The Dominion Coal Company's stock, which sold at one time for $17.00 per share is now selling on the market for $140.00 per share, and is paying 8% dividends. Crow's Nest Coal Company's stock sold at one time as low as 25 cents per share; later it was dealt in on the market at $10 and $15 per share. It is now quite firm at $75 per share (par value, $25) and paying 10% dividends.

From a careful consideration of the foregoing facts and figures, it is quite within reason to expect that if development work shows a sufficient quantity of coal on the Company's property, investors who purchase stock of this Company, at its present price, may reasonably expect HANDSOME RETURNS, not only in interest, but also IN THE RISE IN VALUE OF THE STOCK.

FACTS.

1st. The geographical position of this coal field dominates a large and increasing market.

2nd. There is a present demand for 800,000 tons of coal a year in an area controlled by this property.

3rd. The quality is certified by competent and independent experts, NOT REPORTING FOR THIS COMPANY, to be of the highest COKING quality.
