Waste Paper Baskets, 15c each.

## Ribbon Department

Wide width, double-face Satin Ribbons, fine shades, 5c yard.

How to Make a  
ROUGH SKIN SMOOTH

There are some whose skin is naturally very tender, so much so, that a slight change in temperature, either heat or cold, will cause it to become rough and scale. This is very annoying, whether it makes the skin sore or not. A trouble of this kind is due to the skin being too dry, the underlying glands not giving it food enough. It must, therefore, be fed artificially. This may be done by using OLA CREAM, a scientific skin food. OLA CREAM is not a thin, watery fluid, but is of a creamy consistency. Prepared from a valuable formula, consisting of healthful ingredients, which feed the skin, building up the tissues, supplying to the glands that which they lack to prevent roughness.

Anyone who is troubled with roughness of the skin or chapped hands will find OLA CREAM a sure preventative.

We are receiving many testimonials for OLA CREAM. We have made a study of the care of the skin, and will be glad to give any information to anyone writing us.

Kennedy's Pharmacy, 263 Dundas Street.

SOME OF HONEY'S  
PECULIARITIES

Discussed and Explained at the Ontario Beekeepers' Annual Meeting—Officers Chosen.

Woodstock, Dec. 6.—The Ontario Beekeepers' Association's annual convention was brought to a close yesterday, when officers were chosen as follows: President, J. D. Evans, Islington; vice-president, James Armstrong, Chesapeake; second vice-president, W. A. Chrysler, Chatham; directors, W. J. Brown, Chard; J. K. Darling, Almonte; M. B. Holmes, Athens; C. W. Post, Trenton; J. W. Sparling, Bowmanville; J. D. Evans, Islington; A. Pickett, Nasagawaya; James Armstrong, Shepardside; John Newton, Thamesford; F. A. Gemmell, Stratford; W. A. Chrysler, Chatham; Samuel Wood, Nottawa; Prof. F. C. Harrison, auditors, D. Nolan and H. E. Sibbald; revising committee, J. D. Evans and D. W. Hulse; representative to Western Fair, London, F. J. Miller, London; representative to Industrial Exhibition, Toronto, A. Pickett, Nasagawaya; representative to Canadian Central Exhibition, Ottawa, J. K. Darling, Almonte; Inspector of apiaries, Wm. McEvoy, Woodburn; assistant inspector of apiaries, F. A. Gemmell, Stratford.

RIPE AND UNRIPE HONEY.

An announcement of not only scientific interest, but of great commercial importance, was made by Prof. Shutt, chemist of the Dominion Experimental Farm, Ottawa. During last season an investigation had been made by Prof. Shutt to ascertain the differences in composition between ripe and unripe honey, it having been held that only ripe honey should be put on the market. Unripe honey is the extract in its watery state, as deposited by the bee in the comb. Ripe honey is generally admitted to be the product as taken from the comb after the cap has been put on by the bee. It is held by

many dealers that what is commonly considered adulterated honey is really the unripe product of the bee taken from the cell before it has been capped, the object being to get extra work from the bees in refilling the empty cells. It having been generally considered that the unripe honey contains the larger amount of water, samples of the capped and uncapped product from the experimental farm apiary were analyzed during last season, to obtain data on this point. In the course of his remarks Prof. Shutt said and evidences of astonishment among the members that results of his research showed that ordinary laboratory methods of estimating water were not applicable in honey analysis, and that consequently the percentages of water as usually quoted were not to be regarded as strictly reliable. Honey consisted largely of two sugars, dextrose and levulose, and in the ordinary course of analysis the latter suffered decomposition, making the water content appear higher than it really was. Prof. Shutt had not had time to complete his researches, but hoped to have the method of analysis perfected probably by the association's meeting next year.

HONEY AS A FOOD.

The address embraced a large amount of valuable information on the chemistry of honey. The position of honey as a food was fully dealt with, and it was shown to be the most palatable, agreeable and digestible of all saccharine foods. He thought the time would come when honey would be used not only as a table luxury, but as a staple food. It had been used ages and ages before the Christian era, and was the first sugar known. In making analysis for water percentages it should be borne in mind that the conditions differ in different seasons. The nature of the season—a wet season produces more water than a dry season, the flowers from which the bees extract the honey being heavy with moisture. Prof. Shutt showed that there was, according to his estimate, a difference of 2 per cent of water between unripe and ripe honey.

