#### Narrow Escape of Train Crew Wreck on G.T.R. Near Kerwood.

disastrous, but fortunately not fatal A disastrous, but fortunately not later collision occurred on the Grand Trunk on a sharp curve a mile and a half east of Kerwood Wednesday morning, shortly after 10 o'clock. A fast freight hauled by engine No. 665, the train in charge of Conductor Murphy, was coming east when the engineer discovered that one of the braces on the driving rod was slip-ping. There was nothing to do but stop and fix it. By this time the train was around the curve and came to a stand at the toot of the long grade.

The first train had hardly stopped when

a heavy ore train made up of 35 cars, each containing 50 tons of ore for the Hamilton mills, came rushing around the curve and down the grade

Hugineer Chudley, of Fort Erie, had no time to do more than shut off the

no time to do more than shut off the steam, apply the emergency brake, warn Fireman Wyman, and then jump. The brake worked splendidly, but it was im-possible to stop such a heavy train in such a short space, especially coming

down grade. The big mogul simply plowed through the first dozen cars as if they were paper, and, after weeking three more, turned over on its side.

The tender was thrown off the track and two of the heavy ore cars were thrown in such a manner as to lie nearly straight across the line.

London was communicated with as quickly as possible, but the auxiliary was busy at Newbury, clearing up the re-mains of the explosion on Tuesday night. As soon as possible, however, it was hurried to Kerwood. The two heavy ore cars proved a big job for the wreck-crew, but, after several hours of hard and steady work, they managed to get the

line open.
Fortunately the crew of engine 644 also escaped, but only by the narrowest margin. Both the fireman and engineer were down under the engine fixing the brasses when a sectionman, who was working nearby, saw the other train coming and warned them.

#### WHY DO YOU FAINT?

Sometimes from shock or fright, but usually because the system is weakened and depressed,—It lacks power to react from strain. This condition demands rebuilding, strain. This condition demands rebuilding, demands nourishment, which is hest supplied by Ferrozone. In every form of debility Ferrozone is a specific. It tortifies the digestive and assimulative power of the body, promotes the elimination of waste materials, builds up tissue, gives energy and resistance. To have rich, red blood, enduring nerves, a strong constitution and lasting good health, use Ferroxone. Sold everywhere in 50c bozes or six for \$2.50.

#### BY-LAW NO. 11, 1907 OF TOWNSHIP OF WARWICK.

A By-law to provide for drainage work in the Township of Warwick in the County of Lambton, and for borrowing on the credit of the municipality the sum of \$503.00 for completing the same. Pro-visionally adopted the 7th day of Oct., 1907.

Whereas the majority in number of the resident and non resident owners (exclusive of farmers' sons not actual owners, as shown by the last revised assessment roll), of the property hereinafter set forth to be benefitted by drainage work, have petitioned the Council of the said Township of Warwick, to have the drain known as the McGill-Sisson award drain, (being in the fourth and fifth concessions, S. E. R., from lot 5 to lot 7 inclusive), repaired under The Ditches and Watercourses Act. The drain to be known as the Sisson Local Drain.

to be known as the Sisson Local Drain.

And, whereas thereupon the said Council has procured an examination, to be made by C. A. Jones, being a person competent, for such purpose, of the said area proposed to be drained and the means suggested for the drainage thereof, and of other lands and roads liable to assessment under the Municipal Drainage Act, and has also propoured plans, specifications, and estimates of Municipal Dramage Act, and has also pro-cured plans, specifications, and estimates of the drainage work to be made by the said C. A. Jones and an assessment to be made by him of the lands and roads to be bene-tited by such drainage work, and of other lands and roads liable for contribution thereto, stating as nearly as he can the proportion of benefit, outlet liability and anyuring liability which in his opicion will be derived or incurred in consequence of be derived or incurred in consequence of be derived or incurred in consequence of ouch drainage work by every road and lot or portion of lot, the said assessment so made being the assessment hereinafter by this by-law enacted to be assessed and levied upon the road and lots or parts of lots hereinafter in that behalf specially set forth and described, and the report of the said C. A. Jones in respect thereof, and of

lots hereinatter in that behalf specially set forth and described, and the report of the said C. A. Jones in respect thereof, and of the said drainage work being as follows:—

Petrolea, Aug. 13th. 1907.

To the Municipal Council, Township of Warwick.

GENTLEMBE:—In compliance with instructions eccived from your Honorable body I have made an examination of the drain hereafter known as the Sisson Drain situate on the southerly portion of ot6 con. 6, S. E. R., and the 6.7 sideroad south of the Blind Line between cons. 5 and 6, S. E. R., of your township. Following is a more accurate description of its location: commencing at its head on the easterly side of the 6.7 sideroad 2 rods north of the Blind Line between con. 5 and 6, thence southerly along the easterly side of the sideroad 43 rods, thence westerly parallel with said Blind Line to the line between the easterly three-quarters and westerly one-quarter of lot 6, thence outherly along the easterly side of the sideroad 43 rods, thence westerly parallel with said Blind Line to the line between the easterly three-quarters and westerly one-quarter of lot 6, thence outherly along the statementoned line about 40 rods to the said Blind Line, thence in a north-westerly direction across the west ½ of 16 to and the greater portion of lot 5, con. 5, S. E. R.

It is now an open drain constructed under the Ditches and Watercourses Act and the parties interested have petitioned your Honorable Body to have the time of the Municipal Drainage Act with the request that if the engineer deems it advisable, it be made a tile drain or partly tile and partly open. In this respect I concur with their views and would recommend that a tile be laid beneath the bottom of the present drain following its exact course for the upper 250 rods, below which point the present drain becomes so crooked that I would recommend making them more gradual curves, still leaving the open drain.

