

ABOVE EVERYTHING ELSE,

Dr. Pierce's Golden Medical Discovery purifies the blood. By this means, it reaches, builds up, and invigorates every part of the system. For every blood-taint and disorder, and for every disease that comes from an inactive liver or impure blood, it is the only remedy so sure and effective that it can be guaranteed.

If it fails to benefit or cure, you have your money back. These diseases are many. They're different in form, but they're like in treatment. Rouse up the torpid liver into healthful action, thoroughly purify and enrich the blood, and there's a positive cure. The "Discovery" does this,

as nothing else can. Dyspepsia, Indigestion, Biliousness; all Bronchial, Throat, and Lung Affections; every form of Scrofula, even Consumption (or Lung-scurfula) in its earlier stages; and the most stubborn Skin and Scalp Diseases, are completely cured by it.

EXPERIENCE.

"Over a month ago I commenced using ST. LEON Mineral Water. I find it invigorating to the system, and a strengthener of the stomach and liver. Before using it I was affected with periodical attacks of rheumatism, but a few weeks' use of this water freed me from them. I use it daily.

A safeguard against infectious diseases. Sold by chemists throughout the world. W.G. DUNN & CO. Works--Croydon, England.

MISCELLANEOUS.

Many a woman will pass for elegant in a ball-room, or even at a court drawing-room, whose want of true breeding would become evident in a chosen company.—Leigh Hunt.

Our desires always increase with our possessions. The knowledge that something remains yet unenjoyed, impairs our enjoyment of the good before us.—Dr. Johnson.

He that would die well must always look for death, every day knocking at the gates to the grave; and then the grave shall never prevail against him to do him mischief.—Jeremy Taylor.

The same dew, which sometimes on the buds was wont to swell like round and orient pearls, stood now within the pretty floweret's eyes, like tears that did their own disgrace bewail.—Shakespeare.

Pretty electric light shades are now made of paper. They come in the shape of a tulip or lily, morning-glory, are coloured in natural tints, and then slipped over the glass bulbs.—New York World.

The most fascinating women are those that can most enrich the every-day moments of existence. In a particular and attaching sense, they are those who can partake our pleasures and our pains in liveliest and most devoted manner. Beauty is little without this; with it she is triumphant.—Leigh Hunt.

IT SAVED HIS LIFE.

Gentlemen,—I can recommend Dr. Fowler's Extract of Wild Strawberry, for it saved my life when I was about six months old. We have used it in our family, when required, ever since, and it never fails to cure all summer complaints. I am now fourteen years of age.

Francis Walsh, Dalkeith, Ont.

Because half a dozen grasshoppers under a fern make the field ring with their importunate chink, whilst thousands of great cattle, reposing beneath the shade of the British oak, chew the cud and are silent, pray do not imagine that those who make the noise are the only inhabitants of the field.—Burke.

If we work upon marble, it will perish; if we work upon brass, time will efface it; if we rear temples, they will crumble into dust; but if we work upon immortal minds, if we imbue them with principles, with the just fear of God and love of our fellow-men, we engrave upon those tablets something which will brighten to all eternity.—Daniel Webster.

A CHILD SAVED.

My little boy was taken very bad with diarrhoea, he was very delicate, and got so low that we had no hope of his life, but a lady friend recommended Dr. Fowler's Extract of Wild Strawberry, and, although he could only bear a few drops at a time, he got well. It saved my child.

Mrs. Wm. Stewart, Campbellville, Ont.

To prevent the corroding or "pitting" of propeller shafts by chemical action with the sea water, brass castings or liners, usually of a thickness of three-eighths to one-half inch, are shank on in lengths. The objections to these have been their liability to burst and for the joints of the various lengths to give way. A Sheffield man has now come forward with an invention, by means of which copper, or an alloy of copper, is electrolytically deposited upon the shafts instead of employing the lining or casings. A suitable thickness of copper or alloy has been found to be about one-sixteenth of an inch. By this means all danger of the lining's giving way is avoided, whilst a great saving of weight is effected, and at the same time the electro-chemical action is entirely obviated.

BISHOP STRACHAN SCHOOL
FOR
YOUNG LADIES

Full English Course Languages, Music, Drawing, Painting, etc. For Prospectus apply to
