

land Flora. But it is otherwise with the other plants. There are peculiar genera, *Lyallia*, and this is decidedly an Andean form; others are allied to plants of Terra del Fuego, one is a variety of a New Zealand plant and there are some European aquatics. The Flora of Kerguelen's land is extremely close in affinity to that of Terra del Fuego, so close indeed that it was obviously derived for the most part from thence. It is all the more remarkable that this relationship should be so strong and unmistakable when we consider that the Mother Country of its Flora is not that which is nearest to it, as was the case with all the Islands already noticed, but that which is the most distant from it.

[TO BE CONTINUED.]

DOMESTIC RECEIPTS.

ONION SAUCE.—Take six moderate sized onions, and boil them till quite soft, changing the water once or twice while they are boiling. Mash them with a spoon, add half a pint of milk, an ounce of butter, a teacup-ful of bread-crumbs, a little salt, a grate or two of nutmeg, boil it two minutes. A table-spoonful of flour may be used instead of the bread-crumbs, if preferred.

SOUP MAIGRE.—Flour and fry a quart of green peas, four onions sliced, one carrot, one turnip and one parsnip. Pour on them three quarts of water. Let it simmer till it will pulp through a coarse sieve. Give it one boil and serve it.

SALT FOR FOWLS.—With respect to the question of salt for fowls, it is quite certain that any large quantity of it is injurious, often causing loss of feathers; but I have long given it in moderation with decided benefit—just as much as to season the soft food of the birds to my own taste. In such measure I am convinced that chickens grow better, and make more healthy flesh, and that fowls for exhibition come into better condition and keep in better health.—*Nemo, in Cottage Gardener.*

ADVERTISEMENTS!

Bull for Sale!

A SUPERIOR DURHAM BULL, the property of the Union Agricultural Society of E. Cornwallis. This Bull is only offered for sale to prevent breeding in-and-in, as he has been in the Society two years. He is a fine animal, four years old, very smart, in good condition, and would be a valuable acquisition to another Society, or to a community where his stock is not coming in. Will be sold cheap for cash. Apply to any of the subscribers.

- A number of Berkshire PIGS.

W. M. ALLAN,
Auctioneer.

August, 1867.

Churning made Easy & Butter Good.

TOMLINSON & CO.'S BUTTER POWDER.

BY the use of this inexpensive Powder the churning of hours is reduced to minutes, and is applicable to the making of Butter at all seasons of the year; a small quantity added to the Milk or Cream at the time of churning will produce Butter in much less time, in larger quantity, and of a superior quality, flavour, and consistency, so much so that it increases its value from 1d. to 2d. per lb. In winter it removes the unpleasant flavour caused by the cows feeding on turnips, cake, mangolds, weeds, &c.; and in summer the rancidity peculiar to some Butter, also makes it firmer and sweeter even in the hottest weather.

Butter made with this Powder invariably takes the prizes at the Agricultural Shows throughout the Kingdom.

Sold by the principal Druggists and Storekeepers throughout the Colonies, in boxes at 3d. 6d., 1s., 2s. 6d., and 7s. 6d. each; and wholesale of the Manufacturers,

TOMLINSON & HAYWARD,
Chemists, Lincoln, England.
AVERY, BROWN & CO.,
Halifax, N. S.
