

able publishers, and edited by men of recognized ability; and in this Edition of "Smith's Landlord and Tenant," there is sufficient to prove, at least so far as this work is concerned, the correctness of our position. In several points the Canadian Lawyer will find in the American Notes much valuable learning bearing on circumstances common to the United States and this country, and the American doctrine propounded and illustrated—for example we would refer to the subjects of *Waste* (page 192) and "*Letting on Sharcs*," (page 91.)

In adopting the Laws of England as the rule of action, we have not tied ourselves down to a rigid unbending application. Law is a progressive science—its principles are necessarily elastic in their application. The Work before us is sufficiently known and appreciated to need no commendation from us. In his Notes, Mr. Morris has very properly kept in view the Author's plan, and has produced an edition enriched by carefully prepared Notes, exhibiting clearly the learning and research of a man fully equal to the task he undertook and has so satisfactorily accomplished.

BYLES ON BILLS OF EXCHANGE, PROMISSORY NOTES, &c.—*Fourth American from Sixth London Edition, with additional Notes, illustrating the Law and Practice in this Country: by Hon. GEORGE SHARSWOOD.*

Every one has read "Byles on Bills,"—pithy in composition and admirable in arrangement, it has always been a favorite with us. We welcome Mr. Sharswood's edition of this standard work. We admire his style and his handling of a subject. The Work before us is annotated, evidently with great care—the American Editor has kept principles steadily in view. The notes and text are in admirable keeping—both in a high degree remarkable for judicious condensation. We have run through the whole text by the light of American decisions; the scattered rays of leading points Mr. Sharswood has carefully collected. The Work commends itself to the Profession.

ADAM'S EQUITY—*Third American Edition, with the Notes and References to the previous Edition of J. R. LUDLOW and J. M. COLLINS; and additional Notes and References to recent English and American Decisions: by HENRY WHARTON, Counselor-at-Law.*

This valuable Work is very fully annotated by the American Editor—the Notes and References embody the more important English and American Cases down to the time of publication.

Judging from some of the Notes which we have read, we have no hesitation in saying that great care and judgment has been exercised by the present Editor—for example, we would refer to the Notes at pages 590 and 790.

AN INTRODUCTION TO THE STUDY OF JURISPRUDENCE: being a translation of the general part of "Thibaut's System des Pandekten Rechts," with Notes and Illustrations:—by NATHANIEL LINDLEY, of the Middle Temple, Barrister-at-Law.

This reprint is fairly got up. The Work itself is admitted to be an excellent summary of the principles of the Roman

Law. From the Civil Law every system of Jurisprudence has largely drawn, and its principles and maxims are rightly resorted to when positive municipal authority is silent, and general grounds of rational Jurisprudence alone guide to a decision.

To the student who desires to become a lawyer, an acquaintance with the principles of Roman Jurisprudence is essential; and the Notes and Dissertations on the text make the Work before us a valuable addition to the Law Literature of England and America.
