

# AN OVERVIEW TO CANADA

## Geography

Canada is a vast country, stretching from the Atlantic Ocean in the east to the Pacific Ocean in the west, and from the Arctic Ocean in the north to the Gulf of Mexico in the south. It is the second largest country in the world by total area, covering 9,984,670 square kilometers (3,855,100 square miles). The population is approximately 38 million people, with a high concentration in the southern half of the country. Major cities include Toronto, Montreal, Vancouver, and Ottawa. The country is known for its diverse landscapes, including the Rocky Mountains, the Great Lakes, and the St. Lawrence River.

Canada is a federal system with ten provinces and three territories. Each province and territory has its own government, but they are all part of the Canadian Confederation. The federal government is responsible for national defense, foreign relations, and the monetary system. The provinces and territories are responsible for education, health care, and social services. The country is known for its political stability and high standards of living.

Canada is a member of several international organizations, including the United Nations, the North Atlantic Treaty Organization (NATO), and the Organisation for Economic Co-operation and Development (OECD). The country is also a signatory to the Paris Agreement on climate change. Canada is known for its commitment to human rights and social justice. The country has a long history of immigration, and it is a multicultural society. The official languages are English and French.

Canada is a diverse country with a rich cultural heritage. The country is home to many different ethnic groups, including British, French, Irish, and Chinese.
