

ST. JOHN STAR, TUESDAY, NOVEMBER 29, 1904.

8

The Handsome New CLOTHING FOR MEN!

The best news that could be told today is about the stylish new suits and overcoats, that are filling our window, preparatory to the Pre-Christmas demands of men who want the best ready-tailored clothing that popular prices can buy.

Here is such variety as will please men who have clothing to buy today—first because of the character and style of the fabrics; second, because of the careful and shapely tailoring; third, on account of the prices which are less than those of inferior makes, because of our low expenses.

Suits, single and double breasted Coats, \$12, \$15 and \$18.
New Black Sack Suits, \$12 and \$15—very special.

House Coats, Fancy Vests,
Washable Vests, Suit Hangers,
Acceptable Xmas Gifts.

A. GILMOUR,

Fine Tailoring and Clothing,
68 KING STREET.
CLOSE AT 6.30; SATURDAY at 10.

Something New in St. John GRAND OPENING SALES.

BEFORE SUITS, from \$15.00 to \$20.00
SIDE-BOARDS, from \$11.00 to \$20.00
PARLOR SUITS, from \$22.00 to \$30.00

I have also a very fine line of odd and three piece suits at very low figures, and also a complete line of Brass and Enamel Bedsteads.

SPECIAL—I am offering my old stock below cost. This stock must be closed out. No such bargains were ever offered before. Help me to do this and you will greatly help your own pocket-book at the same time.

E. MARCUS, 30 Dock Street.

CHRISTMAS MAGAZINES.
Metropolitan.
The Christmas issue of The Metropolitan Magazine contains illustrations in color by a number of the best known artists who draw for the magazines.
A charming paper by John Corbin entitled "A Boy's Eye-View of the Circus" is illustrated in full color by Jules Guerin, which he made upon representations of Toby Hamilton, the world-famous press agent.
"Garot the Cast," a \$500 prize story by W. A. Fraser, illustrated in color by Charles Livingston Bull, whose work is too well known to need comment. "Once Upon a Time" an interesting story of love and life by Richard Le Gallienne, past master of imagery, is illustrated in full color by Maxfield Parrish, whose wonderful tint effects have caused so much comment during the last two years. An "Uncle Remus"

Agents Who Sell the Saint John "Star."

A COAL CATECHISM.

Questions and Answers Interesting to All Who Are Striving to Solve the Coal Problem.

In The Coal Trade Journal of New York there is running at present a serial article entitled "Coal Catechism," by William Jasper Nicolls. The author supplies the coal consuming public with some valuable and helpful information in the form of questions and answers. He has already attained the 253rd question to which of course he has given the corresponding answer. Following are some of the questions with their answers, which will doubtless be found of interest to St. John people who rely so much for winter warmth upon coal:

"How do we classify coal?"
"In the family of the carbons, which varies in composition from the fattest or most highly volatile and bituminous substance to the leanest and least combustible."

"How are the American coals classed?"
"American coals are divided into two kinds, namely, Anthracite and Bituminous. These are again subdivided into many varieties."

"Of the two kinds which is the most rich in carbon?"
"Anthracite contains the highest percentage of carbon."

"Describe Anthracite coal?"
"Anthracite coal, the most condensed of mineral fuel, is hard and varies in color from a glistening black to dark lead-grey. It is clean, ignites with difficulty, burns with a soft flame, with little smoke, and has very little illuminating power. When burning it throws off a penetrating sulphurous odor, but gives an intense concentrated heat."

"Of what does Anthracite coal consist?"
"The constituents of Anthracite coal are carbon, water and earthy matter in accidental and varying mixtures. Anthracite is the condensed coke of bituminous coal."

"What is the usual percentage of carbon contained in Anthracite coal?"
"The percentage of carbon in Pennsylvania Anthracite ranges from 85 per cent to 92 per cent. In the Anthracite of South Wales the carbon has been found to reach as high as 95 per cent, and in a Russian variety 94 per cent."

"What is the average percentage of ash?"
"From 4 per cent to 8 per cent."

"Into what two are the Anthracite coals divided?"
"According to the color of their ash, they are divided into 'red ash' and 'white ash.'"

