		Tons.	Tons.

The yield per acre of winter wheat in 1899 was exceptionally low, the average for the past 17 years has been 20 bushels 1 lb. per acre.

The total area under the crops enumerated above was 8,753,926 acres, while the acreage devoted to pasture was 2,710,268.

In addition to this, the land occupied by red clover grown for seed was 64,937 acres; by alsike, 21,463 acres. Rape occupied 33,762 acres; flax, 7,103 acres; tobacco, 2,206 acres; and hops 1,146 acres.

Extent of Stock Industry.

The stock industry is a large one, as shown by the following figures:—The total number of cattle in farmers' hands in this Province on 1st July, 1899, was 2,318,355, of which nearly one million (974,474) were milch cows. Of sheep there were 1,772,604; swine 1,971,070; poultry, including fowls, turkeys, geese and ducks, 9,344,024. A large trade is also done in horses, the total number of these animals held in the Province at the date above named was 615,524, among which there were breeding mares to the number of 86,614.
