NOTES FROM NEW MILLS.

DEAR EDITOR.—Kindly allow me space in
your valuable columns for a few general remarks
about our little village and vicinity:

Our farmers have been in securing their
hay crop in excellent order, and feel jubilant
over the large share which has been allotted to
them; as well as the prospect of a good harvest.
The products of our farms, although raising at a
fair price, are not yet so good as we have seen
them; but the farmers are in hopes that as the
season wears on their produce will command a
higher price, and that they shall be able to do
a good season's trade with their merchants,
who are already laying in their fall and winter
stock of goods, and who always seem ready
and willing to place produce to the best advantage
for their customers.

The lumber business is being carried on as
usual this season. Quite a number of vessels
have been loaded at Nash's Creek and Black
Point, the nearest places in our vicinity at
which mills are in operation.
The Benjamin mill property, formerly owned
by Messrs. A. Morton & Son, has been exchanged
with Mr. McNulty, the agent for the new
firm, is at present in our village. His genial
and pleasing manner readily made for him
many friends in this vicinity. On Tuesday, the
7th inst., the halls of the "old mansion" at
Benjamin were opened up for the purpose of
giving the youth of our village and its neighbor-
hood an opportunity of "tripping the light fantastic." At 7 o'clock the music began
shone through the entire building. At 8 o'clock
sharp, the valiant "old house" reverberated
with the sounds of music—under the touch of
Prof. Blagden's skillful fingers and the tripping
of the ladies' and ladies' feet.
The majority of the roles, and amusements were
engaged in during the evening. Mr. Campbell,
formerly of Bonaventure, P. Q., and now one of
"our boys," exhibited his skill in dancing,
by giving a few fancy steps and was commended
for his proficiency in our art. Next on the
scene was a pugilistic performance by Messrs F.
Rickett and Chas. Robertson, the young and
rising pugilists of our country. The young and
excellent. As the "war" was on, the crowd
the company broke up; but before returning to
their respective homes all joined in saying that
they had a right jolly good time, and in tender-
ing their deepest thanks to Mr. McN., and
wishing that he may long be so kind and proper
among them, and make many warm friends.

New Mills, N. B., Sept. 10, '86. Y.O.S.

General Intelligence.

THE NEWS CONDENSED.

Bernardino Biondelli, the Italian philo-
sophist and antiquarian, is dead.

Henry Ward Beecher is lecturing to
big houses in England.

Gladstone has announced that he will
not support Parnell's land bill.

Another American schooner was seized
at Port Mulgrave on Saturday night for
violation of customs regulations.

A Danish man-of-war drove away an
American fishing schooner that had run
into a Danish port contrary to an existing
treaty.

A ball of fire, six feet in diameter, fell
at Dover, N. H., Monday, and frightened
people.

It is announced that in future every
cent received in fines for infractions of
the Scott Act is to be passed over to the
Provincial Government.

The British Postmaster General has
stated in the House that the Government
were considering the establishment of a
mail route to India by Canada.

The Princess Louise and Marquis of
Lorne contemplated another visit to
Canada soon to see the progress made in
the Dominion during their absence.

A young man named Levi M. Brobst
of Nebraska, who is a bridegroom, has
come damaged by the excitement of the
wedding and leaped from a train and was
killed.

AQUATIC.—A despatch from London
says Beach and Ross have deposited \$300
for a race.—"Oceanic" challenged
Gaudaur to row a race on the champion-
ship course for \$200 a side.

A Washington despatch says the trea-
sury officials state that the three British
vessels arrested in Alaska waters will
be released at San Francisco. This shows
that the American government, while
making well out of the seal monopoly,
feels weak over the beluga trade.

The Dominion government has for-
warded to the British minister at Wash-
ington a statement of the Canadian case,
and a demand for the immediate and un-
conditional surrender of vessels seized
in Behring's straits seal fisheries.

A little girl baby born in Charleston
a few hours after the earthquake, has been
named Earthquake, and a few years
the young lady with this dreadful name
will wish her parents had never been born.

Wm. J. Kendall, the Boston ex-polic-
man who was a whirlwind rapist at
Niagara, is about to exhibit himself. He
says that he doesn't propose to put him-
self on the level of the tattooed man
by showing in a museum, but will give an
exhibition of his own.

