Toronto Markets.

"CANADA FARMER" Uffice, Feb. 15, 1866.

The Grain and Provision markets still remains dull, the receipts by farmer's waggons being very light. Rather larger supplies of wheat have, within the last few days come forward by cars, and prices have, if anything, declined.

The stoppage of the importation of cattle into the United States has begun to have its effect upon our marks so Beef, which formorly sold, retail, at 12), etc. por th, now sells at 10 cts.. There has been a much larger supply of cattle that usual in the market and p. i.es have fallen fully 20 per cent. Toronto and Montreal are now the only large cattle markers at the command of drovers, it is therefore possible that before long a sail further accime in the price of live stock will take place.
