

CAMPBELL'S

Manchester, England

NIKOSOPE

"NICO-SOAP"

(Registered)

AND PREPARED BORDEAUX MIXTURE

"IMPROVED"

Campbell's "Nikosope" has been tested, tried and recommended by the leading fruit growers of Canada as the most effective spraying insecticide yet introduced for the destruction of caterpillars, canker worms, scales, brown-tail moth, codling moth, bark lice and all other insects attacking fruit trees. Free booklets containing description, directions for use, testimonials of prominent fruit growers, mailed on request. "Nikosope" is instantly soluble and will not clog in the nozzle of any spraying apparatus.

Campbell's Prepared Bordeaux (improved) is instantly soluble—does not settle or clog—has glutinous properties—adhesive to foliage—not easily washed off—thus vastly superior to the home-made article—always uniform in strength—no danger of burning foliage—large quantities prepared in a few minutes without any trouble or dirt.