"What are the characteristics of Anthracite 'red ash' coals?"
"The Anthracite red ash coals contain a considerable proportion of oxide of iron, which gives them a reddish color. They are generally more easily kindled and a more free burning coal than the white ash, but from the inability to clinker, or from other causes, melt and adhere to the walls of the grate of the furnace, they are not so much esteemed for domestic use as the white ash variety which sheds its ashes freely."

"What are the characteristics of Anthracite 'white ash' coals?"
"The Anthracite white ash coals are harder than the red ash and are less liable to melt and adhere to the walls of a blast-furnace or for any use requiring a strong draught for combustion, as in the heating of furnaces, and are therefore having a forced artificial draught."

"How is the relative value of fuels determined?"
"By the quantities of water evaporated by a certain weight of each fuel. 'What do these evaporative tests show?'"

"Coals tested in this way show that the richer a coal is in fixed carbon the greater is its heating power."

"Under this test which coal would class highest in value?"
"Anthracite, owing to the higher percentage of fixed carbon which they contain."

"How much water will one pound of Pennsylvania Anthracite coal evaporate?"
"It has been shown by laboratory experiments to evaporate 15.56 pounds of water."

"How much water will one pound of bituminous coal evaporate?"
"A pound of the best Scotch coal by the same experimental tests evaporates only 7.74 pounds of water, and of the best English bituminous only 9.07 pounds of water."

"What is the generally accepted theory of the relative values of fuels?"
"It has been proven that the heat value of fuel is proportional to the quantity of oxygen which enters into the combination, and ever more so to the nature of the combustible. As hydrogen and the gaseous products of its combination with carbon consume much larger proportions of oxygen than the same weight of solid carbon, the presence of these increases the heating power of the fuel."

TWO DAGGERS KILLED IN STREET BATTLE.

SCRANTON, Pa., Nov. 28.—As a result of the efforts of the better class of Italians in and around Carbondale to rid their colonies of the members of a lawless gang who have been committing many outrages, a street battle occurred at that place tonight which was attended with the loss of two lives and the serious injury of a third man.

At 8 o'clock tonight Santo Carresi, one of the gang, was caught by a constable in the act of holding up a man and leaving tribute on one of the Italians of the colony. The constable and three of the law and order men started to take Carresi to jail. Work was quickly passed to the gang's headquarters in a nearby saloon and four of them rushed out and opened fire on the constable and his posse, who returned the fire.

When the attack was made, leaving all three of the constable's escort lying in the road with bullets in their bodies. The constable protected himself by holding his prisoner in front of him.

Joseph Tolerio was shot through the head and heart and died in a few minutes. Frank Perrelli is in the Emergency hospital with a bullet near the heart and another in the abdomen. He cannot live, the physicians say. The third victim received a bullet in the arm and after recovering from the shock was able to walk home.

Sporting News.

The salaries in the American Professional Hockey League run from \$25 to \$75 a week. Who can blame any young fellow, whose salary is about \$10 a week, from nibbling at the tempting bait held out by the promoters of professional clubs?

Winnipeg is to have a cat show November 30 to December 3, and one enthusiastic admirer of felines, Mrs. Holland, imported two Persian beauties from Holland expressly to exhibit them. It is safe to say, however, that the back fence cat exhibitions will attract more of the public's attention than those under respectable auspices.

Willie Keeler has signed with the New York American base ball club at a salary of \$8,000. That is \$1,000 more a year than a minister in the Canadian cabinet receives. The ball player works two hours a day for seven months in the year and the minister toils about ten times as much and doesn't get as much money or his name in the papers as often as does Keeler. You may draw your own deductions.

While Yale claims the football championship of the east, Pennsylvania has some claim to the title. Yale was beaten by West Point this fall, but Pennsylvania has gone through the season without a defeat and has defeated Columbia, Harvard and Cornell. Yale secured 22 points and had twenty scored against her, and Pennsylvania 215 points and had forty scored against her. Yale's record is better than that of any other team in the east.

Dr. Penelly, archbishop of Cashel, "kicked off" the ball at a football match at Thurles between Dublin and Tipperary. He has also "thrown in the ball" in a hurling match between Dublin and Cork.

YORK THEATRE.

A Good Show this Week—Wonderful Performing Horse.

