A. P. LESPERANCE,

eal, March 31st, 1902.

Then the old restlessness came over me again, and for many years I tra-velled around lecturing and preach-ing. My travels extended to South-

landi and there again I came into contact with Catholicism and Catholic priests. Once more the recollect tion of days gone by, the memorie A Recent Convert. of boyhood became animated, and the soft vibrations of chords long untouched, almost forgotten, made themselves felt and demanded recog-In the first instance I wa inclined to ascribe the sensation to a ns is that of Mr. Rudolf disordered mind. I hoped and pray ed that the sensation would pass by seven in all. For some years he and leave me again in a proper "Pro testant" frame of mind. But it was not a passing sensation. It was not momentary emotion. Deep down in the heart the still small voice was pleading day and night, demand-ing recognition, refusing to be comsons for entering the Catholic Church, and I confess that the task forted with the old worn-out phrases with the vain protests of a divided shaky apostasy. I knew and I felt is a most difficult one. There are tain questions which will not yield that I would have to make a clear breast of my doubts, and that I to human arguments. There are cercould not possibly go on in an un-settled state of mind, for I felt it n questions which will not be subwould be to live a He. Thus, on returning to the States, instead ut to me by both sides. Catholics

and my prospects for the future, and in searching the Scriptures went over to Rome." But is it preparing myself for the fin preparing myself for the final, the unavoidable step. My reasons? The intuitive, the satisfying knowledge that I was doing right, that the Catholic, and none but the Catholic Church was the Church of Christ, and that the Holy Father and nobody else is, or could be, the visible head of His Church. Some months ago I wrote to his early associations, which sooner or later are Grace Archbishop Corrigan, interview. I explained to him my position, my state of mind.

my literary labors, I spent my time

With his natural kindness and grace he met my difficulties, and introduced me to Rev. Father A. P. Doyle, of the Paulist Fathers, who instructed myself and family in the doctrines of the Catholic Church.

On the 22nd of February, 1902, (Washington's birthday), I, my wife and five children, were received into the Church at the Paulist Fathers' Church.

On the 24th of March we were privately confirmed by His Grace in the vestry of St. Patrick's Cathedral.

Almighty God and the Blessed Virgin have been wonderfully good to me and mine.

I dare not contemplate what my feelings would have been if any member of my family should have opposed my desire to join the Catholic ant ministry, and was ordained in Church.

As it is, we are all in the fold, land, I was ipso facto at war with all happy.-Rudolf Clement Altschul.

METHODS

(By an Occasional Contributor.)

We have but a faint idea, unless we pay very special attantion to all passing events, of what a multitude vide against each other upon every imaginable subject within the limits of religious discussion, but they invariably unite in their special antagonism regarding the Catholic Churchjust as if they deemed her to be outside the pale of Christianity. Every little sensational movement that spasmodically made by any denomination is reported, under the magniing in proportions. ple from the "Providence Journal"

fying glass of the anti-Catholic press and is passed along, ever multiply-Here is a san "A religious movement such as was never before known in the history of Block Island has swept all before it, bringing in converts of all ages and conditions and reclaiming those who had strayed so far and remained away so long that their religion was estimate, 500 people who either had and neglected its services have be come earnest workers, and the meetings held every week-day evening and twice on Sunday are so crowded as seriously to test the seating capacity

of both churches." This religious cyclone was comenced last January by two reversion, and has gone on gathering journalistic strength until it has become a hurricane. It is good that our Church is built upon a rock, or Bible says he saw the souls of the propriations necessary for the combefore the British Society of Arts, a paper on the subject having been and the total receipts to be \$228, read by E. else the the Rock Island tornado might sweep it out of existence. Then, while this tempest is abroad, the "Church Economist" tells us of the cash balance of \$1,300,000 possessed by the Congregational Church of New York city, and of pastor Jefferson's intention of turning the Broadway Tabernacle into a Congregational Cathenral. When this is done, it is claimed that they will still have a balance of \$775,000 of a church fund. Here we have the press and the millions in hard cash turned against us and erected into barriers to Catholic progress. Such some of the obstacles that the Church has to face and overcome in the Western hemisphere, while in the far East we find a perfect combina tion against her. It is thus that the Constantinople correspondent of the "Catholic Standard and Times

pictures the situation over there :-

"It is not only in France that the

Church is undergoing a period of travail. Catholics in the Orient are at the present time being subjected to a species of persecution that is almost unendurable. The religious congregations devoted to the regeneration of the East have been gled out by the Government, and the heavy hand of the law is laid upon them to the openly expressed delight of sectarians, Free Masons, Levantines, Jews, Greeks, Gregorians, Protestants and Moslems. Since the passage of the stringent law these elements publish exultant articles in the press which express delight at the approaching downfall of Catholicism in the Orient. There are grave fears that the exultation of these enemies of the faith is not ill founded. The example of France is not without its effects here, and there are those of us who dread the day when it will be necessary to abandon this territory consecrated by so many Christian souvenirs. The heretodox branches of the Church here denounce

the impolitic and treasonable act of the French sectaries for having endangered French influence by the pass of these iniquitous laws. They contend that in striking at religion these bigots strike at the French nation as well and they fear that the influence of their country will wane with the waning influence of the religious associations."