A Nova Scotia farmer, hunting for his
cows at dusk, came upon a black bear that
at once showed fight. The farmer
was about to seek safety in flight, when
his three cows, bellowing loudly, with
tails erect and fire in their usually placid
eyes, charged the bear so fiercely that he
turned tail and fled.

It is proposed to connect England and
Ireland by a submarine tunnel. The
width of the channel where it will cross
is 214 miles. The greatest depth of water
is 780 feet and the roof of the tunnel will
need to be 320 feet below the bed of the
channel. It will greatly facilitate pas-
senger traffic and the delivery of mails.

Dr. E. Stone Wiggins claims that he
foretold the recent earthquakes. In the
Ottawa Journal of May 15th, 1886, he is
quoted as saying: "As I predicted
months ago, the approaching autumn
will be remarkable for great earthquakes
in North and South America pre-
ceding and following the storm of Sept.
20th, 1886." The doctor naturally claims
that the first part of his prediction has
been fulfilled, and adds, "after my system
shall have been made public, it will be as
common for seamen to calculate storms
from the nautical almanac as it now is
to reckon their latitude and longitude."

Major Courtney, of Charleston, tele-
graphs that in order to shelter the home-
less people before cold weather sets in,
from \$500,000 to \$700,000 is immediately
required. The mayor estimates the total
damage to property by the earthquake at
from \$5,000,000 to \$6,000,000. The city
applies estimates that there are about
7,000 dwellings, 1,500 business houses
in the city, and after visiting about three-
fourths of the city in the past three days,
his conclusion is that nearly every build-
ing is more or less damaged. Brick
buildings suffered most, and many of
them will have to be pulled down.

The Mail announces this morning that
the Dominion Government intends pre-
ceding at once with the matter of estab-
lishment of a bureau of local statistics
at Ottawa, and that the Government will
forthwith appoint a commission of enquiry
forthwith, composed of men interested in
the local question, to gather information
and make suggestions based on their
practical knowledge of the exact nature
of the work that should be performed by
such bureau in the Dominion.

CONSIDERABLE OF A SHEPHERD.—Mr.
Thos. Brown, an old man of over 70 years
of age, living at Tolbrook, N. S., has
sheared this year 600 sheep in good order.
Several of the farmers for whom he sheared
this year he worked for in the same
capacity 30, 40 and even 50 years ago.
He commenced shearing 30 years ago,
and since then he has sheared no less
than 30,710 sheep.—Moncton Times.

A STRANGE BEAST.—A strange animal
says the Kentville Chronicle, is being
hunted through the woods near Kentville
by the citizens. It has been seen by
several and is reported to be an animal
about the size of a cat 3 months old,
is striped like a leopard, and is said to
be long. It made a dreadful noise
which somewhat resembled the train
when in motion. It has attacked several
cattle and torn their ears, and is said to
be a great pest to the farmers. It is said
that it has been seen in the woods near
Kentville, and is said to be a great pest
to the farmers. It is said that it has
been seen in the woods near Kentville,
and is said to be a great pest to the
farmers. It is said that it has been
seen in the woods near Kentville, and
is said to be a great pest to the farm-
ers. It is said that it has been seen in
the woods near Kentville, and is said to
be a great pest to the farmers.

A special despatch to the St. John
Globe from Toronto says:—
A voluntary movement has commenced
among the French-Canadian population
in New England States to return to this
Province and undertake the cultivation
of land. Dr. J. J. Laplante, of Law-
rence, and Mr. Camille Cousin, merchant
in Lowell, Mass., were appointed dele-
gates by an association of one hundred
and five heads of families where they
reside, to come here and select twenty-
five acres of land in the Province, and
they have decided to take what land they
require in the valleys of La Vie and
Larouche. This movement is likely to be
of great benefit to the Province, and
will result in an influx of those who
emigrated from this Province.

STARVATION IN NEWFOUND-
LAND.

