### CANON ARMSTRONG LECTURED.

Under the auspices of the High School  
Alumni, Canon Armstrong gave an  
eloquent address on the "Spirit of  
France" in the Pithy Club on Tuesday  
evening. The national committee  
amplified an address previously given  
under the auspices of the Ladies' Club  
on the same subject. Canon Armstrong  
is a large audience was greatly im-  
pressed and delighted with his sym-  
pathetic and comprehensive knowl-  
edge of the people of France. Dr.  
James Mage presided and extended the  
cordial thanks of the meeting to Canon  
Armstrong. The programme opened  
with the Marching Song, played by Mrs.  
J. God Save the King, played by Mrs.  
J. Rayworth.

Sault Ste. Marie, one at Hamilton and  
two at Sydney.

The gradual improvement in the steel  
situation noted in the September report  
is reflected in the October output, which  
may be expected will be well main-  
tained.

Steel Ingots and Castings.

The output of steel ingots and cast-  
ings for the month of October reflected  
a new high record for the year at 72,000  
tons, an increase of nearly 16,000  
tons over the production during the  
preceding month, and some 200 tons  
more than the output for August, when  
the previous high record for the year was  
made. During the latter part of the  
month, particularly, there was a favor-  
able turn in the steel making industry  
closely following the increased output  
of pig-iron recovered in the production  
of steel ingots and castings the output  
rose to the August mark and passed  
slightly beyond.

Basic open hearth steel ingots made  
by the several firms for their own use  
rose to 69,900 tons from a total of 54,000  
tons in September. No acid open  
hearth steel was made and very little  
bessemer.

Electric steel ingots increased to 542  
long or nearly three times as much as in  
the preceding month. From these data  
it will be seen that the total production  
by makers for their own use during  
the month was 70,300 tons as compared  
with 54,475 tons in the preceding  
month.

There was a small production of steel  
ingots made for sale. Basic open hearth  
steel castings made for further use  
amounted to 225 tons or an increase of  
about 50 per cent, and basic open hearth  
steel castings made for sale rose 100 tons  
to 122 tons making a total use for this  
class of 1020 long tons. Fourteen tons  
of bessemer castings were made for fur-  
ther use and a total of 118 tons was pro-  
duced for sale making a total output of  
127 long tons.

Electric steel castings declined slight-  
ly to 702 long tons, consisting of 6 tons  
made for further use and 696 tons pro-  
duced for sale.

Direct steel castings for October total-  
led 1,848 long tons, as against 1,601  
tons in the preceding month. From these data  
being used by the producers in further  
processes. The average monthly output  
of steel ingots and castings for the year  
is now 55,000 long tons in comparison  
with which figure the total output for the  
last for the current month stands out  
in good relief.

Table 3(a) shows the production of  
steel ingots and castings during the cur-  
rent and preceding month, and Table  
3(b) shows the total output for the ten  
months ending September. Table 4(a)  
and 4(b) show the monthly outputs of  
steel ingots and castings for the past five
