That's the personal question a woman asks herself when she reads of the cures of womanly diseases by the use of Dr. Pierce's Favorite Prescription.

Why shouldn't it cure her?

Is it a complicated case? Thousands of such cases have been cured by "Favorite Prescription." Is it a condition which local doctors have declared incurable? Among the hundreds of thousands of sick women cured by the use of Dr. Pierce's Favorite Prescription there are a great many who were pronounced incurable by local doctors. Wonders have been worked by "Favorite Prescription" in the cure of irregularity, weakening drains, inflammation, ulceration and female weakness. It always helps. It almost always cures.

"Three years ago," writes Mrs. John Graham, of 2018 Plumb Street, (Frankford) Philadelphia, Belt me with heart trouble, and also a very weak back. At times I was so bad that I did not know winat to do with myself. My children advised me to take your 'Favorite Prescription,' but I had been taking so much medicine from the doctor that I was discouraged with everything. I came to Philadelphia two years ago, and picking up one of your little books one davised. I determined to your astrong well woman, weighing 160 pounds. Have gained 29 pounds since I started to use 'Favorite Prescription.'" Dr. Pierce's Pleasant Pellets clear the complexion and sweeten the breath.

Dr. Pierce's Pleasant Pellets clear the

## complexion and sweeten the breath. SILVER-LEAD MINERS.

The Deputation Interviewing Montreal Paint Manufacturers.

Montreal, Jan. 12.—A deputation consisting of Messrs. John L. Reteclack, Chairman of the Lead-Silver Miners' Association of East and West Kootenay; Geo. G. Potter, member of the Lead Miners' Committee, and G. O. Buchaman, representing the United Boards of Trade of Kootenay, arrived here last night to make final arrangements with consumers of lead and manufacturers of paint for the settlement of the basis upon which the Dominion Governme t would be asked to increase the tariff on all kinds of pig and white lead. At the meeting of the representatives of all the mines held at Sandon. B.C. the day before they started for Montreal, it was unanimously decided to get the eastern manufacturers to assist in securing a protective duty of 2 1-8 cents per pound on pig lead and a proportionate protective duty on white lead. Montreal, Jan. 12.-A deputation

### South Africa Pensions.

South Africa Pensions.
Ottawa, Jan. 12.—It was officially announced in August last that an Imperial pension would be granted to the widows and orphans of Canadian non-commissioned officers and soldiers who fell in South Africa, just as in the case of the dependants of deceased British regulars. Now the Imperial authorities have cabled asking the Canadian Government if they will ascertain who are entitled to the pension and act as agents if r the War Office in paying the same. The matter has not yet been brought "office the Cabinet, but it is likely that an affirmative reply will be sent

## REMARKABLE SUCCESS

## Of a New Catarrh Cure

A large and constantly increasing majority of the American people are catarrh sufferers. This is not entirely the result of our changeable climate, but because modern investigation ate, but because modern investigation has clearly proven that many diseases, known by other names, are really catarrh. Formerly the name catarrh was applied almost exclusively to the common nasal catarrh, but the throat, stomach, liver, bladder, kidneys and intestines are subject to catarrhal diseases as well as the nasal passages.

In fact, wherever there is mucous membrane there is a feeding ground for catarrh.

The usual remedies, inhalers, sprays, douches or powders, have been practically and the provided the provided that the provided the provided that the provided the passage of the funeral cortege.

Rome, Jan. 12.—The Pope learned of King Alforso of Scain. He received the news with a ceptional concern, and dictated a teleg um to his godson, congruintly in the provided the provided that the provided the provided that the provided the provided that the provided that the provided that the provided the provided that the provided the provided that the provided that the provided the provided the provided the provided the provided the provided that the provided the provided that the provided the provided the provided the provided the provided that the provided the provided the provided that the provided the provided that the provided the provid

passages.

In fact, wherever there is mucous membrane there is a feeding ground for catarrh.

The usual remedies, inhalers, sprays, douches or powders, here been made to be a company to the company that the com for catarrh.

The usual remedies, inhalers, sprays, douches or powders, have been practically failures, as far as anything more than temporary relief was concerned, because they simply dry up the mucous secretions, without having the remotest effect upon the blood and liver, which are the real sources of catarrhal diseases.

It has been known for some years that the radical cure of catarrh could never come from local applications, but from an internal remedy, acting on the blood and expelling the catarrhal poisons from the system.

A new internal preparation which has been on the market only a short time, has met with remarkable success as a genuine, radical cure for catarrh.

### NOT AT ALFONSO.

WOULD-BE ASSASSIN DID NOT AIM AT SPAIN'S KING.

Fired at a Carriage as Royal Procession Was Passing From Church-His Statement.