I would also recommend extending the drain about 07 ods below the present end of the work, thus providing a mor

20 rods below the line between the e and w a or lot 5, con. 5.

I have chained, staked ond levelled the drain in stations of 2 chains or 8 rods each for the upper 280 rods and 1 chain or 4 rods each for the lower 80 rods, the total length being 300 rods or 90 chains. Stake "0" is at the head of the drain on the 6-7 sideroad and each stake is numbered the distance the is in chains or chains and links from stake "0". Stake 100 and 70.2 is where it turns west across the sideroad and lot 6, stake 34 is where it turns north along the centre of the w 2 of 10 t. 6, stake 44 is where it crosses the Blind Line, stake 80% is where the tiling ends and stake 80 is where the cpen drain ends on she w of lot 5.

and stake 90 is where the open drain enus on one we of lot 5.

I would recommend that a 6 inch tile be laid along the sideroad from stake o to 10x70, a 7 inch tile from 10x70 to 34 and an eight inch tile the remainder of the distance to stake 80%, the open drain below this will be 2½ ft, bottom width with sides sloped 1 hor, to 1 vert.

I have also prepared plan, profile, estimate of cost, specification of work and schedule of assessment on the lands affected, all of which I herewith submit.

Municipality for 6-7 sideroad 40 00 Total asemt lands and road .. \$503 00 SPECIFICATION OF WORK.

The contractor is to furnish all material requid all labor necessary for the completion o and all lacor necessary for an work.

The trench for the tile is to be dug with a perfectly even grade in the bottom and to follow the centre of the present open drain from st. 0 to 69; and from 69½ to 80% it is to follow the line of stakes to be dug out the numbered side thereof and about 6 it therefrom. The commissioner will set up stakes o pickets for the centre line of the trench, making a gradual curves as possible in all cases and the con

tractor will follow these stakes or pickets for the line of the trench. Where any abrupt ture occurs the ends of the trie shall be bevelied a little by sawing them in order to make a closer Joint more particularly at at 10x70 and at 34. The tile are to be evenly and neatly laid with close joints and in perfectly straight lines excepting where bends occur. No tile to be covered up until 1 is inspected by the commissioner. It is then to be covered to a uniform depth of 1 foot where it is in the bottom of the treath of the straight lines excepting where bends occur. No tile to be covered up until 1 is in the bottom of the treath of the straight lines and to the full level of the natural ground where it is not in the bottom of present drain. The carried in the bottom of present drain. The arm of the full level of the natural ground where it is not in the bottom of present drain. The arm of the full level of the tile for an outlet into which the tile will empty, to be 1 of 1. long and 10 inches square inside. Indee of 2 inch pine or ceds, to have a plank over the end where the tile enters with a circular hole in such. the exact size of the 3 inch tile which will be inserted into it about 4 inches and then plugged perfectly tight. The trench for this box is to be made 2 inches deeper than that for tile figured on profiles or hat the bottom of the inside of the hox will be lovel with the treach for the tile. This exx to be thoroughly anchored in its position to the satisfaction of the commissioner.

The open drain from the mouth of the tile to st. 90

cheen for the file. This exx to be thoroughly anchored in its position to the satisfaction of the commissioner.

The open drain from the mouth of the tile to st. 90 to be dug to the depths shown on profile, 2½ ft wite in the bottom, side slopes 1 hor, to 1 vert., with an even grade in bottom throughout.

The earth is all to be cast in the low ground and none left closer than 3 ft. from the edge of the drain. The depths or cuts in all cases are from the ground beside the stake on the numbered side thereof and are to govern in preference to those in red which represent approximately the depth of the tile or open drain as the case n ay be below the present bottom.

Should any error appear in the figured 'epth at any st-ke, the grade of the bottom is still to be made to conform with that shown on profile.

All the work to be done, and material furnished to the entire satisfaction of the commissioner in charge of the work.

All the work to be done, and material furnished to the entire satisfaction of the commissioner in charge of the work.

I have the honor to remain,
Your obedient servant,
C. A. Jones, O. L. S. C. E.

And whereas the said Council are of opinion that the drainage of the area described is desirable,
Therefore the said Municipal Council of the said
Township of Warwick, pursuant to the provisions of The Municipal Drainage Act, enacts as follows:
1st. The said recort, plane, specifications, assessments and estimates are hereby adopted, and the drainage work therein indicated and set forth shall be made and constructed in accordance therewith.
2nd. The Reeve of the said Municipality may borrow out the credit of the corporation of the said Township of Warwick the sum of \$503.00, being the funds necessary for the work and may issue debentures of the corporation to that amount in sume of not less than \$50.00 each, and payable within 4 years from the date thereof, with interest at the rate of 4 per centum per annum, that is to say in 4 equal annual payments such deber tures to be payable at the Treasurer's office. Warwick, and to have attached to them coupons for the payment of interest.

3rd. For paying the sum of \$22.50 the amount charged against the said lands for outlet liibility, apart from roads belonging to or controlled by the Municipality, and for covering interest thereon for four years at the rate of 4 per centum per annum, the following total special rates over and above all other rates shall be assessed, levied and collected in the same manner and at the same time as other taxes are levied and collected upon and from the undermentioned lots and parts of lots, and the amount of the said special rates and interest areain-t each lot or part of lot respectively shall be divided into 4 equal parts, and one such part shall be divided into 4 equal parts, and one such part shall be divided into 4 equal parts, and one such part shall be divided into 4 equal parts, and one such part shall be divided into 4 equal parts,