Mr. J. K. Darling, of Almonte, who as a practical beekeeper had had experience, upheld a number of Prof.

Shutt's conclusions. He had found that honey taken from the comb was not the same as the extract taken from the flowers by the bee. Prof. Shutt had explained the exhibition was practically a partly-digested extract due to the action of certain acids from the bee.

SOUND FRUIT UNHARMED BY  
BEES.

Mr. John Ficker, of the Experimental Farm, Ottawa, presented a valuable paper on experiments he had conducted, and took the stand that sound fruit fit for the market is never harmed by bees; broken and decayed fruit, however, was liable to be attacked.

REPORTS.

The report of William McEvoy, government inspector of apiaries, was satisfactory to the association, and a vote of confidence in the inspector was passed. Mr. McEvoy had visited over 70 apiaries, and had found four brood in 29 and dead brood in many others. The directors' report showed that last season was highly satisfactory, the honey being of excellent quality. The results of the exhibition was Ontario honey at the Pan-American, which had been encouraged by the Ontario Government, were extremely gratifying. Besides the gold medal for general excellence of quality, 33 diplomas of merit were awarded to Canadian beekeepers.

Treasurer Enright reported that the total receipts for the year were \$757, and the expenditures \$567.

Secretary W. Couse reported that last spring the number of colonies in Ontario was 2,300, according to the reports sent in, and in the fall 3,500, an average increase of 66 per cent. The average of colonies from Ontario colony was five pounds, and of extract colony was five pounds, and of extracted 68 pounds.

That the association next year will be held at Barrie.

BRIDGES TO  
BE ERECTED

Council Authorizes Two New Structures.

One at Muncey Site and the Other South of Strathburn.

Commissioner Appointed—The Treasurer's Statement Presented—Debentures Sold.

After engaging the attention of successive county councils for a dozen or more years, and after causing endless differences between the advocates of rival sites, the vexed question of the Caradoc bridge was given its quietus at yesterday afternoon's session of the county council. A resolution was passed, authorizing the completion of arrangements for the construction of the bridge during the coming summer. Another bridge also will be built, opposite the town line of Dunwich and Aldboro, which will give satisfaction and prove a great convenience to the residents of Glencoe and the surrounding country, as well as to the citizens of the two main townships. Among the other business transacted was the appointment of Charles Talbot as county commissioner, in succession to his father, F. B. Talbot, who has just resigned.

BRIDGES TO BE BUILT.

The board of road directors, in reporting upon the motion of Councilor Grigg, that a bridge be built over the Thames at the Muncey site, recommended the adoption of the report. The council went into committee of the whole to consider the report.

Councilor Elson submitted an amendment to the effect that the engineer be instructed to examine the river for half a mile below the railway, decide upon the best site, prepare an estimate of the cost and report upon the matter at the January session.

A lengthy discussion followed, in which the majority of the council took a part. The amendment was lost by a vote of 6 for and 10 against, and the clause carried by the same division. The next clause of the report recommended the adoption of the resolution of Councilor Campbell, providing for the erection of a bridge at the site of the present low-water bridge, south of Strathburn.

This clause excited less discussion, only three councilors speaking on the question. The cause carried by a vote of 11 to 5.

The report also recommended that the claim of R. J. Robinson for damages to a horse and buggy by defective county bridge be left to the wardens and Councilor Bradley with power. Contractors' deposits, guaranteeing completion of work, were recommended to be returned as follows: C. Ferguson, \$85; S. Pearson, \$95; W. L. Bice, \$38; they having given satisfactory reasons for delay. Both clauses were adopted.

On the committee of the whole rising and reporting to council, Councilor Elson moved in amendment that the clause regarding the Muncey bridge be not adopted, but be referred back to committee of the whole with instructions to amend by substituting the provisions of Councilor Elson's defeated amendment to the effect that the mover called for the yeas and nays on the amendment, which were as follows:

Yeas—Jackson, Piper, Murray, Gough, Robotham, Gray, Grigg, G. B. Campbell, Graham and Traford Campbell—10.

Nays—Elson, Hodgins, Bradley, Neely, Salmon and McLeod—6.

The amendment was thereupon declared lost, and the report was adopted.

On motion of Councilors Gray and Grigg, the commissioner was instructed to proceed with all arrangements for the erection of the Muncey bridge.

FINANCE COMMITTEE.

