our friend, the Turf, Field and Farm, is slightly off its base this week. It speaks of the Shamrock lacrosse twelve as the champion cricketers and then follows up with some very pertinent remarks anent the recent hippodrome game at Montreal, when the Montrealers wen three straight. It says the match is causing a good deal of comment in Ontario, and the popular belief is that had the game been fer the championship the result would have been different. The fact is gate money and the professional element are showing too vividly in sportsmen's organizations. We quite agree with our estimable contemporary, who, by the way, again shows he had cricket on the brain when making up his athletic notes by speaking of Thomas Pettitt, the famous Boston tennis player, now in England, as "an American cricketer in England," "whose remarkable cricket play," and then detailing his feats at tennis.

As might have been expected, the possibilities

and then detailing his feats at tennis.

As might have been expected, the possibilities are being discussed of John Teemer, the newly-discovered McKeesport, Ps., carsman, defeating Hanian. It is stated that when Teemer made his 20.14 at Pullman, Ili,, he steered wildly and lost headway at both ends of the course, mere particularly at the finish, when he rowed diagonally across fully half of the course in order to finish at his own starting buoy. With accurate steering throughout, Teemer, says the American Sporte, ought easily to have made the distance in half to three-quarters of a minute faster than he did. The chances are that the Canadian champion may yet find in Teemer, before the season is over, a man who will push him at a faster gait from end to end than any he has yet known, and wno, should he continue to improve in his rowing form as rapidly as he has improved already this season, and as rapidly as is to be expected of an oarsman less than 19 years of age, may set place to his credit a victory over the redoubtable Hanlan. Sight must not be lost, however, of the fact that Teemer, in the race under mention, only finished a length ahead of Gaudaur, a man who at his best is by no means up to championship form.

From the Chicago Herald.

Leonatus, the wonderful three-year-old, still preeves his unbroken record, and it is to be regretted that he will not be taken east to try conclusions with the eastern stables. All the other favorites have had to succumb to the glorious uncertainties of the turi, or better "mud" horses. About one of the best-paying pieces of real estate in the world is a first-class mud horse. This is especially true if he belocated within a race-track among a lot of high-strung flyers distinguished for great speed and a plentiful lark of staying power. During the present meeting many a big "pot of money "has been made and lost on the mud horse. It is a distinguishing characteristic of his that his popular qualities are seldom discovered until the wire is passed and a few fortunate hope-alls have cashed their "fat" pool tickets. Then his stock rises as if a torpede had been exploded under it, and everybody in the field recollects that he noticed the peculiarly strong propelling action of the mud horse in the preliminary canter. If the mud horse only understood half the files of the "phrophets of the past" he would fall down laughing and roll over the little black darky jockey who rides him. The Mud Horse.

This is the time of the year at which a small boy will travel through a swamp all day long on an empty stomach and sink into the mud anywhere from his ankles to his hat to catch a couple of small water turtles, and think it glorious fun.