Lovers of vaudeville will find good entertainment at the York Theatre this week. A bumper house greeted the first performance last night and from the frequent plaudits it was evident that all were pleased. Manager Hyde exercised good judgment in his choice of the make-up of the present company, as while there are acts which are meant to appeal to the comical side of nature, there are others of a decidedly serious character with performers of undoubted merit in their parts.

The performing horse Dahl, of Prof. Walbert, is the head liner for the week and concludes each performance. The horse, which is a snow white beast, is a beautiful shape and is trained to a degree far beyond what is usually attained. It is re-liable to clink, or from other causes, melt and adhere to the walls of the grate of the furnace, they are not so much esteemed for domestic use as the white ash variety which sheds its ashes freely."

"What are the characteristics of Anthracite 'white ash' coals?"
"The Anthracite white ash coals are harder than the red ash and are less liable to melt and adhere to the walls of a blast-furnace or for any use requiring a strong draught for combustion, as in the heating of furnaces, and are therefore having a forced artificial draught."

"How is the relative value of fuels determined?"
"By the quantities of water evaporated by a certain weight of each fuel. 'What do these evaporative tests show?'"

"Coals tested in this way show that the richer a coal is in fixed carbon the greater is its heating power."

"Under this test which coal would class highest in value?"
"Anthracite, owing to the higher percentage of fixed carbon which they contain."

"How much water will one pound of Pennsylvania Anthracite coal evaporate?"
"It has been shown by laboratory experiments to evaporate 15.56 pounds of water."

"How much water will one pound of bituminous coal evaporate?"
"A pound of the best Scotch coal by the same experimental tests evaporates only 7.74 pounds of water, and of the best English bituminous only 9.07 pounds of water."

"What is the generally accepted theory of the relative values of fuels?"
"It has been proven that the heat value of fuel is proportional to the quantity of oxygen which enters into the combination, and ever more so to the nature of the combustible. As hydrogen and the gaseous products of its combination with carbon consume much larger proportions of oxygen than the same weight of solid carbon, the presence of these increases the heating power of the fuel."

HORRIBLE MURDER OF NEW YORK LADY.

NEW YORK, Nov. 28.—With her head crushed, the body of Mrs. Margaret Keeler was found in her apartment on the upper east side late today and nearby was a ten inch blood-covered coupling pin, with which she had evidently been murdered.

The Keeler family consisted of the husband, who is employed in a local ice depot, and his wife, Margaret, who was 28 years old, and Mabel, 9 years. The children say they left home as usual this morning for school. Their father had gone to work earlier and when they started out their mother was in good spirits. At the noon hour they found the door to the apartment locked, and left, thinking their mother had gone shopping. Finding the door still locked upon their return at the close of the afternoon session, the boy climbed up the fire escape and gained entrance through an unlocked window in the rear. A few minutes the boy rushed down stairs screaming, "my mother has been killed."

Mrs. Keeler's body was found on her bed and it was evident that she had been dead several hours. The police are investigating, but so far no arrests have been made.

THE DEADLY CIGARETTE.

Rev. W. S. Pritchard, the new pastor of the Congregational church, preached last Sunday on the "Deadly Cigarette." He gave a number of strong reasons why boys and young men should avoid the cigarette. The effects of cigarette smoking were admitted, the principal being its direct impairment of the human vitality by the enlargement of the heart, and its damaging effect on the nervous system. Any person who had regard for his physical health would be influenced by common sense to eschew the cigarette.

GOING TO AFRICA.

After Dr. A. B. Walker, B. A., finished his lecture tour through Canada and the United States he purposes visiting Africa and studying the Negro race there. His African trip will extend over a year and will include the following countries: Sierra Leone, Lagos, the Congo, British South Africa, British East Africa, Central Africa, Abyssinia and Egypt.

Dr. Walker will be accompanied by a sketching artist and a photographer.

A YANKEE SWINDLER.

Ottawa Fooled by a Smart Fakir, Who Organized an Art Culture Club.

(Special to the Star.)

