### A New Triumph in Record Protection

The SAFE-FILE will radically change all office filing. There has been a constant and growing need for not only a convenient, but a safe filing cabinet. The business man, with valuable letters and data to protect from fire, has been forced to choose between the office safe and a steel file. Fire history and experience have proved ordinary steel files inadequate for complete protection of records.

The SAFE-FILE is more handsome in appearance and practically no bulkier than the ordinary steel file. It gives more net filing room than many of them. But it is built as no other file has ever been built. It is SAFE-CABINET insulated throughout with the same monolithic insulation that has made the SAFE-CABINET famous and lifted it to a leading position in the safe-making industry.

You can secure SAFE-FILES in two, three and four drawer heights in both letter and legal sizes. The price is surprisingly low, very little more than you are paying now for ordinary files. Get further SAFE-FILE information today. Write to THE SAFE-CABINET COMPANY, Marietta, Ohio.

WALTER E. WHITE

Phone 1521. Exchange Building McBride's Hill.