New York, Sept. 12.—A Halifax spe-
cial says: The widespread starvation in
Newfoundland is assuming an acute form.
England's oldest colony is in a most de-
plorable condition and

GRIM STARVATION IS STARING

one hundred and forty thousand helpless
and almost hopeless men, women and
children in the face. The situation is all
the more deplorable because the recent
barrage of starvation and cannibalism
among the Labrador Eskimoes has hor-
rified and disgusted the English speak-
ing public that future tales of suffering
from Newfoundland will naturally be re-
ceived with suspicion, and will largely
curtail, if not effectually prevent, all at-
tempts at outside relief. Not only is the
condition of the fishery population a most
looming evil, but the pulse of the econ-
omy is so straitened that it will be utterly im-
possible for the public to adequately deal
with the frightful distress now looking
them in the face.

The colony is completely isolated from
the commerce of both Canada and the
United States. Its 200,000 people are
almost solely

DEPENDENT UPON THE FISHERIES FOR A
LIVELIHOOD.

Agriculture, manufactures and almost
every other industry is unknown. For
years past its fisheries have been going
from bad to worse, until this year the
colony is on the brink of a catastrophe.
Last year the government had to feed a
large portion of the people along the
coast. The planters and large fish op-
erators have advanced supplies to fishermen
the last two winters to keep body and
soul together, until the poor people are
now

ROUSELESSLY IN DEBT,
and merchants are unable to advance
more supplies. Added to the complete
failure of the fisheries is the general de-
moralization of the people, and the con-
dition of the colony is such that it is
impossible for the public to adequately deal
with the frightful distress now looking
them in the face.

The British Postmaster General has
stated in the House that the Government
were considering the establishment of a
mail route to India by Canada.

The Princess Louise and Marquis of
Lorne contemplated another visit to
Canada soon to see the progress made in
the Dominion during their absence.

A young man named Levi M. Brobst
of Nebraska, who is a bridegroom, has
come damaged by the excitement of the
wedding and leaped from a train and was
killed.

DOG LOST.

On or about 5th July last, a
Black NEWFOUNDLAND DOG
with one white spot on his neck, is about
one year old and of medium size. Either
strayed away or gone with tears leaving my
premises.

Information of his whereabouts will be
thankfully received by
P. HENNESSY,
Newcastle.

Sept. 14, 1886.

NOTICE.

To the Sheriff of the County of Gloucester or any
Constable within the said County.—Greeting.
Whereas John Kenney, the Administrator of the
Estate of Michael Kenney, late of Bathurst, in the
County of Gloucester, deceased, has filed an ac-
count of his administration of the said Estate, and
has prayed that a citation may issue, calling upon
all parties interested in the said Estate to attend
the hearing thereof.

You are therefore required to attend the said
hearing, to be held at the Court of Probates, at
St. John, on the 27th day of September, 1886,
at 10 o'clock in the forenoon, to show cause, if
any, why the said account should not be allowed.
If any party has, why the said account should not
be allowed.

Likewise given under my hand and the seal of the
said Court the eleventh day of September,
A.D. 1886.
Signed,
D. G. MacLennan, Judge of Probates,
Register of Probates
for said County.

DEATH OF HON. JOHN MC MILLAN.

The death of Hon. John McMillan,
post office inspector of New Brunswick,
which occurred at his residence, Simonds
street, Portland, last evening, will be
heard with regret in this city, along the
North Shore, and generally throughout
the province. Mr. McMillan had been
in ill health for some months, and weeks
ago it was seen that the end was ap-
proaching. He represented the county of
Restigouche in the Legislative Assembly from
1857 down to Confederation, and held in
succession the portfolios of Surveyor
General and Post Master General, resign-
ing his seat in the assembly in 1877. He
was appointed post office inspector for the
New Brunswick district August 7th,
1867, and discharged the duties of that
office with fidelity and personal zeal until
stricken down by the illness which result-
ed in his death.

Two daughters and three sons survive
him. Mr. McMillan was born 4th August,
1816.—Sun, 13th.

THE FISH QUESTION.

A Washington special says, in regard
to the quantity in which fresh fish can
be imported free of duty, the treasury de-
partment holds no positive rule can be
established for the guidance of customs
officials. The question of whether fish can
be imported in quantities for food pur-
poses without salt or some process of
preserving, which takes from them their
distinctive character as fresh fish, should
be assessed. In such condition they are
not fresh fish for immediate consump-
tion.

CHEAP EXCURSIONS

TO
CHURCH POINT
AND
BAY DU VIN ISLAND.

