

fably, that this new latch eliminates this disagreeable feature entirely.

It is in use on the experimental farms of 42 agricultural colleges, which fact certainly argues well for it.

This company is making a very interesting proposition to those who have not tried this new device. For particulars we refer to the advertisement elsewhere in this paper. We regard it as a good offer to take advantage of.

#### The 1907 Girl Yours for the Asking

Have you made her acquaintance? Now is your only chance. After much trouble and expense, The Sharples Separator Co., of West Chester, Pa., have succeeded beyond their hopes in reproducing from life, in the softest and daintiest colors, the sweetest dairy maid that ever graced a cream separator calendar or was ever offered by any cream separator company as a free picture suitable for framing. This calendar and this free picture are like the Sharples Dairy Tubular Cream Separator—you can't appreciate either of them until you see them. Worthy a place in every home. The Sharples Separator Co. will send the calendar with this picture on it to you free, for the names of two neighbors who keep cows but have no Tubular Cream Separator. Or they will send free the same picture, made larger for framing and without the calendar pad attached, for the names of five neighbors who keep cows but have no Tubular Cream Separator. Calendar and picture both sent free for names of seven neighbors who keep cows but have no Tubular. Write at once before the supply is gone, sending two names for the calendar with the picture on it, or five for the large picture without calendar pad attached, or seven for both. You must mention the name of this paper to get them. Address The Sharples Separator Co., West Chester, Pa., Chicago, Ill., Toronto, Can.

## Make Sure —of Success

**A**FTER spending all the time and money necessary to properly prepare the soil and after finishing the work of seeding, you cannot afford to take any chances on harvesting the crop.

The great element of safety and success in this work depends upon selecting the proper harvesting machine.

Taking everything into account, the McCormick binder will meet the most exacting requirements.

This is true not only because of the cutting and binding capacity of the machine, but also because of its easy draft, ease in handling and its remarkable strength and durability.

It is impossible in this small space to set forth the meritorious features of the McCormick binder in detail.

Someone in every community has a McCormick. Before you buy a binder ask this man about it.

Ask him if it has not given better service than any other binder he ever owned.

Ask him if it has not always been ready for work, and if it has not worked well in all kinds and conditions of grain.

### THERE ARE NO "WEAKLINGS" IN FROST WIRE FENCE

From top to bottom it is a distinctly superior fence.

A special grade of No. 9 heavy coiled wire is used for the laterals, which are securely locked to the stiffest kind of No. 7 heavy hard steel wire stays. Built entirely of hard steel material and not weakened by any peculiar kinks or knots, the Frost Fence may be justly to meet the "better fence"—the longest-lasting, most economical fence to buy.

The greater strength of the Frost Fence makes it exceptionally well-suited for a hog fence. With the additional short stays at the bottom (as shown in illustration) the little pigs are effectually prevented from squeezing their way out. The weight, strength and rigidity of the Frost makes it a waste of effort for your most ambitious rooter to attempt to get under the fence.

You really cannot afford to overlook the Frost when you buy, so write us to-day for our free Illustrated Catalogue, which gives a complete detailed description.
