The Delacola mineral claim is situated one and one-half miles due north of the town of Rossland, on the north slope of the famous Monte Cristo mountain, and adjoins the well-known Eric. It is a location 1,500 feet square and contains 37 acres. The company, which is composed entirely of Rossland men, has been incorporated under the laws of the Province of British Columbia. The claim has been surveyed and a crown grant applied for. There is no flaw in the title and the certificate of improvements will be issued in due course. The company has no indebtedness.

Timber and Water Supply. A luxuriant growth of timber, consisting of fir, pine, tamarack and cedar is standing on the claim and is sufficient to supply wood for fuel and timber for mining and building purposes for some time to come.

There is a never-failing supply of water in the shape of a creek at the bottom of the gulch.

Transportation Facilities. A first-class wagon road runs within a half a mile of the workings on the claim, while the preliminary survey lines of the north spur of the Red Mountain Railway, now in course of construction between Northport and Rossland, pass through one end of the claim.

Vein and Ore. The Delacola has a well-defined east and west vein which passes through the center of the claim. This vein has been traced for a distance of 600 feet, and several open cuts have demonstrated beyond question the certainty and regularity of the ledge. The ledge has an average width of four feet. The ore streak is eighteen inches wide and is very well defined. The ore is a chalcopryite and pyrrhotite in a good quartz gangue. Assays as high as \$8.80 in gold have been obtained from this ore.

Development Work. In addition to the numerous open cuts across the vein the company has started out and are now busily engaged in sinking a shaft on a very favorable outcrop. To continue this work and sink the shaft to a depth of hundred feet before cross-cutting and drifting are commenced, the directors have decided to place a block of 50,000 shares of the treasury stock on the market at the extremely low price of 4 1/2 cents per share.

TO BE SOLD FOR DEVELOPMENT PURPOSES ONLY.

The Orphan Boy Mineral claim is situated about five miles from Gold Stream up McCulloch Creek on the West Fork or commonly known as Barrett Creek, and about 65 miles north from Revelstoke, B. C., in the country known as the Big Bend of the Columbia River.

The company will push the development of the Orphan Boy with all possible dispatch. The Orphan Boy being a free milling and Cyanide property it does away with all expense of shipping ore to be treated or smelted outside. The surface showings being of such high grade, guarantee excellent results and steadily increasing stock values as development progresses.

Four assays from surface returns were respectively \$6.50, \$10.00, \$72.00 and \$140.00. A mill test recently made shows \$39.20.

A limited number of Treasury Shares will be disposed of at 10 cents per share for first cash requirements, subject to advance without notice.
