baking powders knowingly, for it is well understood that they are detrimental to health. The sale of lime and alum baking powders as pure and wholesome articles is, therefore, criminal, and it is satisfactory to notice that several persons engaged in such sale have already been brought to justice in the courts.

The official analysts have recently been active in the pursuit of these dishonest articles. The baking powders of several States have been carefully and critically examined. The officials are surprised at the large amount of lime and alum goods found. It is a suggestive fact that no baking powder except the Royal has been found without either lime or alum, and many contain both. Dr. Price's baking powder has been found to contain nearly 12 per cent. of lime; Cleveland's 11 per cent. of impurities; the phosphate powders over 12-per cent. of lime.

The chief service of lime is to add weight. It is true that lime, when subjected to heat, gives off a certain amount of carbonic acid gas, but a quicklime is left—a caustic of most powerful nature. A small quantity of dry lime upon the tongue, or in the eye, produces painful effects; how much more serious must these effects be on the delicate membranes of the stomach, intestines and kidneys, more particularly of infants and children, especially when the lime is taken into the system day after day, and with almost every meal. This is said by physicians to be one of the causes of indigestion, dyspepsia, and those painful diseases of the kidneys now so prevalent.

Adulteration with lime is quite as much to be dreaded as with alum, which has heretofore received the most emphatic condemnation from food analysts, physicians and chemists, for the reason that while alum may be partially dissolved by the heat of baking, it is impossible to destroy or change the nature of the lime, so that the entire amount of the baking powder passes, with all its injurious properties, into the stomach.

The large profits from the manufacture of lime and alum baking powders has placed many of them in the market. They are to be found in the stock of almost every retail dealer, and are urged upon customers calling for baking powders upon all occasions. Because of their well-known detrimental character it is desirable that prompt means be taken to suppress their manufacture.

Pure baking powders are one of the chief aids to the cook in preparing perfect and wholesome food. While those are to be obtained of well-established reputation, like the Royal, of whose purity their has never been a question, it is proper to avoid all others.

HINTS TO HOUSEKEEPERS.

FOR HICCOUGH—Hold the breath.

FOR INFLAMMATORY RHEUMATISM—Eat one or two raw lemons, daily.

FOR DIARRHŒA—Take boiled milk and castor oil, also brandy and raw eggs.

KIDNEY DIFFICULTY—For many forms of kidney difficulty, a tea made of peach leaves is a sure cure.

WARTS—Oil of cinnamon will cause the disappearance of warts, however hard, large, or dense they may be. The application gives rise to neither pain nor suppuration.

THE FINE BELLS.—Ring out an alarm and it is heeded. This is to notify you that base substitution is practised when the great sure-pop corn cure is asked for. Putnam's Painless Corn Extractor never fails to take corns off. It makes no sore spots and gives no pain. Be sure and get "Putnam's."

DIPHTHERIA—Stop all food, even when the appetite is good, except gruels and porridges. Drink not a spoonful of cold water. Bandage the entire throat in the early stages of the disease, with several folds of flannel. Keep this cravat on both day and night without changing. Be very quiet and do not fear the progress of the disease. Gargle the throat and mouth every half hour with strong

gargle made of vinegar, honey, red pepper and salt, mixed in a tumblerful of warm water. Do not go out of a warm room for several successive days. Breathe the vapor of hops occasionally and sleep on a pillow filled with them. Take no physic or enemata. This course will prove exceedingly successful.

SORE THROAT.—Buy at a drug store one ounce of camphorated oil, and five cents worth of chlorate of potash. Whenever any soreness appears at the throat, put the potash in half a tumbler of water, and with it gargle the throat thoroughly, then rub the neck thoroughly with the camphorated oil at night before going to bed, and also place around the throat a small strip of woolen flannel. This is a simple, cheap and sure remedy.

CONSUMPTION CAN BE CURED by proper, healthful exercise, and the judicious use of Scott's Emulsion of Cod Liver Oil and Hypophosphites, which contains the healing and strength-giving virtues of these two valuable specifics in their fullest form. Dr. D. D. McDonald, Petitcodiac, N. B., says: "I have been prescribing Scott's Emulsion with good results. It is especially useful in persons with consumptive tendencies." Put up in 50c. and \$1 size.

LOCKJAW.—In lockjaw, take a small quantity of turpentine, warm it and pour it on the wound, no matter where the wound is, and relief will follow in less than a minute. Nothing better can be applied to a severe cut or bruise than cold turpentine; it will give certain relief almost instantly. Turpentine is almost a certain remedy for croup. Saturate a piece of flannel with it and put it on the chest, and in a severe case three or four drops on a lump of sugar may be taken inwardly. Every family should have a bottle on hand.

