapted to the youthful mind, and the engravings and illustrations are well executed. We took occasion to notice "Lovell's General Geography" at the time of its publication, and we may repeat the desire then expressed that his series of school books should be generally adopted in the Colonies.—*Acadian Recorder, Halifax, N. S.*

We must candidly say that we have seldom seen so much instructive and highly interesting matter contained in so small a compass. It is not only a valuable school book, but may also be referred to with advantage by those of riper years. The maps and plates are both elegant. We wish the enterprising proprietor every success, both in this, and also in his numerous other publications for the advancement of education, which are especially got up to suit the wants of British North America; and we earnestly recommend teachers throughout the Province to adopt Mr. Lovell's series for their text-books.—*Casket, Antigonish, N. S.*

This little Book is intended for young scholars, for whom we consider it admirably fitted. We would recommend the publications of Mr. Lovell to all who are interested in the advancement of education; and as his series of works are intended for the Provinces we trust the public will tender him that encouragement which his enterprise is so worthy of.—*Eastern Chronicle, Pictou, N. S.*

The book, as its name indicates, is intended for young scholars, for which it is admirably fitted; and cannot fail to be welcomed as a valuable addition to the series of school books issued by the publisher.—*Colonial Standard, Pictou, N. S.*

It cannot fail to be welcomed as a valuable addition to the series of school books issued by the publisher. We would recommend teachers and those interested in the advancement of education, to examine the series of works issued by Mr. Lovell.—*Colonial Standard, Pictou, N. S.*
