GUNS DESTROY FISH

London, Eng., April 18—Gunners practice by warships is believed to be the cause of the failure of the Fourth herring fishing. Quantities of nets, valued at four times pre-war prices, have been lost by the fishermen.

WEST INDIES SUGAR CROP FOR 1919-20

Exports of Sugar and Molasses Last Year Were 24,000 Tons Below Estimate.

(Montreal Gazette.) The quantity of sugar and molasses exported from the West Indies last year fell below the estimate by nearly 24,000 tons. Slight increases over their estimates were made in Jamaica, Barbados, St. Kitts and St. Vincent, but a shortage of 30,000 tons occurring in Trinidad and British Guiana left the net total shortage as stated above. In British Guiana the shortage was accounted for by the scarcity of labor in the colony, but in Trinidad there was no apparent good reason why there should have been a shortage. To quote the Trinidad Monthly Produce Report and Statistics, "There was every inducement in the matter of remunerative prices to stimulate production. Favorable weather seemed to further justify the hope of a bumper crop, if not a record crop, yet the ultimate result was most unsatisfactory, and the most reasonable explanation, perhaps, might be found in the difficulty experienced in obtaining sufficient artificial manures."

In the statement of the export of sugar given in the present table, and also in former reports on the subject, cane sugar is stated in terms of sugar is included, three puncheons of syrup being taken as equal to one ton of sugar. The total export of these together amounted to 267,247 tons. The quantity of sugar exported, without including syrup, was 239,888 tons, a good pre-war average, and the quantity of syrup and molasses was 28,027 puncheons, of which Barbados exported 8,111 puncheons. The following table gives the quantity of sugar exported last year, and an estimate of the crop for the present year, which includes syrup equated to sugar.

given in the present table, and is based on former reports on the subject. The quantity of syrup, stated in terms of sugar, has been included, three puncheons of syrup being taken as equal to one ton of sugar. The total export of these together amounted to 267,247 tons. The quantity of sugar exported, without including syrup, was 230,983 tons, a good pre-war average, and the quantity of syrup and molasses was 93,027 puncheons, of which Barbados exported 51,111 puncheons.

The following table gives the quantity of sugar exported last year, and an estimate of the crop for the present year, which includes syrup exported to sugar.

The Hacking Cough Strains The Lungs

The terrible, hacking, lung-wrecking cough that sickens you in spite of everything you have done to get rid of it is a great source of danger to your health, and the longer it is allowed to stick the more serious the menace becomes.

You can easily get rid of the cough or cold at its inception by using Dr. Wood's Norway Pine Syrup, a remedy that has been universally used throughout Canada for the past 30 years.

Mrs. Samuel Matthews, Portage, P. E. I., writes:—"Last winter I caught a heavy cold, and was laid up for some time. I had such a hacking cough I could not sleep at night, and did not think I could ever get over it. One day a friend dropped in to see me, and was surprised to see how bad my cough was. She advised me to use Dr