THURSDAY Next, 16th Sept.
The Steamer "MIRAMICHI" will leave
Newcastle at 8 o'clock and Chatham at 9 o'clock
for Church Point calling in between at
Chatham and Newcastle. And on
Saturday Next the 18th Sept.,
Landing at Bay du Vin Island, will leave there
at 4 o'clock for Chatham and Newcastle.
A limited number of Tickets will be sold.
To be had at Johnson Bros., Newcastle,
and McKenzie's Drug Store, Chatham.
RETURN TICKETS 25 cts. each.
THOS. F. GILLESPIE,
Manager.
Sept. 14, 1886.

NOTICE.

A Tea Meeting will be held at the Union
Hall, North End,
WEDNESDAY, 22nd Sept. All
well of the New Presbyterian Church. All
are specially invited to attend.
DOORS OPEN AT 6 O'CLOCK.
ADMISSION 25 cts.

Piano Tuning.

G. O. Bickerman of St. John will shortly pay
a visit to the North Shore for the purpose of
tuning Pianos and Organs.
Sept. 9, 1886.

NOTICE.

The old Fog Whistle at Point Esquimaux,
New Brunswick, has been replaced by a Nep-
tune Fog Horn and is now in operation.
J. MITCHELL,
Inspector of Lights.

Of the 90,000 dependent upon that branch
for an existence less than 20,000 have se-
cured enough to carry them through the
winter. This will leave 70,000 of them
dependent on government or public char-
ity for their existence. They are scattered
over 3,000 miles of the most barren and
dangerous coast in the world, and unless
prompt and extensive measures are taken
to send these people supplies, it will be
impossible for relief steamers to reach
them during the winter and hundreds of
them must inevitably starve.

This language may seem exaggerated,
but it is the plain English of existing
facts and inevitable consequences. The
herring catch is an utter failure, and is
less than 10,000 barrels against 90,000
barrels for last year. The shore fishery
almost equals the Labrador fishery in the
COMPLETENESS OF ITS FAILURE.

THE YACHT RACE.

New York, Sept. 7.—This has been
the greatest yachting day that New York
has ever seen and another day of glory for
Boston, for her latest and prettiest pro-
duct of naval architecture, the sloop
yacht "Mayflower," has won the first race
of the international series against a
powerful antagonist, the British cutter
"Galatea" with a steady breeze from the
southward, permitting both
yachts to carry all light sail. The
"Galatea" was beaten 12 min. 40 sec.

NOTICE.

SEALED TENDERS addressed to the undersigned
and marked on outside "Tender for Pictou
Town Branch," will be received until FRIDAY, 24th
September, 1886, for the completion of the Pictou
Town Branch.
Plans, profile and specification may be seen on
and after THURSDAY, 17th September, at the office
of the Chief Engineer, Moncton, N. B.
Forms of tender may be obtained at the same
place.
Each tender must be accompanied by a deposit of
seven thousand five hundred dollars (\$7,500).
This deposit may consist of cash or of an accepted
bank cheque, and it will be forfeited unless the person
tendering accepts or refuses to enter into a contract
to build the branch to the satisfaction of the
contract. He fails to complete the work satisfactorily,
according to the plans, profile and specification.
If the tender is not accepted the deposit will be
returned.
Tenders must be made on the printed forms sup-
plied.
The Department will not be bound to accept the
lowest or any tender.

The Department will not be bound to accept the
lowest or any tender.
D. POTTINGER,
Chief Engineer,
Railway Office, Moncton, N. B.,
September 13th, 1886.

NOTICE.

SEALED TENDERS addressed to the undersigned
and marked on outside "Tender for Pictou
Town Branch," will be received until FRIDAY, 24th
September, 1886, for the completion of the Pictou
Town Branch.
Plans, profile and specification may be seen on
and after THURSDAY, 17th September, at the office
of the Chief Engineer, Moncton, N. B.
Forms of tender may be obtained at the same
place.
Each tender must be accompanied by a deposit of
seven thousand five hundred dollars (\$7,500).
This deposit may consist of cash or of an accepted
bank cheque, and it will be forfeited unless the person
tendering accepts or refuses to enter into a contract
to build the branch to the satisfaction of the
contract. He fails to complete the work satisfactorily,<
