

Dear Sirs,

If there is one thing in which the Canadian Engineer leads it is in the *service* it renders its advertisers and subscribers.

Having our own branch offices and salaried representatives at strategical points, we are in a position to give a really live and reliable news service.

What we desire to call your attention to here is our Advance News Service—a service only given to regular advertisers in the Canadian Engineer.

Each Monday there is sent out to all advertisers a Bulletin which contains all the contract information received by our Construction News Department up to noon of that day. Thus advertisers secure this information several days in advance of the regular issue of the paper and have thus more time to examine the specifications, prepare bids and secure orders.

We know this service will interest you and we shall be glad to give you more detailed information regarding it if you drop us a line.

For reaching the following classes the Canadian Engineer is the best and most satisfactory medium in Canada:

Civil Engineers, Surveyors, Railroad Engineers,
Waterworks Officials,
Municipal Engineers, Engineering Contractors,
Medical Health Officers, Managers of
Engineering Plants.

ALL ITS READERS ARE BUYERS
