

What a DE LAVAL Cream Separator SAVES

Over any other Separator or Creaming System

QUANTITY of cream that no other separator will recover completely, particularly under the harder conditions of every-day use.

QUALITY of cream as evidenced by De Laval butter always scoring highest in every important contest.

LABOR in every way over any gravity system, and also over any other separator, by turning easier, being simpler, easier to clean and requiring no adjustment.

TIME by hours over any gravity system, and as well over any other separator by reason of greater capacity and the same reasons that save labor.

COST since while a De Laval Cream Separator may cost a little more than a poor one to begin with, it will last from ten to twenty years, while other separators wear out and need to be replaced in from one to five years.

PROFIT in more and better cream, with less labor and effort, every time milk is put through the machine, twice a day, or 730 times a year for every year the separator lasts.

SATISFACTION, which is no small consideration, and can only come from knowing you have the best separator, with which you are sure you are at all times accomplishing the best possible results.

EASILY PROVEN—these are all facts capable of easy demonstration and proof to any user or intending buyer of a cream separator. Every De Laval agent is glad of a chance to prove them by a De Laval machine itself—without the slightest obligation to the prospective buyer unless entirely satisfied.

If you don't know the nearest De Laval agent simply address the nearest main office as below.

DE LAVAL DAIRY SUPPLY CO., Ltd.

Boys, Do Your Friends a Favor !

Call on your boy friends. Explain "The Farmer's Advocate" to them. Show them this issue. Tell them about our New Department for farm boys and young men. Show their fathers that this is the farmer's paper, the household paper and the friend of the family. Tell them we'll answer their questions free. Give them the benefit of the practical knowledge and experience of our large staff, as well as of our thousands of contributors. Get them to subscribe. For each new subscription we give you 50 cents cash, or send you "The Farmer's Advocate" for six months, which is 75 cents cash. Address:

THE WM. WELD CO., LIMITED, London, Ontario

THE WRONG OIL RUINS YOUR SEPARATOR

To lubricate your separator with ordinary or general-utility oil is one of the quickest ways of sending it to the junk pile. You need a special oil for the finely adjusted mechanism of this delicate farm machine.

Standard Hand Separator Oil

is made especially for cream separators—and for that reason it will most satisfactorily lubricate your machine. It keeps the bowl spinning smoothly and enables you to get *all* the cream. It doesn't "gum." Saves repair expense. Ask your dealer.

WITH LOUDEN EQUIPMENT

IT IS EASY

Your time during haying and harvest is most valuable. Save one-third of it by using Louden Hay Tools. They enable you to move larger loads easier and faster than in any other way. There are no delays at the barn for the user of Louden equipment. Louden Carriers with forks or slings will handle the loads safely and surely, and just as fast as they can be drawn from the fields.

THE LOUDEN JUNIOR CARRIER

Is at all times safe and dependable, because of its simplicity and its strength. For twenty years it has been standard, and on thousands of farms it is to-day giving excellent service.

THE LOUDEN BALANCE GRAPPLE FORK

Set the tines of the fork deep into the load. It will lift an immense bundle and deliver it in the mow in even flakes, not tangled up as is the case when other forks are used. Handles clover, alfalfa, loose grain or straw, as clean as timothy.

Our catalogues will tell you all about the big Louden line. Write for them to-day. They are free.