Irreligion in France, infidelity rampant in the bosom of so many Catholic countries, and the sectaries of away into irreligion in all parts of the world? Yet greater, more numerous, and mightier forces have in the past assailed her, while she triumphed over every enemy and proved the Divinity of her Founder and the immutability of her own organization by the perpetual carrying out to the letter of the promise given by

**** IMMORTALITY OF

Our Lord that He would be with her

unto the end of time.

SOUL. ******

THE

It is actually becoming a question to our mind whether the majority of tually believe in the immortality of moted to the rank of brigadier-genmission, has to contend against. To right and to left are the combined vital force that vanishes at the hour brother of the famous General "Phil" enemies of Catholicity—and they are ing a number of reports of lectures, ing a number of reports of lectures, of death. We have of late been read- Sheridan, who died in 1888. clergymen of different denominations -all dealing with the soul and a future state,—and actually some of their views, even if professedly based on Scripture, are nothing less than anti-Christian. If there can be such a marked difference of opinion, concerning such an essential dogma, amongst the clergymen, what must not be the confusion in this regard amtention to multiply examples; but teotion to multiply examples; but we cannot help alluding to one intance. The case to which we are now going to refer is one in which we find reverend gentlemen admitting immortality for the soul, but beating the air in most frantic efforts to get around the doctrine of a third state-of Purgatory. Actually, if a memory only. At a conservative that were not a teaching of the Catholic Church they would be forclong ago lost touch with the Church ed, by their own arguments, to ac-

cept it.
At the Ministerial Association in Toronto, in March last, Rev. H. S. Thomas discoursed on "The Soul after Death." We will pass over what he had to say about a future state, hecause he actually admitted the necessity of a life after death; but

going to its final place was somewhere in the lower regions of the a school has been erected. earth."

Here is an admission of an intermediate place, but a queer effort to get rid of the Catholic doctrine in that regard. Then in discussing the persons aged more than 75 years. matter Rev. L. W. Hill said that we have no information from the other world concerning the soul's state after death; and he added :-

"After death there was, he Catholics held, but a gradual deveopment.

What is a development but a change? The soul, according to our belief, being defiled by sin—the sin being pardoned but the punishment remaining unremitted - certainly grows purer as time, as prayers and time, combined, bring it closer to the end of its purgatorial stage. Rev. Dr. Brookman thinks the soul sleeps, because the Scripture says that after death we sleep, and when we sleep we are unconscious. Rev Mr. Thomas was horrified at this awful thought of one remaining in sin after death, and he argued "if a spirit is not conscious, how is it God lives and is active?" Now Bishop Du Moulin, of Niagara, thinks the souls are aware of our doings and pray for us, and that we should join with them in the prayers they offer yet he stops short at our reciprocating by praying for them. quote one special passage from the report of the Bishop's (Anglican)

sermon, as it is great interest:—
"He asked his hearers if it were epugnant to them to think of their departed friends as knowing about them, as interested in their life, and as praying for them to God to whom they were now so near? Was it repugnant to his hearers to think about their dead friends in this way, to think of them with happiness, and to join with them in prayer? What a pity it was that such a large part of Christendom looked with unnatu ral dread upon the blessed dead, consigned them to the cemetery, turned the pictures to the wall, put away every reminder of them, and did not like to think of them. Should they not rather cherish their memory and think of them with joy? The saints' days which the church celebrated were not the days of their births, but the days of their deaths; the the world in antagonism against her days when they entered into a largis it then any wonder that the er, better life. Instead of feelings of er, better life. Instead of feelings of Holy Father should in his last ency-clical, lament so strongly the falling thanks for all those who had departed this life in faith and fear of God that with them they might be par

takers of Christ's resurrection.' Here we are again! As soon as i omes to the doctrine of prayers for the dead-the logical outcome of all that has been said-each and all of them draw the line, and go off into vague generalities. Are we not jus tified in believing that these expounders of Christian doctrine ignore that grand and consoling teaching, simply and only because it is a doctrine of the Catholic Church? If so, where is the Christian sincerity? I so, where is the honest desire to pos sess and to publish the truth? do they not be consistant and logic al to the end?

Various Notes.

AN IRISHMAN PROMOTED. Col. Michael V. Sheridan, of the our Protestant fellow-Christians ac- United States army, has been pro-

ARMY OF SMOKERS. -The medical journal of New York says:—
The Board of Health of the State hought, no change as the Roman of Pennsylvania has adopted resolutions requiring cuspidors in the trains of the Pennsylvania Railroad and Philadelphia and Reading Railway, and is attempting to secure legislation inflicting a penalty for infringement of the rule. The provisions of the resolution require a cuspidor for each seat in the smokers' cars and one at either end of the day coaches. In the communication to the railroad companies the board cites the fact that the latest statistics of the United States Government show that three-fourths of all the men use tobacco, 80 per cent. expectorate, and 12,000,000 smoke.