OTTAWA, Nov. 28.—Prestigious citizens of Ottawa, as well as of Kingston and London, are lamenting the loss of hard earned dollars through the medium of a Yankee swindling concern. Two or three weeks ago a smart American arrived in Ottawa after doing up Kingston and London. He looked up two or three prominent preachers, spoke glibly to them of the advantages of an Art Culture Club in Ottawa, got their names on his membership list and then proceeded to rope in the unwary. The club when formed was to be supplied with music, art works and literature according to choice of each individual member. The membership was not to exceed thirty-two, but when the organization meeting was held at which the Yankee collected five dollars initiation fee, it was found that he had run the membership up to nearly one hundred. Packages of literature, music and art engravings were delivered at the homes of the members next day. On examination they turned out to be not worth more than fifty cents. When some of the art culturists wanted to find the man to file a protest it was found that he had skipped town. Probably he is now working the game in some other Canadian city.

NEW TEMPLES.

The grand officers of the Temple of Hope of New Brunswick visited Milford Hall last evening and organized a new temple with a charter membership of thirty. The new temple will go under the name of Milford Temple, No. 7. After the candidates were initiated the following officers were elected:

W. C. T.—George Doherty.
W. V. T.—Edward Ferris.
First Deputy—Frank Wright.
W. A. R.—W. E. Bain.
W. T. R.—Horace Stout.
W. T.—Harry Ferris.
C. U.—A. T. Dykeman.
Usher—Boyd Allen.
W. D. Usher—Ewen Williams.
G. U.—W. C. Whitaker, P. G. W. T., W. T. W. C. Whitaker, P. G. W. T., and John B. Eagles, P. D. M. W. T.

The meeting then closed with best wishes of all for the success of the new temple.

The temple will meet every Monday night at 8 o'clock. The charter list will be left open for a week or two, at the end of which time the membership will in all probability reach fifty or sixty.

Temple of Honor work is booming. This organization in Milford is the first of a series of new temples for which solid foundations will be laid during the next couple of weeks.

On the last few nights a great deal of quiet work has been going on with the result that arrangements have been almost completed for the opening of the east end temple.

In the city a number of prominent merchants and professionals have been interested in the order, with the result that a temple will be organized in a German street hall within a few days.

FREDERICTON NEWS.

FREDERICTON, Nov. 28.—Hon. A. G. Blair came in on the noon train from Ottawa today and will remain in the city until tomorrow. Mr. Blair is looking well and travelled as an ordinary passenger. He is on his way to Halifax and stopped off here for a short time. Mr. Blair has been visiting Fredericton for some time. Mr. Blair has nothing to say regarding past events.

Nettie May Atkinson, daughter of Mr. and Mrs. Alexander Atkinson, died at the home of her parents this morning, Brunswick street, after an illness of only three days. She was in her seventh year. The funeral takes place tomorrow afternoon, with services at St. Ann's church, Rev. Canon Roberts officiating.

The death scene was yesterday of Miss Gertrude Grannen, daughter of Mr. and Mrs. Richard Grannen of Kingsley. She was 28 years old and had been a sufferer from diabetes for some months. The deceased young lady was for some time employed at the New Brunswick telephone office and had many friends, who will regret to hear of her death.

The infant son of Mr. and Mrs. Nathaniel Brooks died yesterday at the home of his parents, Regent street. The remains were taken to Oromocto today for interment.

Last night the thermometer went two below the cipher here. The day, however, showed a great rise in temperature. Sleighing in the country is reported as excellent.

AUTONOMY FOR NORTHWEST.

OTTAWA, Nov. 28.—A communication has been sent to Hon. Mr. Haultain, premier of the Northwest, that the Dominion government would be glad to receive a declaration from the territories the first week in January to discuss the question of provincial autonomy. During the past two or three sessions the government has been discussing the question of provincial autonomy. The proposition with this object in view but realizing that something must be done to meet the demand of the people, the government has decided to enter upon negotiations for the purpose of arriving at a settlement of the question of provincial autonomy.

Laurier has now redeemed his pledge, the first meeting of the newly formed military council was held this morning in Sir F. Borden's office. The meeting lasted for over an hour and half but nothing of an important nature transpired.

Spartacus: "Does that fountain pen of yours look that way all the time?"
Snaricus: "No, only when I have ink in it."—Baltimore American.

Straws Show Which Way The Wind Blows.

The quotations we make show how cheap we are selling good Furniture. Sample Sideboards and Extension Tables, just one of each, but they take up space in our showroom. To clear them out they have all been marked at 33 1-3 per cent. discount. This is by no means an ordinary announcement, it means money in your pocket.
