members of the different union to de-clare a strike, but it is not known how they will act. The local painters and decorators went on strike for some time, demanding 35 cents an hour, and altho the strike was never settled they are back at work at the increased rate. Some of the linemen of the Dominion power and Transmission Co. are still on strike demanding the same rate of pay as is received by the hydro linemen. Molders in three shops have been out on strike for the last month. No set-tlement is yet in sight. Water Shortage. Toronto is not the only city that is having trouble with its water supply. Owing to repeated breaks in the tank of the mountain waterworks system, the residents on the mountain are being sup-plied with water from the watering carts. Mayor Allan thinks that as the moun-tain district is growing so rapidly the time is not far distant when the residents will break away from the city and form a municipality of their own.
