lust for discrediting a Liberal government, cease to be consistent. They fail to bring into concord their blue ruin political articles on the editorial page, with contradicting facts in their news columns which indicate the wonderful progress and abounding prosperity of the country under Liberal dministration. We see instances of this in the Toronto Mail and Empire almost every day. Now the Halifax Horald furnishes another example. Probably no newspaper in this country has been more violent in its attacks upon the Laurier Government for having 'caused the business depression,' for having conducted the affairs of the country without regard to business principles, and for generally having produced a paralysis of the wheels of industry. The Herald was especially virulent during the recent byeelections in Colchester; but even when here has been no bye-election in

on. Only a short time ago, a number of Chinese were arrested as they attempted to smuggle young girls from Canada into the United States. In Eastern countries, the slave trader piles his vocation in the market place. Some go into another kind of slavery owingly—yet make a valiant effort to escape. Ottawa is all \$30 over the wonderful escape of one of her charming matrons from that physical slavery, Rheumatism. Mrs. R. C. Small says, "I was a constant suf-ferer from rheumatism for over seven years. I used many treatments-consulted doctors—tried hot bathsused almost every known mineral water-but nothing did me any real good. The pains were in my joints and back, and I had frequent head-aches and bad indigestion. About a year ago, I saw 'Fruit-a-tives' adver-tised and decided to try them. After I had taken two boxes, I was much better. Altogether I took seven boxes. I have had no rheumatism for over six months now and feel that I am ounds in weight."

sight it has daily preached blue ruin and commercial stagnation. Now, the Herald, when it comes to state facts, cannot truthfully avoid bearing tribute to conditions implied in the statement that the people of the province 'were never in a more prosperous condition,' and abundant evidence is presented in proof. One would think that the organs would get tired of preaching a blue ruin, which is extinguished by facts supplied by themselves. But such is the force of habit. These same organs, in the days of Conservative regime, when stagnation and depression were the rule, wasted columns of matter and piled up columns of figures to try to show that the country was prosperous. This is what led Sir Wilfrid Laurier to declare in Toronto were entrusted to the Liberals the people would not have to use elaborate figures to prove their prosperity-they ould feel it in their pockets. And it has been even so as he said.
