War Legislation.

The Legislature has been in session three days. The first day was necessarily devoted to the opening cere-monies and the disposal of the Governor's speech. During the past two days several measures have passed both houses. With the exception of two measures, those relating to wireless for sealing steamers when engaged in sealing, and the empowering naval base of the Mediterranean fleet. but the injuries of the Aquitania are stopped. of the Government to call for its installation on such other steamers as may be desirable, and the Sealing Enquiry legislation, and the fiscal measures which are partly called for by ists in Berlin. Composer of an orawar conditions, but mainly shortages torio and a large number of songs due to other causes, the other meahis reputation is established as a sures are war measures pure and

Among these is an enactment called War Measures, which will enable the Government to take such precautions as are being taken in the British Islands, if occasion arises. Then there is a measure to control extortion in prices of food stuffs,

should it be necessary.

The Volunteer Bill has also been put through. Among the fiscal measures is one providing for the placing of stamps on certain mercantile instruments and another to collect revenue on estates left at death. A measure which is before the Assembly is English composer and musical editor. one to permit the export of pit sticks. as the coal mines in Great Britain are beginning to feel a shortage, owing he also edited sacred works of Haydn, to the cutting off of supplies from the Mozart and other composers which low pulp wood to be cut on the Labrador next winter and to be exported on the payment of an export tax of one dollar a cord. It is hoped that this measure will afford some employment during the winter and bring something in the content of the present firm off Novello, Ewer & Co. something into the revenue. The Op-position has assented to this amendment of the Crown Lands Act for one year in view of war conditions. Today's news shows the situation is growing worse in France, the Germans have forced their way so that they are now comparatively near the Paris forts on the east side. This forebodes a circling movement meant French capital. Should German progress be as steady as it has been in the past, the beginning of the siege of Paris will be a matter of but a very short time. All this points to a long and costly war and it is well for us

McMurdo's Store News.

SATURDAY, Sept. 5, 1914.

Some people have been complaining of having got "a cold out of the heat" and that sort of trouble is not uncommon at this season. For the cough that usually accompanies it, McMurdo's Cough Syrup is one of the best things. Our Cough Syrup is the product of our own laboratory, and it is fully equal to any imported article for recent colds and coughs. The proof of this is that we sell more of it than of any other cough mixture. Price 25 cents a bottle.

Scathing Denunciation Of the Barbaric Savagery of the Kaiser, the "New Scourge of God."

Frederick Harrison's

London, Sept. 1 .- Frederick Harrison, writing to the Times, says: "These abominable crimes against humanity and civilization call for condign re-I probation in the face of the civilized world. The whole German military and civil order are responsible for this poisoning of the moral sense of their nation. I know that nine-tenths of the German people accept their leading from Indigestion to try the same ership and adopt their infernal code, that "Might is Right." Under the inverted doctrine of right and wrong, German millions are now committing

enormities as horrible as those of Dahomey and the African savages of old. Let us hear no more whining The above Testimonial was received about the German 'culture,' but let us make it known that we make the world ring with our sense of horror.

"The whole junker caste and Hohenzellern Dynasty are the head and front of these infamies. It is for the German people to deal with the Gernan race, which has ruined them and brought their name to shame. Be it understood that when the Allies have finally crushed this monstrous brute, the Kaiser-if, indeed, he chooses to survive-he shall be submitted to the Wind W., light, dense fog; nothing heard passing to-day. Bar. 29.50; let his blood-stained sword be broken on his craven back, and the uniforms and orders, of which he is so childishly proud, be stamped in the mire, and if he lives through it, St. Helena or Devil's Island might be his prison and his grave.
