

The Day's Work Done

Then comes the "cleaning up"—the removing of the grease and dirt. It requires good soap to do it well—one that makes a copious lather, penetrates the pores and softens the skin. Soaps containing strong alkalis and impurities aggravate or produce chaps and cracks and make the skin tough and hard.

Try Fairbank's Glycerine Tar Soap

It contains the purest Glycerine, Pine Tar, healing oils and antiseptic ingredients, that soften the hair, soothe the skin and cure or prevent disease. It makes lather in any kind of water and removes grease, dirt and stains far more thoroughly than ordinary soap. Its easing, curative properties make it unequalled for bathing the children. It leaves no odor and is very lasting.

TRADE NOTES.

WINONA WAGON CO.—Mr. R. MacKenzie, general agent of this company in Winnipeg, has in stock a large supply of really high-class wagons manufactured by the company. While the wagon is in every respect a first-class article, it possesses several improvements peculiar only to the Rushford and Winona wagon. In the axles and wheels, the wagon is strengthened by means of outer bearings and iron-clad hubs. There is also a double box bottom over hind bolster, with wood-filled fronts. The felloes are riveted on either side of the spokes, and the pole and all bearing parts are strengthened by iron plates and straps with a view to giving a uniform wear all over and saving in repairs. The timber used is bone dry and the general get-up of the wagon is excellent.

WARM-AIR FURNACES.—We would call the attention of our readers to the goods advertised on another page by Mr. Horace Wilson, of Winnipeg. Mr. Wilson handles an extensive and varied line of warm-air furnaces, including the celebrated National and Surprise furnaces, which have given splendid satisfaction to all who are using them. He has also recently added to his list of agencies that of the Guelph Foundry Company, makers of the New Idea line of stoves and the Kelly warm-air furnace. This furnace is particularly well adapted to the requirements of the Northwest, as it will burn any kind of fuel, such as wood, Souris or other soft coal. It has the largest feed-door in the market, being 14 x 14½ inches, thus taking in a large piece of coal or chunk of knotty wood that could not otherwise be used. Mr. Wilson has been closely connected with the furnace and stove trade of the Northwest for a number of years, and is eminently qualified to give information and advice to those who intend to install a heating apparatus in their buildings.

COCKSHUTT PLOW CO.—A visit to the new warehouse of this well-known company on Princess street constitutes quite an education in soil cultivation. The company, as the name indicates, make a specialty of plows and cultivating implements, although they also handle binders, mowers, rakes, and carriages of all kinds, all of which are quite abreast of the times. The popularity enjoyed by and the support given to the company is ample proof of the high grade of the articles manufactured and handled. The new warehouse into which the company has moved in Winnipeg is the largest building exclusively devoted to the storage and exhibition of agricultural implements now in Canada. The ground floor is used as a showroom, where, in the spacious and well-lighted hall, the implements and carriages are shown to the best advantage and with the greatest comfort and pleasure to the visitor. The general offices are on the first floor and are 35 x 75 feet, comprising general office, stenographers' room, general agents' room and manager's room. The remainder of the building is for general storage purposes. All the partitions dividing the offices are of clear plate glass, and give a palatial air to the building. The front of the showroom is also composed largely of plate glass. The building has a frontage of 80 feet, with a depth of 117 feet. Two spur tracks are laid in rear of building, giving loading facilities for four carloads of goods. The company own property in rear, running through from Pacific to Alexander avenue, affording ample accommodation should further enlargement be required.

GOSSIP.

There were despatched from Dalmeny Home Farm, by the Donaldson steamer, Marina, from Glasgow, June 13th, twelve yearling Shorthorn bulls to the order of Mr. W. B. Platt, Hamilton, Ontario. This was a very select lot of high individual merit and the best of breeding, got by such sires as Prince of Archers, Spicy Robin, Villager and Principal of Dalmeny.

HORSEMEN! THE ONLY GENUINE IS

GOMBAULT'S CAUSTIC BALSAM.
