

GENUS DENDROICA.

(650) **Cape May Warbler.**
(*Dendroica tigrina*.)

A rare summer visitor; most frequently seen in the spring. About three years ago I met with rather a large flock of them in the autumn migration, the only time I have seen them at that season. Probably breeds in the interior, as nests have been found in New Brunswick and in Maine.

Yellow Warbler.

(652) **Yellow Warbler**
(*Dendroica aestiva*.)

A very abundant summer resident. Breeds throughout its range in the Province.

Arrives early in May, departs about the end of August.

(654) **Black-throated Blue Warbler.**
(*Dendroica caerulescens*.)

Common in the migrations in southern Ontario, breeding sparingly in the south and more commonly in the interior.

Arrives early in May; departs at the end of September.
