England Now Considers Dominion First Colony.

PREFERENTIAL TRADE FEELING

American Beef Scandal-Our Products Liked

Toronto, Aug. 21.-"So far as the colonies are concerned, there is only one topic of conversation, and that is 'Canada,' " said Mr. Noel Marshall, one of the Toronto delegates to the Congress of Chambers of Commerce of the Empire, who reached home this morning. The idea of Australia as the premier colony has now passed away, and now Canada easily takes first place. The people of England realize that in a week from London they can be in Toronto, whereas it takes them 40 days to go to Australia, and 45 days to go to New Zealand. This, added to the other reasons, has given Canada, first place in the minds of Britons.

They realize that if a relative goes to Canada he can run back home for a vacation, or they can come out to see him, but that if a relative goes to Australia it is ten chances to one that they will ever see him again. Mr. Marshall believes that Canada is going to get a er share of British capital than in the past and also a finer lot of immigrants from the British Isles than ever before. On the Empress of Ireland there was as fine a lot of immigrant
