Hamilton Times

On the death of one of England's most eminent physicians, all his effects were sold by auction, and among other things was a sealed qacket, marked "Advice to Physicians," which brought a great price. The purchaser on opening the packet, read as follows: "Keep the head cool, the bowels open and the feet warm." If physic is necessary, use Parson's Pargative Pills; they are the most scientifically prepaired pill that has appeared in the last hundred years.

The use of Tobacco causes indigestion, palpitation, slowness of intellect, a desire for strong drink, and an intermittent pulse; it destroys the vitality of the blood, produces dizziness, disturbes the sleep, makes a man miserable, and prematurely old. When the diseases are serious and stubborn, the best remedy is Fellow's Compound Syrup of Hypophosphites, as it restores circulation, the nervous ganglia, builds up the muscles, and induces healthy Liver, Heart, Stomach and Intellect.

Few People unacquainted with physiological chemistry are aware of the quantity of iron in the blood, but all should know the importance of keeping up the supply, for debility, disease and death are sure to follow when the quantity becomes too much reduced. The Peruvian Syrup (a protoxide of iron) supplies this vital element, and has cured many chronio diseases.