Madrid, Jan. 12.-As King Alfonso, Queen-dowager Christina and the Court were returning from church Saturday sternoon a man who afterward gave his name as Feito fired a piscol at one of the carriages in the royal procession. The bullet went wild and no one was injured. The King heard the shot and put his head out of the carriage window, but he was immediately dragged back into his seat by the Queen-mother, who was seated beside him in the carriage. The escort of Cavil Guards immediately threw themselves upon the would be assassin and overpowered him. Feito was taken to the police station, where he said he did not desire to kill the King, but the Grand Chamberlain, the Duke of Sotomayor, at whose carriage he had aimed. He was searched and in his pocaets were found unmailed letters marked "Registered," and addressed to President Roosevelt, King Edward, the emperor of Germany and the President of the High Court of Justice at Mexico, and also receipts for a number of registered letters and a visiting card of the Mayor of Mad-Queen-dowager Christina and the Court for a number of registered letters and a visiting card of the Mayor of Mad-

a visiting card of the Mayor of Madrid.

Feito was later put under examination by a magistrate, to whom he repeated his statement as to the object of his shooting. He insisted that he was not an Anarchist, and said that his wife, a Frenewoman, had confined him in a lunatic asylum. The prisoner, in making this statement, did not appear excited, but there are indications that he is insane. The Minister of Interior has telegraphed to the Prefects in the Provinces that the attempt was directed against the Grand Chamberlain, and not against the King.

A police sergeant, who was the first to seize Feito, makes the following

to seize reito, makes the following statement:—

After the King's carriage had passed, Feito, who was standing in front of me, raised a pistol and fired at the second carriage in the procession. Before he could fire a second time I struck him with my acred. He said (W.) second carriage in the procession. Before he could fire a second time I struck him with my scord. He cried, "You wish to kill me, but I seek the life of the Duke of Sotomayor, who is the cause of all my troubles." The Duke of Sotomayor, however, was not in the second carriage, which was occupied by the Marquis de la Mina, the court grand equerry, and two police officials. After the shooting the people gathered along the route from the church to the palace, giving the King an ovation as the royal carriage proceeded slowly towards the royal residence. The Prefect of Madrid, who was in the last carriage, left the procession, and gave orders for Feito to be taken to the police station. Feito is 34, and was born at Posatdas, in the Province of Oviedo. He returned to Spain from Mexico last June. He was slightly out in the head by the Police Sergeant's sword. Questioned as to what reasons he head for buthe. He was signify out in the head by the Police Sergeant's sword. Ques-tioned as to what reasons he had for wishing to kill the Grand Chamberlain, the prisoner said the Duke of Soto-mayor had offered him a position at the palace, but had failed to fulfill his pro-

palace, but had failed to fulfill his proanise.

Paris, Jan. 12.—The correspondent at
Brussels of Ine Ma'in telegraphs that
the police of Madrid have wired to the
authorities in Brussels a request that
Rubino, the man who fired three shots
at the King of Belgium in Brussels on
Nov. 15, and who is now waiting trial,
be interrogated, with a view to obtain
further light regarding Feito's attempt,
Madrid, Jan. 12.—The prisoner was
examined again to-day. His bearing
during the questioning confirmed the
previous reports that he is suffering
from monomania. A careful official inquiry has shown that he is not connected with Anarchists. A dynamite bomb,
which was sent here by rail in a box
from Barcelona, has been found at the
railroad station. All attempts to ind
the consignee of the box have been fruitless. The bomb reached here the day
before the funeral of Senor Sagasta,
and is supposed to have been for use
tege.

Rome, Jan. 12.—The Pope learned

Tissot and the Aloe.

Tissot, the distinguished painter, who died recently, while at work on his 'Life of Jesus,' took extraordinary pains to have every detail absolutely correct, and he flattered himself that he had not made a single error until one day, when he happened to show a critic a water color drawing in which the parable of the barren fig tree was depicted.

Knowing that this drawing was intended to form part of the series en-

Knowing that this drawing was intended to form part of the series entitled, "Life of Jesus," the critic examined it very carefully, and finally said: "I am just wondering why there are so many aloes in this garden. Do you intend the scene to be typical of the time of Christ, or is it an ordinary scene, suitable for any time?"

time?"
"My sole object in painting that garden was to depict a familiar scene in the life of Christ," answered the painter, "and I assure you that I have taken the utmost pains not to introduce into the scene anything which would be out of harmony with

which would be out of harmony with that epoch."
"Nevertheless, you have made one blunder," replied the critic, "for it is a well known fact that aloes were not introduced into the Holy Land, nor into any of the countries adjoining the Mediterranean, until after the conquest of Mexico by the Spaniards."
Thisot at once laid aside all other work, and did not rest until he had removed the objectionable aloes from the garden.