POISONOUS SNAKE BITES.—Take a spoonful of sweet oil, internally, and also bathe the wound with the same. It is said to have cured one case that had been thirty days standing. It will cure the sting of bees, spiders and other insects, and persons who have been poisoned by a low running vine called ivy. It is equally good to cure animals. To cure a horse it requires eight times as much as for a man.

BOYS AND MOTHERS.

Sometimes boys think mothers are in the way; that they would have more liberty if it were not for their mothers. Mothers have such searching eyes, eyes that seem to look right into the heart, especially if there is anything hiding there that mothers should know about; and this is troublesome. If boys would only understand that it is love that makes the mother's eyes so keen, her voice so anxious, her questions so searching; love that knows all the temptations that may come to a boy, and the trouble if there is no wise confidante about! It is not the anxiety of a Paul Pry, but the loving guardianship of a mother.

The wisest and best men have honored their mothers. Few men who have accomplished a special work in the world do not give credit to their mother for the help and inspiration that made their work possible. When the late President Garfield was inaugurated, the first person he saluted was his mother, showing plainly the place she held in his heart, his life.

The world honors and respects the man who honors and respects his mother. The neglect of a mother stamps a man or boy as heartless, ungrateful, if not cruel. The truly great men have never forgotten those to whom they were most deeply indebted. Many letters have been written about mothers, but few that show the sorrow that comes if the full measure of a mother's love has received no return until too late to make it. The poet Gray, in 1765, wrote the following letter to a friend:

"It is long since I heard you were gone into Yorkshire on account of your mother's illness, and the same letter informed me she was recovered. Otherwise I had then written to you only to beg you would take care of her and inform you that I had discovered a thing very little known, which is, that in one's whole life one can never have any

more than a single mother. You may think this obvious and what you call a trite observation. I was at the same age (very near) as wise as you, and yet I never discovered this (with full evidence and conviction, I mean) till it was too late. It is thirteen years ago, and it seems but as yesterday, and every day I live it sinks deeper into my heart."

Mothers cannot force boys to see their worth. Just stop and think what your life would be without your mother. Then remember to give in return love, courtesy and obedience. If you treat your mother in such a way that you show your love and respect for her, you will acquire the habit of treating every woman courteously, and earn the title of gentleman.

"THERE IS ALL TO-MORROW YET."

Christ forbids anxiety concerning our life, our eating, our drinking, our clothing, and our future, though it be but for one day or for one moment. He shames us and teaches us trust in our Heavenly Father, by citing the sparrows that God feeds, the life that God steadily preserves, the body whose stature He increases, the lilies of the field that grow and bloom and charm by their beauty and purity, and excel Solomon in all his glory, without toiling or spinning; the grass which is carefully clothed though it is so soon to reach the oven; and the fact that God knows all our need.

There is a world of philosophy in the answer of the old colored man, whom his master was urging to put more than one day's work in the day. He replied:

"Massa, there is all to-morrow that ain't teched yet."

Let us not touch to-morrow till it comes. We may touch eternity before to-morrow shall bring to us its sorrows.

WHITSUN-DAY.—THE HOLY SPIRIT.

A rich fulfilment to-day of a most precious promise!

The Holy Spirit has come down upon the Apostles, The Comforter, The Lord, and Giver of Life.

Oh! how great God's gifts are, how wonderful! On Christmas Day He sent His Son into the world to dwell with us. Now, on Whitsun-day, He has sent His Holy Spirit, to abide with us for ever. So good a gift, that it is better for us to have the Holy Spirit than to have the Lord Jesus back again on earth as he was before.

It is hard to understand this. But the Lord Jesus Himself says so. *Lord, I believe, help Thou my unbelief.*

Let us see what this great Gift of God is worth.

(1). Who is this Holy Spirit?
He is God; together with God the Father, and God the Son, to be worshipped and glorified. *Glory be to Thee, O Holy Spirit.*

(2). And what was His work before the day of Pentecost?

He worked at the Creation. He was striving with sinful men from the beginning, trying to keep them from the evil one. He spoke by the prophets. He came down upon the blessed Virgin Mary, making her to be the Mother of the Lord. He descended on Jesus at His Baptism, under the form of a Dove.

And to-day, Whitsun-day, He came down on all the Apostles.

Then—and not till then—they received power from on high. Then they began their ministry to the world. Then they preached, they baptised, they confirmed, they celebrated the Holy Communion, they ordained Bishops, Priests, and Deacons, to come after them, they made rules for the government of the Church, they worked miracles, they wrote Gospels and Epistles, *by the power of the Holy Ghost.*

So that the Holy Catholic Church throughout the world is the work of the Holy Spirit. Not man's work, but God's work.

(3). But this is not all. Look at His work, now, in each Christian soul.

O Christian, in Holy Baptism He made thee the child of God.
