## STRATHCONA SCHOO ANNUAL CONCER

Requests Granted on Condition That Double Rate is

Col. Nichols, Capt. Durkam and Captain Brown of the 12th York Rangers appeared before the York County Council yesterday to make application for a grant of \$1000 towards equipping \$25 men for active ervice. Col. Nichols stated that the present strength of the regiment was 404, but he hoped that recruiting would bring it up to the strength required.

Six hundred dollars had already been spent on uniforms, but these were condemned by the Valcartier authorities as being inferior to the regulation standard. It was the intention to have the new uniforms made by a private contractor at a cost of 116,50 each, and as the grant for each uniform amounts to \$0.00 the cost of the Weston Water. Power and Light Commission, the size agreed agreement for the water extension to the York Farmers' Colonization Company's subdivision, on the outskirts of the Village, was received, together with a cheque to cover the cost of the work, and a request that such work should be proceeded with at once. The extension includes water mains on Weston road and Edmund avenue, in York Township, and the agreement provides that double the water rates prevailing within the municipality shall be paid. The commissioners will push forward the work, which will probably be done by day labor, the experiment would be ninety cents.

proved more economical than work by contract.

A communication was received from Dr. Dobie of the Toronto Free Hospital for Consumptives, on Buttonwood avenue, regarding the practicability of obtaining a supply of water from Weston. The feeling of the commission was that water might be supplied on the same terms as to the York Farmers' Colonization Company and other consumers outside the village.

Light Denison Avenue.

At the request of the York Township Council, a light will be placed on Denison avenue roadway, between the C. P. R. tracks and the fifth concession line.

The Hydro-Elettric Commission intimated that the estimate for an electric power service to Thistletown was under consideration. Eight street lights, and current for a ten-horse-power motor have been requested.

The contract for digging 285 feet of trench for water service to Mrs. Westphal's house, on the east side of St. John's road, has been awarded to E. Redmond.

## BISHOP REEVE LECTURES

ON MISSIONARY WORK Interesting Recollections of Work in Mackenzie River District.

District.

The Right Rev. Bishop W. D. Resve addressed a meeting of the Anglican Young People's Association of St. Andrew's, Todmorden, in the parish hall, Pape avenue, last night. The subject of his address was "Missionary Work in the Mackenzie River District." He spoke chiefly on his work among the Indians in the years 1870 to 1890 and recalled the privations which had to be undergone by workers in those regions. Speaking of the price of food he said that a loaf of bread cost a dollar, and even then it was extremely scarce. Butter and cheese were never seen and a slice of bacon finding its way into a settlement meant an invitation to tea for the whole camp.

Indians Enthusiastic.

"In those days," he said, "all our clothing came from England and took two years to reach us."

He referred to the Indians' quickness in learning and their religious enthusiasm once a missionary had been among them. He instanced one case where an Indian who had been received into the Church of England waited for years to have his children baptized in that faith, althe a Roman Catholic missionary was working in the district.

lovely. But now what a difference! The camp roads are a sea of mud caused by the moisture and the constant stream of heavy traffic. The clothes of soldlers have been wet for days, and there is no way to dry them. A bonfire is occasionally set going at night to act as a drying process, but many men are forced to huddle into their blankets in wet clothes, and the garments are still damp when they awaken in the morning. Most surprising of all there has been very little sickness.

"The fact that there are so few ases in the hospitals speaks well for the sturdiness of the boys," said a colo-nel attached to the headquarters. "It is a surprising thing to me that a number of them have not died from pneumonia."

During the first few days on English soil it rained just slightly. Then within a week or so that water began to pour. When a rainbow appeared and the sun looked over the hills, in the morning, there was rejoicing. One would hear an occasional clear. But would hear an occasional cheer. But the fact that the rain would fall a little later, despite sun or rainbow, has chased away any expectations of fine weather. Lack of rain would be looked upon as decidedly unnatural.

But the troops have to work just the same. Downpours do not inter-fere with route marches, but they do interfere with manoeuvres and shootmg to a great extent.

When the contingent is moved into huts the men will be happier. The moving is due to begin any day. The

Liberal With Passes. Altho discipline has been tighten up considerably and the men are given the "C.B." for almost any offence, the commanding officers have been very liberal with passes. When a man ob-tains the slip of paper that allows him liberty, he is off to London or on a visit to relatives in various parts. The British-born go home, the Canadians grab the first train for the big city and they stay till the last minute. Some linger longer than the permit allews and consequently the reception back at the camp is rather frigid. It is either fatigue duty or the guardhouse. One will find many whose parents live in England, Ireland or Scotland and whom they have not seen for years. These men usually get five to seven days leave and they to Belfast said he had not been home for 11 years. He left for Canada aflians grab the first train for the big for 11 years. Another private, one of Lord Strathcona's Horse, called on a brother in London after ten years' ab-sence. He was Private Grestock, who had been in the Klondike all that time, and was known as the Lone Man of Eldorado. Up in the northern region the second highest mountain was named Mount Grestock. The soldier's name was used because he was the first man to climb it.
"If I survive this fight I certainly will go back," he says. "It's a fascinating country and calls me every minute. I think I'm homesick already, but I couldn't miss this fun,
