Physical Education in Schools.

What a farce it is for the geography What a farce it is for the geography or arithmetic teacher to read over a syllabus or listen to a few chalk talks on physical education and then attempt to serve as physical instructor? It is heart-breaking to see such a performance, the instructor making a sorry bluff at the exercises in her corset and other trappings and the children with tongue in cheek trying hard not to laugh at the ridenious spectacle.

QUESTIONS AND ANSWERS.

Sewer Gas.

Is there any odor from sewer gas, and is there any danger of sewer gas leaking, in case of faulty plumbing, for instance, from a kitchen sink?—C. V. Answer — Even though sewer gas should escape into the house there is no danger to health. Disagreeable odors are more likely to come from uncleaned or unventilated drains.

Left-Handed Children.
There are in my beginning class several left-handed children. Some of the parents assure me that all sorts of nervous wrecks are caused by teaching such children to use the right hand for writing. Is there anything in that idea?—P. E. M.

Twenty minutes each day are devoted to the education of the usually neglected muscles "below the eyebrows," writes a Pittsburg public school teacher. And in addition, she informs us. "there is a ten or fifteen minute period of whys and wherefores listed in the curriculum as hygiene."

The great trouble with hygiene, in the Pittsburg curriculum, is that the school authorities narbor a notion that it is an insignificant or unimportant subject to be sandwiched in between more essential subjects such as geography and botany. They don't try to teach arithmetic or history in ten or iffteen minute periods of whys and wherefore in Pittsburg, I wager.

But that twenty minutes of physical education each day is something like. They're beginning to wake up and look. They're beginning to wake up and look around in Pittsburg, beginning to sus-