EXECUTION OF FILIPINOS.

The Buffalo "Express" says :The question of atrocities comnitted by the American Army in the Philippines has been directly brought before the people by the trial of Maior Waller on charges of unwarrant ed execution of natives. In his own Major Waller has tesdefense that his orders were tified to kill and burn; that the ter his superior would be pleased; that he was not to take prisoners, but was to make Samar a howling wilderness and these savage orders were to apply to all natives over ten years old. Three other officers tes-tified in corroboration of these orders, although General Smith, who is alleged to have given them, swore on the previous day that he had givno special instructions to Major Waller and was not aware that na ives had been executed until his attention was called to the fact by General Chaffee. There is just a possibility that General Smith's orders were misunderstood. He has said that when he ordered Waller not to burden himself with prisoners, he did not mean to kill them. But, however that may be, apparently they were executed. That is not the sort of warfare the American people coun-

TEETHING TIME

the Scientists.

AGAINST CANCER .- The Royal College of Physicians and the Royal College of Surgeons, of England, together have sanctioned a scheme for It is proposed to raise \$500,-000 for a special laboratory to work CATHOLIC SCHOOLS. -The lo- under the direction of the most dis-

> WAR BALLOONS .- The use of balloons in war was recently discussed

skin. The reason for the use of this material is that in the first place the size of the balloon reduced, but also the weight of the equipment, when cylinders of compressed gas were taken out to the field of operations for the purpose of filling the balleon. The fragility of the substance might be overcome. Mr. Bruce said, by combining layers up to any desired thickness. He then gave an example of the great use of balloons in war, taking the siege of Ladysmith for an illustration. From its elevated position the captive balloon used could locate the guns, and the aeronaut, by dispatching telephonic messages to earth, sould insure the accuracy of the artillery fire. The translucent South African atmosphere particularly lends itself to balloon observations, as in England at a height of 1,000 feet the range of effective vision is seven or eight miles, while in Africa it is ten or twelve

Mr. Bruce related how some years

ago he applied electric-flash signalling to a captive balloon so that the operator might remain on ground. In this system, since the weight of the car and the operator was abolished, the balloon could be made of such a size as to be portable, quickly inflated, and easily manipulated. The emergency balloon was a specially portable form of signalling balloon. To obtain lightness in it goldbeater's skin was used instead of varnished cambric. Mobility was also secured by improvements in the electric storage batteries used, which rendered them very portable. The smallest possible size for an emergency electric signalling balloon, according to Mr. Bruce, would be seven feet in dlameter. This would lift a light cable and the lamps a few hundred feet, and requires one gas cylinder of 120 cubic feet capacity for inflation. Mr. Bruce also spoke upon the solution of the problem of a navigable balioon capable of being useful in war, and said he thought careful quantitative experiments would be of much ore use than any number of sensational journeys, such as those of Santos-Dumont, under the conditions of money prizes, in which the scientific desiderata were not sufficiently taken into account.

THE FORCE OF GRAVITY .- The force of gravity over the land is determined by counting the number of swings of a pendulum of known length that occur in a known lapse of time. Dr. Hecker of Potsdam has recently made an attempt to determine the relative force of gcavity over different parts of the Atlantic Ocean between Hamburg and Bahia by means of a barometer and a hypsometer (a boiling point thermometer). The barometric formula contains a term depending on the intensity of gravity at the place of observation. The hypsometer is independent of this influence. A comparison of the results of simultaneous observations by the two methods affords a means of determining the force of gravity approximately. The preliminary results indicate that gravity of the deep ocean is nearly normal and they confirm Pratt's hypothesis in regard to the isostatic arrangement of the masses of the earth's crust.

Topics of Catholic Press

IRISH AMERICAN MAYORS. -Pretty soon there won't be any other than Irish Catholic mayors in ccordance with the directions pre- the New England cities. Boston has has Mayor Denis Mulvihill; another Connecticut city has Mayor John Foley; and now comes Mayor Ignatius A. Sullivan, who was elected of the aristocratic old city of Hartford on Monday. If this thing keeps up, the name of that section will become New Ireland. The English are going from it—going with a ven-geance!—Catholic Union and Times.

THE CATHOLIC LAYMAN .- The apostolate of the Catholic Church is not confined to the clergy. Every layman in the Church is also an apostle. Upon him rests the tion, in proportion to his gifts, to carry the true faith to those around him who know not the truth and beauty of the Church. Every Catholic should have a reason for the faith that is in him and be able to answer those simple questions concerning the Church which many of us find so puzzling. But the best means of bringing home to your non-Cath-olic neighbors the truth of the Church is good example. A good life is more convincing than lengthy ar guments.-The Sacred Heart Review.

HEART OF A MARQUIS .- An interesting burial in the Crusaders Almanac, a publication issued by the