The first report of the finance committee recommended the acceptance of the resignation of County Commissioner Talbot and recommended that a gratuity of \$500 in consideration of his long and faithful services to the county be given him. The following payments were recommended: \$2,000 due from "ink" for the year 1901; expenditure account: \$1,000 on account to Victor Hospital; \$58.66 to Children's Aid Society; \$12.83 to Adelaide Township; \$12.83 to Adelaide Township; \$12.83 to Adelaide Township. No action was recommended in the request for a grant of the Prisoners' Aid Association. The account of arbitrators of the Efrid school dispute was referred to the solicitor to determine the county's liability. The report was adopted.

THE COUNTY FINANCES.

Treasurer McEvoy submitted his

statement of receipts and disbursements, from Jan. 1 to Dec. 5, 1901. The receipts were \$58,837.38 and the disbursements \$4,683.06. The balance is thus \$12,174.32, last year's balance being \$2,732.91. Some of the items of receipts, in addition to the county rates, were: From Provincial Government, re administration of justice, \$8,000.41; legislative school grant, \$5,200.10; continuation grant, \$500; education, incidental, \$28; model school, \$50; maintenance of jail (city), \$3,673.54; repairs to jail (city), \$1,024.88; London South debt (city), \$1,050; registry of fees, \$105.66; auctioneers' license fees, \$240; fines from magistrates, \$5; wild land redemption money, \$73.01; House of Refuge, \$523.24; Victoria Hospital, \$730.50; interest, \$140.93; bridges, \$44.50; wild land taxes, \$633.61; payment to jurors, government share, \$2,056.20; serving of jurors, government share, \$25.32; division court jurors, government share, \$64.91; administration of justice, \$348.72. Among the items of expenditure were: Redeemed debenture coupons, \$13,641; wild land taxes, \$309.07; cost of administration of justice, general account, \$7,000.13; paid constables, \$2,480.75; crown witnesses, \$1,893.75; maintenance of court house and jail, \$3,097.83; repairs to jail, \$859; jail officials' salaries, \$3,273.14; maintenance House of Refuge, \$5,175.13; paid jurors, \$4,052.70; serving jurors, \$1,271.16; cost of municipal government, \$4,753.37; payment to hospital, \$1,898.83; interests, \$35.20; printing, \$1,893.75; county buildings, \$5,831.37; miscellaneous grants, \$1,328.46. The report was ordered to be printed in the minutes.

Dr. John Sutton wrote asking consideration of the case of John Bohon, of Clandeby, who, on arriving in London from Manitoba, was found to be suffering from smallpox and removed to the isolation hospital. He had some money which he had saved, but the hospital authorities had taken it from him. If they kept all the money he would have to walk home to Clandeby, without suitable winter clothing.

Dr. Sutton inclosed a letter from Dr. Hutchinson, medical health officer of London, saying that Bohon's bill was \$100, but that the London Board of Health would accept \$50. The matter was referred to the finance committee.

The secretary of the Strathroy Woman's Christian Association wrote stating that owing to scarlet fever being prevalent in the House of Refuge, it had been deemed advisable to postpone the regular Christmas dinner, toward which the council annually granted \$20, and asked that the grant be deferred until a later date. He referred to House of Refuge committee. County Solicitor John C. Elliott submitted his opinion, in connection with the revision of the bylaws, that no councilors should be permitted to vote to appoint himself to any county office. He should resign and accept the appointment if secured. In respect to the voting for warden, the voting should be open. The communication was filed.

COMMISSIONER APPOINTED.

Chas. Talbot, son of the former commissioner, applied for appointment as commissioner. Councilor McLeod moved that he be given the appointment. The motion carried.

DEBENTURES SOLD.

Tenders were opened for the purchase of \$20,000 debentures to retire other debentures maturing. Henry O'Hara & Co., Toronto, proved to be the most favorable, their figure being 96½. The tender was accepted.

Council adjourned till 2 p.m. The session will probably not conclude till Saturday.

A LINIMENT FOR THE LOGGERS.—Loggers lead a life which exposes them to many perils. Wounds, cuts and bruises cannot be altogether avoided in preparing timber for the drive and in river work, where wet and cold combined are of daily experience, coughs and colds and muscular pains cannot but ensue. Dr. Thomas' Electric Oil, when applied to the injured or administered to the ailing, works wonders.

With style are among our best customers. Every day, every month, every year, we keep adding new customers from the ranks of the up-to-date dressers. Our styles, goods and prices "are simply irresistible," and that's a good word.

## MEN'S SUITS
