

Judging Seed

From 8.30 until 9.40 of each day will be spent in the study of the Seeds of the principal farm crops and of the most troublesome weeds of Ontario. Lectures will be given on the purity and the germination and on the cleaning, the selecting, the grading and the improvement of Seed. The judging of oats, barley, wheat, peas, corn, grasses, clovers and the seeds of various fodder crops will be a prominent part of the Course. The weed seeds most commonly found in grass and clover seed will be identified and examined. The Course will be conducted by C. A. Zavitz, Professor of Field Husbandry, assisted by J. Buchanan, Lecturer in Field Husbandry, and by J. E. Howitt, Demonstrator in Botany.
