## 366 ON The TRAIL of The IMMIGRANT

in the cabin, from contiguous or non-contiguous territory, and whether he pays or does not pay the head tax. The essential element is an addition to the population of the country as a result of travel and the word thus covers all additions to the population otherwise than by birth. A person cannot be an immigrant to the United States more than once any more than a person can be born more than once. It is a characteristic of this meaning that it does not alter.

The word immigrant in its administrative or statistical sense is not defined in the Reports of the Commissioner-General of In tion, but from that source and from the instructions and the circulars issued by the Bureau the following statements regarding its meaning have been drawn:

1. The administrative or statistical meaning of immigrant is not fixed by statute law but is determined by the definitions or explanations of the Bureau of Immigration and those are dependent upon and vary with the law and administrative decisions.

2. In the latest circular of the Bureau immigrants are defined as "arriving aliens whose last permanent residence was in a country other than the United States who intend to reside in the United States." This definition seems to agree closely with the popular or theoretical one.

3. But the foregoing definition is modified by a subsequent paragraph of the same circular which excludes from the immigrant class "citizens of British North America and Mexico coming direct therefrom by sea or rail." So the official definition is substantially this: An alien neither a resident of the United States nor a citizen of British North America, Cuba or Mexico, who arrives in the United States intending to reside there.
