

THE EDMONTON BULLETIN (SEMI-WEEKLY) DAILY—Delivered in City, 24 per cent. By mail, per year, \$5. By mail to United States per year \$6.

THE MAIL'S THREAT TO THE INDUSTRIAL WORKER.

The failure of the Government to secure reciprocity with the United States has been made the theme of factious criticism from time to time. Always, however, the critics have made it clear that the failure was as far as possible from being a disappointment to them. On the contrary, it has afforded them ground for professional gratification.

No one can doubt that the large importations of goods which we ought to make is a serious matter for the Canadian workman.

Unless we are much mistaken this is the kind of "distress" the industrial employees of the country most want.

What are the facts? For many years up to 1895 the friends of the Mail and Empire determined our tariff policy. Professedly that policy was designed to prevent importation of the end that home manufacturers might be encouraged.

What are the facts? For many years up to 1895 the friends of the Mail and Empire determined our tariff policy.

much evidence here that the Canadian manufacturer and industrial worker were being ousted from the home market by the purchase of foreign made goods.

In 1900 our establishments employing five hands or over gave work to 329,000 employees, and paid them wages amounting to \$113,000,000 million dollars.

But there is another side to the case. Our industries were increasing from 1890 to 1900, as well as from 1900 to 1905. It is reasonable to suppose that they increased half as much during the former period as during the latter.

Supposing that in 1878 Canada had not a cent of capital invested in factories and employed not one hand in industrial work.

Supposing that in 1878 Canada had not a cent of capital invested in factories and employed not one hand in industrial work.

the ports of entry to exclude those who were not considered desirable; and for maintaining immigration halls and agents in getting on the land or in finding employment.

What did we get from this large expenditure? The last period for which complete figures are available is the seven months ending with October 31st last. During that period the arrivals numbered 21,859.

But no man familiar with the class of new-comers now entering Canada will estimate \$50 per head as the average each wealth imported by them.

Calculating a family as comprising four members, this leaves 19,000 American immigrants other than farmers who have sold their farms and brought along the proceeds.

From all other sources we received 67,000 immigrants. Calculating a family of five per head these brought \$3,350,625 cash into Canada.

From these calculations it seems almost reasonable to conclude that during seven months of last year the immigrants to Canada brought into the country not less than \$50,000,000 cash.

From these calculations it seems almost reasonable to conclude that during seven months of last year the immigrants to Canada brought into the country not less than \$50,000,000 cash.

From these calculations it seems almost reasonable to conclude that during seven months of last year the immigrants to Canada brought into the country not less than \$50,000,000 cash.

From these calculations it seems almost reasonable to conclude that during seven months of last year the immigrants to Canada brought into the country not less than \$50,000,000 cash.

From these calculations it seems almost reasonable to conclude that during seven months of last year the immigrants to Canada brought into the country not less than \$50,000,000 cash.

From these calculations it seems almost reasonable to conclude that during seven months of last year the immigrants to Canada brought into the country not less than \$50,000,000 cash.
