workmen's government can never enter negotiations."

The halt in the negotiations and indications of a German refusal to move the conference to Stockholm have revived universal discussion in Petrograd of a resumption of fighting-with a greatly reduced army, probably three million men. Even the most radical Bolsheviki and the most ardent peace advocates have been aroused by the German position. They declare that a resumption of hostilities is imminent and express the belief that it is possible to organize and make effective a small army. Indications are that the German attitude is convincing Russians that they must fight to save their revolutionary principles. On Tuesday evening, at a joint meeting of the central executive committee of the congress of soldiers and workmen's delegates, representatives of the peasants' deputies, the Petrograd workmen's and soldiers council and representatives of the general army congress for the demobilization of the army, a resolution was adopted unanimously declaring that the German peace terms were unjust. It denounced Germany's attitude toward the Baltic provinces as tyrannical, and authorized the government to take steps to transfer future peace negotiations to a neutral country, suggesting Stockholm. Germany is opposed to this.

peace negotiations to a neutral country, suggesting Stockholm. Germany is opposed to this.

Articles Protested.

The Russian peace delegation officially has suggested to the central powers that the meeting place of the peace delegates be transferred to neutral soil and has protested against articles one and two in the Austro-German terms already submitted, which, it says, are in direct conflict with the principles of self-definition of nations insisted upon by the Russian peace delegation and supported by the Russian republic and the congress of workmen's and soldiers' delegates.

Articles 1 and 2, as cabled under a Brest-Litovsk date by way of Berlin last Sunday, covered the ending of a state of war and evacuation of occupied territory. In article, two, however, it was declared that the people of Poland, Lithuania, Courland and portions of Esthonia and Livonia demand independence and separation from Russia, and that the German occupation of Russian territory did not apply to these districts.
