father-in-law of Dr. Ella Synge, of Vancouver, who is also in Lordon at the present itme, on her return from Serbia, where she has had a wonderful experience of dodging shells during the bombardment of Batochina, in which town she was stationed. Over six feet in height and half way over the 72-year mark, Mr. Synge stands as erect as the fir tree did originally, which is now lying high and dry on the towpath at Kew Gardens,

and which, the fallen, is to rise again as a useful ornament in the gardens. "They call it a flag-pole," said Mr. Synge, with a whimsical drawl, "but it looks more like a monument, and it will take some doing to hoist it, too, I'm thinking." Mr. Synge had not only heen a timber cruiser but a gold pros-pector in British Columbia in the arly sixties. "It is really a beautiful piece of timber sculpture," he remarked, and proceeded to give the following details. The pole is 215 feet long, three feet square at the butt, which extends to about six feet and then tapers very

gently. Where the tapering begins is chantered into an octagonal to 21 feet at the top. All the octagonal parts, continue their tapering artistiparts, continue their tapering artistically, and having been broadened and afterwards planed, leave no mark of the ax. The last 21 feet is the natural round of the tree, measuring a foot in diameter. "There's another peculiarity about it,
