NOW TO FORWARD PROJECT OF PUBLIC PLAY GROUNDS HERE

Hoped to See Large Gathering of Citizens at Meeting Called by Mayor for Thursday Afternoon

Much interest is being shown in the public meeting to be held in the Common Council chamber of the Court House on Thursday afternoon at 3 o'clock for the consideration of a proposition for public play grounds for St. John.
His Worship Mayor Frink will preside, and there will be a thorough discussion dealing with public play grounds from every standpoint. The question is one that is becoming more prominent each season, and has now reached a stage when it is felt the city must grapple with it. It is hoped that citizens generally will lend their sympathy and assistance, and that some plan will be evolved for organization, so that the project may be gotten under way. The location decided upon, and a decision arrived at for operation, and as to whether there will be a public survey as is the custom in other places. It is fully expected that Thursday's meeting will attract a large number and that the matter will be given a good start.

COMPLAINT BY DIRECTORS OF FERNHILL

Water Main Leakage Causes Conditions in Cemetery Painful to Think of—Insist on City Taking Action

The following letter dealing with serious conditions following leakage of the water pipes in Fernhill was sent to the Common Council by the directors of the Fernhill Cemetery Company. The communication is referred to the water and sewerage board at yesterday's council meeting. The letter reads:

29th September, '11.
To His Worship the Mayor and Members of the Common Council of the City of Saint John.
Gentlemen,—The directors of Fernhill Cemetery visited the cemetery grounds on Wednesday and are very much alarmed at the condition of certain sections of the grounds as a result of the leakage from the city's water mains, which, as you know, run through the cemetery.

For about three years now, or since the city's new water supply has been in operation there has been a constant leakage from these mains, which has done a great deal of damage to the cemetery grounds; in several instances it has required the services of our entire staff and teams hauling material for days to repair the paths and avenues that have been washed out by the rush of water over them from the leaks.

One of our avenues has been closed to traffic practically all summer as the result of a leakage in the mains at that particular point.
It is not so much the damage to the driveways, but imagine the result of this rush of water over burial lots where interments have been made. Fortunately our superintendent was close by when the first serious break occurred and directed the heaviest of the flow from running over the lots, thus preventing what would certainly have been a very unpleasant accident in the cemetery; but the constant leakage from these mains has created a flow of water that is soaking all through burial lots where interments have been made, and you can imagine the condition of these lots.

Understand, gentlemen, that this condition of affairs has existed now for nearly three years; the attention of Director Murdoch has been called to it from the start, he has been taken out there and shown the damage to the burial lots which the leaks were causing, and urged by our directors to do something to prevent it. The results, however, have been anything but satisfactory.

Our directors have hesitated to lay this matter publicly before your council in the hope that something would be done by your water board through Director Murdoch to prevent these leaks, and so avoid the danger of alarming the citizens generally who are lot holders in the cemetery. The flow of water caused by these leaks has become so serious, and the apparent disregard of the seriousness of the situation by the city director, however, makes it necessary for us to bring the matter to the attention of your council and to insist that something must be done immediately to prevent this flow of water from the city's mains that are running through the cemetery.

Yours truly,
President.
